THE WILLARD NERVINE HOME.

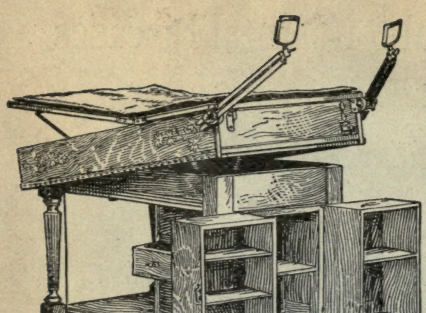
Popularly known as "The Nervine," and "The Rest Cure,"

BURLINGTON, VERMONT.

FOUNDED IN 1886.

A well appointed and beautiful building, with a picturesque location on the "College Hill," where all the available comforts of a "home" are provided for the nervous invalid while under appropriate medical treatment. DR. A. J. WILLARD (Yale '53, U. V. M. '77), has had long experience (both hospital and private), in the treatment of diseases of the nervous system. The number of patients limited to ten. **Insane patients not received.** Rates reasonable and low as anywhere else. Correspondence solicited, and all letters cheerfully answered.

Satisfactory references from nearly every State in the Union, furnished upon application.



A NEW OPERATING TABLE.

This Table is the latest invention in this line, and contains all the best and most recent improvements. It is so constructed that it can be adjusted to all the different positions. The top of Table can be rotated from side to side, and the ends raised or lowered as required.

The Cabinet can be drawn forward and opened, bringing the instruments within easy reach. The stirrups are adjustable, and can be placed in any position desired.

Every Table guaranteed to give satisfaction, and built and finished with the finest material. It is simple, strong and durable, with nothing about it to get out of order, perfectly noiseless in all its movements, and easily understood and operated. It is made of quartered oak, has a genuine leather cushion and pillow, and is handsomely finished.

A descriptive circular upon application.

We wish to call the attention of the Medical Profession to our New Preparation, which we call

THYMOZONE.

AN EXCELLENT

ANTISEPTIC, PROPHYLACTIC, AND DETERGENT FOR INTERNAL OR EXTERNAL TREATMENT.

THYMOZONE is a combination of Eucalyptus Glob., Thymus Vul., Pinus Sylvestris, Benzoic, Boracic and Salicylic Acids, and exhibits their superior properties in a fragrant, non-irritating, and efficient liquid form that is miscible with water in all proportions. Its freedom from color, together with the above qualities, naturally commends it as of greater utility than Carbolic Acid, Corrosive Sublimate, Permanganate of Potassium, etc., in surgical and general applications.

Internally, it may be successfully administered in all cases of Ulceration of the Stomach or Bowels, Fermentative Dyspepsia, Typhoid and Scarlet Fevers, Cholera, and other diseases and conditions associated with Bacteria. When inhaled in an atomized solution, it will be found of decided virtue in such cases as Diphtheria, Fetid Bronchitis, Gangrene of the Lungs, etc. Its active and easily available properties readily suggest its value and adaptness in Dental Surgery, viz., cleansing the mouth, hardening and healing soft and ulcerated gums, and thoroughly preserving the teeth from decay.

Externally, its antiseptic, deodorizing, and cicatrizing virtues render it of undoubted efficacy in correcting and arresting fetid and unhealthy discharges of suppurating Burns, Gangrenous Wounds and Ulcers, Chronic Inflammation of Mucous Membranes, such as Nasal Catarrh, Ozæna, Cystitis, etc.; also in Skin Diseases, Eczema, Psoriasis, and Tinea. As a Prophylactic and Detergent, it will be found of great advantage in promoting and maintaining cleanliness and recovery in Gonorrhœa, Leucorrhœa, Obstetrical Surgery, etc. Its employment as a Lotion, Injection, Inhalant, or Spray, may be repeated at will, previously diluted to suit the various conditions.

PREFACE.

THE author of THE MEDICAL REGISTER calls attention to the large number of added Societies, Hospitals, and Institutions given in this, the eighth edition, as a manifestation of the increased interest in professional matters and the desire to give needy members of the community the advantage of careful scientific treatment in the neighborhood of their homes. It is also an evidence of the fact that the newer graduates of our metropolitan schools are not only technically able, but eager to accomplish thorough work away from the great centres.

Attention should be called also to the pleasing fact that training-schools for nurses are now connected with nearly all the hospitals, and that these aids to the professional man are rapidly becoming more intelligent and more skilful. The laws regulating medical practice in the New England States are given as an indication of new interest in this direction. The statutes and ordinances affecting physicians and others are omitted, because their previous mention has been too brief for practical use, and the frequent changes in the laws render such mention misleading and unsatisfactory.

THE MEDICAL REGISTER.

ASSOCIATIONS AND SOCIETIES.

American Medical Association.

In May, 1846, a convention of medical men was held in the city of New York, which declared it expedient for the medical profession of the United States to institute a National Medical Association. In May, 1847, the convention assembled at Philadelphia, reorganized, and, having adopted a series of regulations, became known as "The American Medical Association." Its first annual meeting was convened in Baltimore, May 2, 1848; and since that time, with the exception of the years 1861 and 1862, annual sessions have been held in large cities in different parts of the country.

Delegates may be appointed to the Association from permanently organized State medical societies, and such county and district medical societies as are recognized by representation in their respective State societies, and from the Army, Navy, and Marine Hospital Service of the United States. Persons who have served in the capacity of delegates become permanent members, and are privileged to attend the meetings and participate in the affairs of the Association, but without the right of voting. Any reputable physician, who is vouched for as such by three of the active or permanent members, can attend the meetings of the Association, and is entitled to participate in all

its affairs, as in the case of delegates, except the right to vote.

Each State, county, and district medical society, entitled to representation, has the privilege of sending to the Association one delegate for every ten of its regular resident members, and one for every additional fraction of more than half that number.

The medical staffs of the Army and Navy are entitled to four delegates each; the Marine Hospital Service to one.

Any member of a medical society in good standing can become a member on presentation to the Secretary of a certificate, signed by the President and Secretary of his society, accompanied with the annual fee. He is entitled to all the privileges of membership, except that of voting. The Journal of the Association will be sent to him so long as he continues to pay his dues.

The sum of five dollars is assessed annually upon each delegate to the sessions of the Association, as well as upon each of the permanent members, whether present or not.

The meetings of the Association are held annually, and commence on the first Tuesday in May or June.

The thirty-third volume of the Transactions was published in November, 1882. In place of the annual volume of Transactions a weekly Journal has been issued since July, 1883, at a subscription price of five dollars. Address, Chicago, Ill.

The officers for the year 1894 are: —

President. — Donald Maclean, Detroit, Mich.

Vice-Presidents. — Starling Loving, Columbus, Ohio; William Watson, Dubuque, Iowa; W. B. Rodgers, Memphis, Tenn.; F. S. Bascom, Salt Lake, Utah.

Librarian. — G. W. Webster, Chicago, Ill.

Treasurer. — H. P. Newman, Chicago, Ill.

Congress of American Physicians and Surgeons.

The Congress of American Physicians and Surgeons is a conjoint triennial meeting at Washington, D.C., of certain national medical societies, so arranged that, while each society preserves its own autonomy and has its own meetings, papers, and discussions, the members of all the societies meet together at stated hours to carry out the objects of the Congress.

The main purpose of the Congress is the presentation

and discussion of scientific subjects selected with reference to their general interest.

The officers of the Congress are a President, a Secretary, and a Treasurer, and as many Vice-Presidents as there are societies taking part; the Vice-Presidents being the Presidents of the several societies for the year of the Congress.

The business of the Congress is managed by an Executive Committee, composed of one representative appointed by each society taking part. The President, Secretary, and Treasurer of the Congress are ex-officiis members of this Committee.

The third triennial meeting of the Congress was held in Washington, D.C., in May, 1894.

The following national medical societies at present compose the Congress: —

The American Ophthalmological Society.
The American Otological Society.
The American Neurological Association.
The American Gynecological Society.
The American Dermatological Association.
The American Laryngological Association.
The American Surgical Association.
The American Climatological Association.
The Association of American Physicians.
The American Association of Genito-Urinary Surgeons.
The American Orthopedic Association.
The American Physiological Society.
The Association of American Anatomists.
The American Pediatric Society.

President. — A. L. Loomis, M.D., New York, N.Y.
Chairman of Executive Committee. — L. C. Gray, M.D., New York, N.Y.
Treasurer. — J. S. Billings, M.D., Washington, D.C.
Secretary. — W. H. Carmalt, M.D., New Haven, Conn.

American Ophthalmological Society.

Organized in June, 1864. The purpose of this Society is to advance the knowledge of ophthalmic science and art. Its members must be graduates in medicine, in good professional standing, who have an interest in ophthalmology. They must have been engaged in the practice of ophthalmic surgery for at least five years, and shall have given evidence of satisfactory scientific attainments; they are proposed by two members at one annual meeting, and are balloted for at the next annual meeting.

The constitution provides that "No member of this Society shall attach, or suffer to be attached, to his name, in any public announcement, the title of oculist, or any similar title, or shall announce in print that he gives particular or exclusive attention to special practice."

The annual meeting is held on the third Wednesday of July, except the year of the meeting of the Congress of American Physicians, when the annual meeting is held in September with the Congress at Washington.

The Society publishes a yearly number of Transactions, including the papers read at the annual meeting.

American Academy of Medicine.

Organized in September, 1876, with the object of promoting a higher standard of educational attainment, the increase of fellowship among college-bred physicians, and the general betterment of the profession. It limits its membership to those physicians who have the A.B. degree or its equivalent, and devotes its attention to the investigation of those topics which relate to the physician himself rather than to medicine; for example, questions relating to the education of the physician, the maintaining a standard of professional acquirement by State examination and licensure, the problems bearing on the relation of the physician to the various classes of society about him, — in short, the study of the physician and his environment.

It publishes a bi-monthly journal, the "Bulletin of the American Academy of Medicine," and holds annual meetings at such times and places as the Council may de-

termine. Fellowship is secured by those having suitable qualifications upon written application and recommendation of a Fellow.

American Medico-Psychological Association.

The Association was founded in 1844 by its original thirteen members, who were superintendents of institutions for the insane, and its membership was thereafter chiefly limited to such hospital officers. In 1892, for the purpose of forming a better organization, a new constitution was adopted with the change to its present name. The object of the Association is the study of all subjects pertaining to mental disease, including the care, treatment, and promotion of the interests of the insane. Its membership includes active members, who are physicians, residents of the United States and British America, especially interested in the treatment of insanity; associate mem-

bers, who are assistant physicians of hospitals for the insane; honorary members; and corresponding members. About one hundred and fifty-eight hospitals, public and private, are represented, and the Association has three hundred and ten members.

The meetings are held annually in May or June, at such places as may be agreed on by vote of the Association.

The Transactions of the Society are published in the "American Journal of Insanity," which, after fifty years of its publication at the Utica State Hospital in New York, has become the property of the Association.

Society for Psychical Research.

The Society for Psychical Research was formed at the beginning of 1882, for the purpose of making an organized and systematic attempt to investigate various sorts of debatable phenomena which are *primâ facie* inexplicable on any generally recognized hypothesis. From the recorded testimony of many competent witnesses, past and present, including observations recently made by scientific men of eminence in various countries, there appears to be, amidst much illusion and deception, an important body of facts to which this description would apply, and which, therefore, if incontestably established, would be of the very highest interest. The task of examining such residual phenomena has often been undertaken by individual effort, but never hitherto by a scientific society organized on a sufficiently broad basis. The following are the principal departments of work which it is proposed to undertake: —

1. An examination of the nature and extent of any influence which may be exerted by one mind upon another, otherwise than through the recognized sensory channels.

2. The study of hypnotism and mesmerism, and an inquiry into the alleged phenomena of clairvoyance.

3. An inquiry as to the existence of relations, hitherto unrecognized by science, between living organisms and magnetic and electric forces, and also between living and inanimate bodies.

4. A careful investigation of any reports, resting on strong testimony, of apparitions occurring at the moment of death or otherwise, and of disturbances in houses reputed to be haunted.

5. An inquiry into various alleged psychical phenomena commonly called "spiritualistic."

6. The collection and collation of existing materials bearing on the history of these subjects.

The aim of the Society is to approach these various problems without prejudice or prepossession of any kind, and in the same spirit of exact and unimpassioned inquiry which has enabled science to solve so many problems, once not less obscure, nor less hotly debated. The founders of the Society have always fully recognized the exceptional difficulties which surround this branch of research; but they nevertheless believe that by patient and systematic effort some results of permanent value may be attained.

The American Branch was formed in January, 1890, in the place of the American Society for Psychical Research, which was organized at the end of 1884, and published four numbers of Proceedings. The annual assessment for associate members is five dollars, and for full members ten dollars.

OFFICERS.

President. — Prof. William James, M.D., Cambridge, Mass.

Secretaries. — F. W. H. Myers, Cambridge, Eng.; Frank Podmore, 32 Well Walk, Hampstead, London, N.W., Eng.

American Sanitary Association.

Organized in 1893 for the following objects: —

To aid in the maintenance of public health; to discourage the manufacture and sale of impure and injurious foods and medicines, etc.; to encourage the introduction of wholesome and honestly manufactured articles of foods, medicines, clothing and sanitary appliances in general; to examine and certify as to the character of foods, medicines, and sanitary appliances; to distribute, for the benefit of the general public, information concerning sanitary matters.

The enrolment fee is two dollars. Annual dues, one dollar.

Secretary. — W. T. Parker, M.D., Groveland, Mass.

American Medical Temperance Association.

Organized at Washington, D.C., May 7, 1891. The objects of the Association are to study the drink problem through the medical profession, and to promote investigation as to the action of alcohol in health and disease. It aims at being a bond of union among medical abstainers scattered all over the country. It admits as members regular medical practitioners who are practical abstainers from all alcoholic liquors as beverages. Members are not required to sign any pledge; and if such for any reason cease to be total abstainers, it is expected that notice of withdrawal from the Association will be sent to the Secretary. The liberty of members in prescribing alcohol as a medicine is entirely uncontrolled.

American Academy of Dental Science.

The object of this Society is to promote the theoretical and practical knowledge of dentistry, and to elevate the standard of the science and the requirements of practitioners of the profession. It was organized Oct. 19, 1867.

The Academy consists of Active, Associate, and Honorary Fellows. Active Fellows must be residents of New England, and have received a recognized medical or dental degree from a college in good standing. Associate Fellows shall be non-residents, but must have the same qualifications as Active Fellows. Honorary Fellows shall be such persons as are distinguished for their scientific and professional attainments, either as dentists or physicians. The initiation fee is five dollars, and the annual assessment seven dollars.

The regular meetings of the Academy are held at the Medical Library in Boston, on the first Wednesday of each month, except July, August, and September, at half-past seven o'clock, P. M.

The annual meeting is held in Boston on the Wednesday in November following the second Monday.

American Pharmaceutical Association.

Organized at New York, Oct. 15, 1851. The aim of this body is to unite the educated and reputable pharmacists and druggists of the United States, for their own improvement, for the advancement of the science and art of pharmacy, and for the good of the community at large. Every pharmacist or druggist of good standing, and teachers of pharmacy, chemistry, and materia medica throughout the United States, are eligible to membership. All local organizations of pharmacists are entitled to representation by five delegates at the annual meeting of the Association, who become members for that year on paying the annual contribution. Pharmacists, chemists, and other scientific men, who may be thought worthy the distinction, may be elected honorary members. The fee for initiation is five dollars, and the same sum is to be paid by members as an annual fee. The payment of seventy-five dollars constitutes the person a life member.

The Association holds its meetings annually, in September, at such places as may be decided by vote.

The proceedings of the Association are published annually.

Massachusetts Medical Society.

The Massachusetts Medical Society was formed in 1781, with power to elect officers, examine and license candidates for practice, hold real estate, and "continue as a body politic and corporate by the same name forever." In June, 1782, after several preparatory meetings, by-laws were enacted, a common seal adopted, the Society organized, and Dr. E. A. Holyoke, of Salem, chosen the first president.

In 1790, the first publication of the Society was issued; the second appeared in 1804, and the third in 1806.

The Society is intended to include all regular physicians practising medicine within the Commonwealth, and admission takes place according to the following prescribed laws of the State and the Society: —

> Any person of good moral character, found to possess the qualifications prescribed by the Rules and Regulations of the Society, shall, upon examination by the Censors, and not otherwise, be admitted a Fellow; and the Fellows shall have power to suspend, expel, or disfranchise any Fellow of the Society.[1]

The by-laws of the Society referred to in the special law of the State are as follows: —

Candidates for admission into the Massachusetts Medical Society may be either male or female; and every candidate must, by proper credentials and examination, satisfy the Censors of said Society that he possesses the following qualifications for fellowship: —

That he is not less than twenty-one years of age; that he is of sound mind and good moral character; that he has a good general English education; that he has a knowl-

edge of the principles of experimental philosophy; that he has such an acquaintance with the Latin language as is necessary for a good medical and surgical education; that he has studied medicine and surgery three full years under the direction, and attended the practice, of some reputable, regularly educated physician or physicians; that he has attended two terms of study, or two full courses of lectures in separate years, at an authorized medical school, recognized by the Councillors of said Society, and possesses a diploma or its equivalent from such school; that he does not profess to cure diseases by, nor intend to practice, spiritualism, homeopathy, allopathy, Thomsonianism, eclecticism, or any other irregular or exclusive system, generally recognized as such by the profession or declared so by the Councillors of said Society; and by such further examination as the Censors shall deem expedient.

If successful in such an examination as to his credentials, character, personal and professional qualifications, to the satisfaction of at least three of the Censors present, the candidate, after paying the District Treasurer the assessment for the current year and signing the by-laws, shall receive a certificate of membership (Digest xxvi., xxvii.), and be enrolled a Fellow of the Society.

A candidate may be examined at any stated meeting of Censors; but if the examination be unsatisfactory, he shall not be re-examined by any Board of Censors in less than six months afterwards. (xx., xxi.)[1]

Application for examination or re-examination must be made to the Secretary of the Society of the district in which the candidate resides.

The Censors of Suffolk District (who are empowered to act for the Society, and to examine all those *who have not a residence in some other district of the State*) meet in

[1] A Digest of the Acts of the Commonwealth relating to the Massachusetts Medical Society, together with the By-laws, etc. Boston, 1893.

Boston on the Thursday next preceding the annual meeting of the Society, and on the third Thursday of September and of December; but they cannot examine any candidate who is already a resident, or in practice, in any district except their own. The Censors of the other districts meet at the same place and on the same day as the stated meetings of the societies to which they belong.

Any Fellow who has arrived at the age of sixty-five years, has paid all his assessments, or has been excused from them, and has notified the Treasurer of the Society thereof in writing, may, on recommendation of a committee, and by a vote of the Councillors, become a retired member. He shall be entitled to all the privileges of a Fellow, and shall conform to all the requirements of the Society, and be subject to all its penalties, except that he shall not be liable to assessments, nor be bound to accept any office in the Society.

Any one who has retired or resigned, or been dropped from the roll of Fellows by a vote of the Councillors, may, on application in writing, be restored to full Fellowship by the vote of the Councillors at any stated meeting.

Any Fellow, whose dues have been paid or remitted, may, on written application and for satisfactory reasons, first examined and reported upon by a committee, be allowed to resign Fellowship and to withdraw from the Society by a vote of the Councillors.

The Massachusetts Medical Society includes eighteen district societies, all of which are under the control of the parent society.

The district societies appoint their own officers, and establish regulations for their particular government, not repugnant to the by-laws of the general Society; and are empowered to hold and dispose of books, instruments, and other personal property, exclusive of any authority of the

general Society. Together, the societies contain about nineteen hundred members.

The annual meeting of the Society is held on such Wednesday in May or June, and at such place, as the Councillors shall from year to year determine. Ten members of the Society constitute a quorum.

The district societies hold their annual meetings for election between the fifteenth of April and the fifteenth of May, and at least ten days before the annual meeting of the Society.

The Councillors meet on the day preceding the annual meeting, and on the first Wednesday in October and February. Nine Councillors constitute a quorum for the transaction of business, but a smaller number may adjourn the meeting.

The Proceedings of the Society, and the annual address, are, as a rule, published each year.

The following Code of Ethics has been adopted by the Society and Councillors.

Object of a Code of Ethics.— The Massachusetts Medical Society is designed to secure to the public a body of well-educated and otherwise trustworthy physicians. Its code of ethics is intended to furnish certain principles and rules of action for their guidance and convenience.

I. *The Relation of the Physician to Medical Science.* — A physician should lend his influence to encourage sound medical education, and to uphold in the community correct views of the powers and the limitations of medical science and art.

II. *The Relation of the Physician to Medical Business.*— The professional success of a practitioner depends upon qualities connected with his moral character, his scientific attainments, and also his industry and business talent. But the relation of practitioners of medicine to

families and households is not like that of tradesmen to their customers. The kind of competition which might be considered honorable in business cannot exist between physicians without diminishing their usefulness and lowering the standing of the medical profession. (See IV. § 1; V. § 1.)

III. *The Relation of the Physician to his Patients.*— The first duty of the practising physician is to his patient, who has a right to expect that his disease shall be thoroughly investigated and skilfully treated, with charitable consideration for his mental peculiarities or infirmities, and in a relation strictly confidential.

The physician should not make unnecessary visits. He should neither permit needless apprehension, nor fail to give seasonable notice of danger.

IV. *The Relation of the Physician to other Practitioners and to their Patients.* — In his relations with another medical practitioner and his patients, a physician should be governed by strict rules of honor and courtesy. His conduct should be such as, if universally imitated, would insure the mutual confidence of all medical practitioners.

The foregoing rule should be a sufficient guide of action. Some of the following contingencies will illustrate its application: —

1. A physician should take no step with a view directly or indirectly to divert to himself the patient or practice of another physician.

2. If formally requested to assume charge of a patient or family usually attended by another physician, he should consent to do so only after notifying the latter, — unless the case be one of pressing necessity.

3. If a physician is called to a patient during the temporary absence or illness of the usual physician, or in case of accident or other emergency, he should direct that the former be sent for as soon as he is able to take charge of the case, and should then relinquish it to him.

It is generally agreed that, among several physicians thus called, he who first arrives shall act, unless the family designate another.

4. A communication from the temporary to the usual physician, in the absence of the latter, should be written and sealed, and not simply verbal.

V. *The Relations of the Physician to Quackery.*— In every community there are minds naturally inclined to quackery, which has flourished in every age. It grows by being noticed, and thrives best under opposition. It is commonly unwise to employ argument against it. But a physician should lend his influence to establish a distinct line between the regular practice of medicine and the practice of quackery, and should avoid any act which might tend to weaken such a distinction either in the professional or in the public mind.

Thus, he should not consult with an irregular practitioner; nor countenance the use of secret remedies; nor be interested in medical trade-marked preparations; nor give certificates recommending mineral waters, patents, or medical preparations, or the like; nor give a commission to an apothecary, nor receive one from him; nor advertise himself or his practice in public print; nor publicly advertise advice or medicines to the poor, etc.

VI. *Consultations.*— Consultation should be encouraged in cases of unusual responsibility or doubt.

A consultation is called for the benefit of the patient, and to give him the advantage of collective skill. Should there be a difference of opinion, discussion should be temperate, and always confidential.

A consulting physician should be careful to say or do nothing to impair the confidence of the patient or his family in the attending physician.

1. See, for guidance of a consultant, IV. §§ 1, 2, 3, 4.

2. At a consultation, punctuality is important; and non-arrival within fifteen minutes after the appointed time should be interpreted as non-attendance.

3. For the advantage of the patient, and for economy of time, it is well in a consultation to observe a certain order of business. The following has been found convenient: —

The attending physician, having stated in general terms the nature of the case, may then call, in turn, upon each consultant, if there be more than one, to examine the patient, — the usual order being that of seniority. No consultant should make an examination or inquiry out of turn. On retiring, the attending physician may invite, in the usual order, the opinion of each consultant, who should not be interrupted while giving it; after which he may add his own. In conclusion a course of action may be agreed on, or the attending physician may be left to act at his own discretion.

VII. *Fees.* — A fee-table has a local application, and is designed to indicate a fair or average amount due for services. But if the patient fully understands it beforehand, a physician is at liberty to place any value he sees fit upon his services. It is then at the patient's option to decline them or to pay the price. A physician should be considerate of the poor.

A patient in moderate circumstances should not be called on to pay a fee unusually large for the service rendered, without a previous explicit understanding. A physician, if able, should offer to pay the medical attendant of himself or his family. Unless by special agreement, a physician attending or acting for another should receive the fees. Among obstetricians a rule obtains that the interval between the birth of the child and of the placenta halves the service and the fee. A fee should be charged for a medical certificate or paper of value to the applicant, — connected, for example, with absence or exemption, life insurance, pension papers, etc.; except the usual certificates of vaccination and death.

VIII. *Seniority.* — Seniority applies rather to duration of practice at the place in question, than to age.

Worcester District Medical Society.

The Society consists of Fellows of the Massachusetts Medical Society living in Auburn, Barre, Berlin, Blackstone, Bolton, Boylston, Brookfield, Charlton, Clinton, Dana, Douglas, Dudley, Grafton, Hardwick, Harvard, Holden, Hopedale, Hubbardston, Lancaster, Leicester, Mendon, Milford, Milbury, New Braintree, Northboro', Northbridge, North Brookfield, Oakham, Oxford, Paxton, Princeton, Rutland, Shrewsbury, Southboro', Southbridge, Spencer, Sterling, Sturbridge, Sutton, Upton, Uxbridge, Warren, Webster, Westboro', West Boylston, West Brookfield, and Worcester. The Society was organized as a district of the Massachusetts Medical Society, Sept. 26, 1804. The elements of this district organization had been in existence, under the name of Worcester Medical Society, since 1794.

The annual meeting is held on the second Wednesday of May, and other meetings on the second Wednesday of July, September, November, January, and March. Meetings are held in the library room of the Society, in the Worcester Public Library Building.

In 1845, the Hon. Daniel Waldo, of Worcester, gave the Society $6,000; and in 1851, Dr. Charles W. Wilder left it by his will $500; both gifts were without conditions. The income is now devoted to the increase of the library of the Society. The library of the Worcester District Medical Society was commenced in 1788, by the gift to the physicians of Worcester of "fifty pounds' value in books," by Dr. Elijah Dix, of Worcester. It now contains 10,000 volumes, with large yearly additions from the Waldo, Wilder, and Bliss Funds, which now amount to $9,000.

In 1859, Dr. John Green, a member of the Society, bequeathed to the city of Worcester his private library, and provided for its increase. It was incorporated as a free public library in February, 1860. The library of the city now contains about 14,000 volumes, and the Green Fund gives it an annual income of about $1,500.

Massachusetts Medico-Legal Society.

Organized July 9, 1877. Its purposes are to elevate the official character of the medical examiner, and to assist him in the discharge of his duties; to collect and utilize such facts as have a medico-legal value; to excite a general interest in the subject of forensic medicine, and to promote its successful cultivation.

The Society consists of regular and associate members. Regular members consist of such members of the Massachusetts Medical Society and of the Massachusetts Bar as shall be duly chosen in the manner provided by the by-laws, provided, however, that at least two-thirds of such regular members shall hold commissions as medical examiners in the State. The expiration, without renewal, of the

commission of a medical examiner terminates his regular membership.

The Society may also, at any stated meeting, elect to permanent associate membership such persons, versed in medical, legal, or technical science, as may be recommended by the proper committee.

The President, the Vice-President, the Treasurer, and the two Secretaries constitute an Executive Board, whose duty it is to carry out the purposes of the Society as expressed by its by-laws or its votes.

The business of the Society is managed and the expenses paid by the regular members. The associate members attend only those meetings to which they are invited, and then have full liberty to participate in all scientific or professional discussions, and to present communications. A fee of two dollars is paid by each regular member at the time of his admission; assessments are made from time to time, as required to meet the expenses of the Society.

The stated meetings are held on the same day and at the same place as the stated meetings of the Councillors of the Massachusetts Medical Society; the annual meeting being on the same day as the annual meeting of said Councillors. Special meetings may be called by authority of the Executive Board, and must be so called upon the written request of five regular members.

The Executive Board is required to use all the honorable means which they can command for the purpose of preventing the confirmation and appointment of any incompetent or unworthy person as medical examiner.

The Transactions of the Society are published annually.

Harvard Medical Alumni Association.

This Association is composed of the graduates of the Medical Department of Harvard University, and was organized April 30, 1891. It now numbers 1,114 members, of whom fifteen are honorary.

Members live in thirty-five different States of the United States, and eight live in foreign countries. All Harvard medical graduates are eligible to membership, and the object is to advance the cause of medical education, to promote the interest and increase the usefulness of the Harvard Medical School, and to promote acquaintance and good fellowship among the members of the Association.

Seven bulletins of the proceedings of the Association have been published, including two catalogues of members. One dollar is the initiation fee, and one dollar the annual assessment.

The annual meeting and dinner are held in Boston the day before the Harvard Commencement Day.

Wheeler, M.D., Burlington, Vt.; W. S. Whitwell, San Francisco, Cal.

Massachusetts Dental Society.

This organization was formed in May, 1864, and received an Act of incorporation from the Legislature in April, 1865. Its object is to cultivate the science and art of dentistry and all its collateral branches, by means of a library and museum, professional lectures and publications, and by premiums and medals for original researches and discoveries; to elevate and sustain the professional character of dentists; and to promote among them mutual improvement, social intercourse, and good-will.

It includes active, junior, corresponding, and honorary members. Active members consist of practitioners of dentistry living in the State of Massachusetts. They must be twenty-one years of age, of good moral character, and have received a diploma from a respectable medical or dental college. Junior members consist of students of dentistry, and dentists not eligible to active membership. Corresponding members consist of practitioners of dentistry living in other States of the Union, or in foreign countries, who manifest a disposition to advance the science and art of the profession by contributing to its literature.

Honorary memberships are conferred by the Society on distinguished members of the profession, and others who may merit the distinction.

The annual meeting of the Society is held in July, in such town or city as may be determined by the Society, and is of two days' continuance.

OFFICERS.

President. — J. K. Knight, Hyde Park, Mass.

Vice-Presidents. — G. A. Maxfield, Holyoke; W. E. Broadman, Boston.

Secretary. — E. O. Kinsman, D.D.S., Cambridge, Mass.

Treasurer. — Edward Page, M.D., D.M.D., Charlestown District, Boston.

New England Dental Society.

Organized in Lowell, Mass., as the Merrimac Valley Dental Association, Oct. 29, 1863, for the purpose of promoting the welfare of the dental profession; present name adopted in 1882. Any respectable dentist may become an active member who is a graduate of a recognized dental or medical college.

The annual meeting is held on the first Thursday of October. An annual assessment of one dollar is paid by each member.

OFFICERS.

President. — J. H. Daly, D.D.S., Boston, Mass.

Librarian. — J. K. Knight, D.D.S., Hyde Park, Mass.

Connecticut Valley Dental Society.

Organized in Springfield, Mass., Nov. 10, 1863. The Society holds its annual meeting in Springfield in October, and its semi-annual meeting in June in other places.

OFFICERS.

President. — W. H. Rider, Danbury, Conn.
Vice-Presidents. — W. O. Barrett, Ware, Mass.; C. C. Barker, Meriden, Conn.
Treasurer. — F. R. Rice, North Adams, Mass.
Secretary. — G. A. Maxfield, Holyoke, Mass.

Massachusetts College of Pharmacy.

Organized in February, 1823, and incorporated by the Legislature in 1852. The object of the College is to provide the means of a systematic education; to regulate the instruction of apprentices; to promote a spirit of phar-

maceutical investigation, and to diffuse information among the members of the profession; to discountenance the sale of spurious, adulterated, and inferior articles; to regulate the business, as far as practicable and consistent with our social institutions; to cherish habits of friendly intercourse; and in general to advance the character and interests of pharmacists.

Any adult person of correct deportment who shall have been actively engaged as a pharmacist, druggist, or manufacturer of pharmaceutical preparations for the term of four years, either as principal or clerk, may be admitted as an active member of this College. He must sign the by-laws of the College, and shall pay an annual contribution of five dollars so long as he shall continue an active member. The College furnishes regularly, to each active member, not in arrears, a copy of some pharmaceutical journal.

The stated meetings of the College are held at its building, corner of St. Botolph and Garrison streets, Boston, on the first Monday in June, September, December, and March, at three o'clock, P. M.

The Board of Trustees meet statedly on the first Monday of each month except the summer months, at three o'clock, P. M.

Massachusetts State Pharmaceutical Association.

Organized May 17, 1882, to unite all reputable druggists and apothecaries of the State for mutual encouragement and assistance, to improve the existing methods of pharmacy, and to restrict the practice of pharmacy to qualified druggists and apothecaries.

Any druggist or pharmacist or teacher of pharmacy in any of its departments, of good moral and professional standing, living in the State, is eligible for active membership. Chemists, scientists, or physicians are eligible to honorary membership.

OFFICERS.

President. — F. M. Harris, Worcester.

Vice-Presidents. — H. F. Rockwell, Fitchburg; C. F. Nixon, Leominster; W. F. Sawyer, Boston.

Treasurer. — T. B. Nichols, Salem.

Permanent Secretary. — M. L. H. Leavitt, Boston.

Massachusetts Medical Benevolent Society.

The organization of this Society dates from 1857; in 1871 it received an Act of incorporation from the Legislature of Massachusetts, and an additional Act was passed in its favor in 1892. It has for its object the relief of its members, or of their families, should they need assistance; and of such other members of the medical profession or their families as may be deemed by the Society suitable objects of its beneficence.

It includes in its list of members physicians from all parts of the State. The Council of the Society, to whom are intrusted the care of the funds and the distribution of its charities, are desirous of making the institution more widely useful, by extending its assistance to a larger number of beneficiaries. In order to widen the circle of their

charities, they desire to add largely to their numbers; and physicians who may be willing to aid a charity of such importance are invited to become its members. It is also desirable that cases of destitution among the members of the profession may be brought to the notice of the officers, so that measures may be at once taken for their relief.

The fee paid on entering the Society is five dollars; and the annual assessment is two dollars. The payment of twenty-five dollars at one time, or of the annual assessment for twenty successive years, constitutes one a life-member, and at his option relieves him from future payments. The donation of fifty dollars or more at one time entitles the donor to be inscribed among the benefactors of the Society. The invested funds of the Society are somewhat less than $30,000.

The annual meeting is held on the last Thursday in October of each year.

Massachusetts Emergency and Hygiene Association.

The Association is the outgrowth of a few lectures to the police under the auspices of the Women's Education

Association. Organized independently in 1883, it aims to provide instruction for both men and women in the elementary laws of hygiene, and to enable them to be of use in emergency cases pending the arrival of the doctor.

Lectures are given in Boston chiefly to the police and firemen, to the militia, to employees of all kinds, to clubs, and associations.

The emergency lectures include instruction in "first-aid" treatment in cases of wounds involving hemorrhage; of burns, scalds, and the like; of fractures, dislocations, etc., including methods of transportation of injured patients; also in the general principles of immediate treatment of the unconscious, as from drowning, suffocation from smoke, sunstroke, apoplexy, epilepsy, and those suffering from acute poisoning.

The hygiene and home-nursing lectures include elementary instruction in the care of the sick-room, the patient, etc., as well as the simpler hygienic and sanitary problems, such as of ventilation, cleanliness, dietetics, and the like.

In addition to the lectures above indicated the Association undertakes —

1. Instruction of women to be "attendants" in the care of convalescents, chronic invalids, and little children. Course, forty lessons; tuition, $10.00; also in the duties of nursery maids in regard to health. Course, twenty lessons; tuition, $4.00.

2. The care and amusement of children in a few of the city school-yards during the summer vacation. Attendance in 1894, — 82,551.

3. The supervision of the women's and children's division of Charlesbank, including the outdoor gymnasium. Attendance in 1894, — 145,392.

All communications should be addressed to the Chairman of the Executive Committee or to the Secretary.

Boston Medical Association.

A large number of the regular physicians of Boston are united in this Association, for the purpose of regulating the medical police of the city, and establishing the fee-table. It was organized in 1806, and in 1808 adopted certain principles of government, which remain to-day as the foundation of a code governing all regular practitioners established in the city.

The annual meeting of the Association is held at 19 Boylston Place, on the first Monday in May. Each member pays the sum of one dollar on joining the Association.

The code adopted in 1808 is given in full: —

Consultations should be encouraged in difficult and protracted cases, as they give rise to confidence, energy, and more enlarged views in practice. On such occasions no rivalship or jealousy should be indulged; candor, justice, and all due respect should be exercised toward the physician who first attended; and, as *he* may be presumed to be best acquainted with the patient and his family, he should deliver all the medical directions as agreed upon. It should be the province, however, of the senior consulting physician to propose the necessary questions to the sick.

The consulting physician is never to visit without the attending one, unless by the desire of the latter, or when, as in a sudden emergency, he is not to be found. No discussion of the case should take place before the patient or his friends; and no prognostications should be delivered which were not the result of previous deliberation and concurrence. Theoretical debates, indeed, should generally be avoided in consultation, as occasioning perplexity and the loss of time; for there may be much diversity of opinion on speculative points, with perfect agreement on those modes of practice which are founded, not on hypothesis, but on experience and observation. Physicians in consultations, whatever may be their private resentments or opinions of one another, should divest themselves of all partialities, and think of nothing but what will most effectually contribute to the relief of those under their care.

If a physician cannot lay his hand to his heart and say that his mind is perfectly open to conviction, from whatever quarter it may come, he should in honor decline the consultation.

All discussions and debates in consultations are to be held secret and confidential.

Many advantages may arise from two consulting together who are men of candor, and have mutual confidence in each other's honor. A remedy may occur to one which did not to another; and a physician may want resolution, or a confidence in his own opinion, to prescribe a powerful but precarious remedy, on which, however, the life of his patient may depend; in this case a concurrent opinion may fix his own. But when such mutual confidence is wanting, a consultation had better be declined, especially if there is reason to believe that sentiments delivered with openness are to be communicated abroad or

to the family concerned; and if, in consequence of this, either gentleman is to be made responsible for the event.

The utmost punctuality should be observed in consultation visits; and to avoid loss of time it will be expedient to establish the space of *fifteen minutes* as an allowance for delay, after which the meeting might be considered as postponed for a new appointment.

Interferences. — Medicine is a liberal profession; the practitioners are, or ought to be, men of education; and their expectations of business and employment should be founded on their degrees of qualification, not on artifice and insinuation. A certain undefinable species of assiduities and attentions, therefore, to families usually employing another, is to be considered as beneath the dignity of a regular practitioner, and as making a mere trade of a learned profession; and all officious interferences, in cases of sickness in such families, evince a meanness of disposition unbecoming the character of a physician or a gentleman. No meddling inquiries should be made concerning them, nor hints given relative to their nature and treatment, nor any selfish conduct pursued, that may, directly or indirectly, tend to weaken confidence in the physicians or surgeons who have the care of them.

When a physician is called to a patient who has been under the care of another gentleman of the Faculty, before any examination of the case, he should ascertain whether that gentleman understands that the patient is no longer under his care; and, unless this be the case, the second physician is not to assume the charge of the patient, nor to give his advice — excepting in instances of sudden attacks — without a regular consultation; and if such previously attending gentleman has been dismissed, or has voluntarily relinquished the patient, his practice should be treated with candor, and justified so far as pro-

bity and truth will permit; for the want of success in the primary treatment of the disorder is no impeachment of professional skill and knowledge.

It frequently happens that a physician, in incidental communications with the patients of others, or with their friends, may have their cases stated to him in so direct a manner as not to admit of his declining to pay attention to them. Under such circumstances his observations should be delivered with the most delicate propriety and reserve. He should not interfere in the curative plans pursued, and should even recommend a steady adherence to them, if they appear to merit approbation.

The *differences of physicians*, when they end in appeals to the public, generally hurt the contending parties; but, what is of more consequence, they discredit the profession and expose the Faculty itself to contempt and ridicule. Whenever such differences occur as may affect the honor and dignity of the profession, and cannot immediately be terminated, or do not come under the character of violation of the special rules of the Association otherwise provided for, they should be referred to the arbitration of a sufficient number of members of the Association, according to the nature of the dispute; but neither the subject-matter of such references, nor the adjudication, should, if it can be avoided, be communicated to the public, as they may be personally injurious to the individuals concerned, and can hardly fail to hurt the general credit of the Faculty.

Quackery[1] should be discouraged by the Faculty as dis-

[1] At a meeting of the Councillors of the Massachusetts Medical Society, held Feb. 3, 1858, the following resolutions were adopted: —

Resolved, That the Massachusetts Medical Society deem it dishonorable in its Fellows to append their names in any way recommendatory of

graceful to the profession, injurious to health, and often destructive even of life. No physician or surgeon, therefore, should dispense a secret nostrum, whether it be his invention or exclusive property; for if it is of real efficacy, the concealment of it is inconsistent with beneficence and professional liberality; and if mystery alone give it value and importance, such craft implies either disgraceful ignorance or fraudulent avarice.

The *esprit de corps* is a principle of action founded in human nature, and when duly regulated, is both rational and laudable. Every man who enters into a fraternity engages, by a tacit compact, not only to submit to the laws, but to promote the honor and interests of the Association, so far as they are consistent with morality and the general good of mankind A physician, therefore, should cautiously guard against whatever may injure the

secret or quack remedies, and any Fellow so exhibiting his name shall be considered as acting in a manner derogatory to the dignity of a Fellow of this Society.

Resolved, That if any physician or chemist, through inadvertence or misapprehension, shall have been induced to give his recommendation or authority in any way to promote the circulation or sale of any secret or empirical medicine, he shall be expected publicly to disclaim or revoke the same.

Resolved, That the Fellows of the Massachusetts Medical Society regard with disapprobation and abhorrence all attempts to procure abortion, except in cases where it may be necessary for the preservation of the mother's life.

Resolved, That when any Fellow of this Society shall become cognizant of any attempt unlawfully to procure abortion, either by persons in the profession or out of it, it shall be the duty of such Fellow immediately to lodge information with some proper legal officer, to the end that such information may lead to the exposure and conviction of the offender.

Resolved, That no person convicted of an attempt to procure criminal abortion can, consistently with its by-laws, any longer remain a Fellow of this Society.

general respectability of the profession, and should avoid all contumelious representations of the Faculty at large, all general charges against their selfishness or improbity, or the indulgence of an affected or jocular scepticism concerning the efficacy and utility of the healing art.

Fees. — General rules are adopted by the Faculty, in every town, relative to the pecuniary acknowledgments of their patients; and it should be deemed a point of honor to adhere to them; and every deviation from, or evasion of, these rules should be considered as meriting the indignation and contempt of the fraternity.

Gratuitous services to the poor are by no means prohibited; the characteristic beneficence of the profession is inconsistent with sordid views and avaricious rapacity. The poor of every description should be the objects of our peculiar care. Dr. Boerhaave used to say they were his best patients, because God was their paymaster.

It is obvious, also, that an average fee, as suited to the general rank of patients, must be an inadequate compensation from the rich (who often require attendance not absolutely necessary), and yet too large to be expected from that class of citizens who would feel a reluctance in calling for assistance without making some decent and satisfactory remuneration.

All members of the medical profession, together with their families, should be attended gratuitously; but visits should not be obtruded officiously, as such civility may give rise to embarrassments, or interfere with that choice on which confidence depends.

But distant members of the Faculty, when they request attendance, should be expected at least to defray the charges of travelling.

Omission to charge, on account of the wealthy circumstances of the physician, is an injury to the profession, as

it is defrauding, in a degree, the common funds for its support, when fees are dispensed with which might justly be claimed.

Vicarious Offices. — Whenever a physician officiates for another by his desire, in consequence of sickness or absence, if for a short time only, the attendance should be performed gratuitously as to the physician, and with the utmost delicacy towards the professional character of the gentleman previously connected with the patient.

Seniority. — A regular and academical education furnishes the only presumptive evidence of professional ability, and is so honorable and beneficial that it gives a just claim to pre-eminence among physicians at large, in proportion to the degree in which it may be enjoyed and improved. Nevertheless, as industry and talents may furnish exceptions to this general rule, and this method may be liable to difficulties in the application, seniority among practitioners of this town should be determined by the period of public and acknowledged practice as a physician or surgeon in the same. This arrangement, being clear and obvious, is adapted to remove all grounds of dispute among medical gentlemen; and it secures the regular continuance of the established order of precedency, which might otherwise be subject to troublesome interruptions by new settlers, perhaps not long stationary in the place.

Boylston Medical Society of Harvard University.

The Society was organized Jan. 6, 1811, for the purpose of promoting emulation and inquiry among the students at the Medical School connected with Harvard University. It received an Act of incorporation from the Legislature, June 13, 1823. The members are students of the School, and are elected at any meeting of the Society.

The meetings are held in the Library of the Medical School, at eight o'clock on Friday evenings during the first term, and at such times in the second term as the Society may decide. The President of the Society is a physician of regular standing, elected by the immediate members. The entrance fee is two dollars.

A printed catalogue of the society is issued once in three years.

The Society is in possession of a fund, the gift of the late Ward Nicholas Boylston, M.D., the income of which is appropriated to prizes in the manner more fully described in a later part of this book. In accordance with the terms of incorporation, seven trustees, who must be practising physicians, are annually appointed, who have the sole management and control of the permanent funds of the Society.

Organized in Middleboro', August 15, 1866.

Graduate Nurses' Association.

The Graduate Nurses' Association has been formed for the purpose of securing for its members, and through them for other graduate nurses, opportunities for instruction in their profession.

The object of the Association is therefore primarily an educational one; and its purpose is to provide instruction by means of lectures, and to secure for its members such opportunities for clinical observation as shall keep them in touch with the advances in nursing, and without which they have to rely upon their undergraduate hospital training and their subsequent personal experience in private practice.

Only trained nurses regularly graduated are eligible, and only those who earnestly wish to increase their ability to do good professional work are desirable for membership.

Lectures on subjects of interest are given before the Association at 19 Boylston Place, by physicians connected with the hospitals. The Association has a room for its use at 264 Boylston Street, where a small library and current medical journals can be seen and consulted.

Secretary. — Mrs. A. H. Porter, M.D., 226 Marlboro' Street.

Maine Medical Association.

A preliminary meeting was held at Brunswick, Maine, April 28, 1853, to organize an Association for professional improvement, the cultivation of friendly intercourse between its members, the faithful support of regular and honorable practice, and the promotion of medical science. The first annual meeting was held in Augusta on the first of the following June, when a board of permanent officers was chosen. The Association was incorporated by the Legislature in March, 1855.

Any person in good standing in the profession, a resident of the State of Maine, who is a graduate of any medical school legally entitled to grant diplomas, may become a member on the recommendation of two members, and certifying these requirements to the Board of Censors, and being elected by vote of the General Association, signing the by-laws, and paying the initiation fee of five dollars. Those members who have arrived at the age of seventy years, and have notified the Treasurer of the Association of the same in writing, having paid all their assessments, or having been excused from the same; also those members who by reason of ill health have been obliged to retire from the practice of the profession, — may become retired members. They retain all the privileges previously enjoyed, but do not pay assessments. Members whose dues have been paid or remitted may, on written application, be allowed to withdraw from the Association.

The Censors constitute a Board of Trial for the purpose of acting on any charges brought against a member, with the power to pass such sentence as in their judgment may seem just.

Twenty-five members of the Association constitute a quorum for the transaction of business.

The annual meeting is holden on such day in June, and in such place, as the Censors may determine; semi-annual or quarterly meetings may be called at any time by the President, upon application by ten or more members.

The annual assessment is two dollars. The Transactions of the Association, with the scientific papers read at the annual meeting, are published each year.

The county societies of Maine have no connection with the State Society.

New Hampshire Medical Society.

The New Hampshire Medical Society was incorporated in 1791, with the power to elect officers, examine and license candidates for the practice of medicine and surgery, and continue a body politic and corporate by the same name forever.

An organization was effected, and Dr. Josiah Bartlett was chosen the first President, the same year.

Any person who has received a medical degree at any school or university authorized to confer the same, or who has been duly licensed by the Censors of a regularly constituted medical society, and sustains a good moral character, having signified his wish to join the Society, may be proposed by the Council for membership, and voted for at any regular or special meeting of the Society (a majority of two thirds of the votes cast being necessary to constitute a choice); but his election shall be void unless he pay the initiation fee and subscribe to the by-laws and

regulations at or before the next annual meeting; which conditions it shall be the duty of the Secretary to communicate to each person, together with the notice of his election.

The annual meeting of the Society is held in Concord the last week in May.

The Council of the Society meets on the day preceding the annual meeting.

An initiation fee of three dollars, and two dollars dues, is paid by each member, and an annual assessment of two dollars thereafter.

Members who have reached the age of sixty years may, by permission of the Councillors, become retired members. They are entitled to all the privileges, and conform to all the requirements, of the Society; they are not liable to assessments, nor bound to accept any office in the Society.

The county societies receive their charters from the State Society.

Connecticut Medical Society.

Organized in 1791, and incorporated by the Legislature in 1825. The Society includes eight county associations, all of which are under the control of the parent society and constitute its local branches. They are known by the names of the counties in which they are situated, and each Association includes all members of the Connecticut Medical Society within its limits. Eminent physicians not living in the State may be elected to honorary membership.

Previous to 1793, Yale College conferred the honorary degree of Doctor of Medicine. From 1793 to 1813, inclusive, honorary degrees were conferred by the Connecticut Medical Society, in accordance with its charter; and during that time the honorary degree of Doctor of Medicine was not conferred by Yale College in any case, so far as can be ascertained. When the Medical College was organized and went into operation, the Medical Society, by agreement with Yale College, ceased to act independently in conferring degrees.

The charter of the Medical College, after providing for degrees to be conferred by examination, provided that "The President of the College may also confer the *honorary* degree of Doctor of Medicine upon those persons whom the President and Fellows of the Medical Society shall recommend for that purpose."

The superintendence and management of the Society are vested in a body known as the "President and Fellows of

the Connecticut Medical Society," consisting of the officers of the Society proper, for the time being, and of five members each from the Hartford, New Haven, New London, Fairfield, Windham, Litchfield, and Middlesex County societies, and three from Tolland.

Members are admitted through the County Associations. No one is admitted to membership unless he shall have received the decree of Doctor of Medicine, or have been admitted *ad eundem*, from such medical authorities as this Society shall deem proper to recognize. He must also live and practise in the county in which his application is made. All Honorary members have the privilege of attending the meetings of the President and Fellows, and enjoy all the privileges except that of voting.

A member of the Society who shall make, vend, or publicly recommend, or who is directly or indirectly interested in the manufacture, use, or sale of any nostrum or patent medicine, is ineligible to any office, and is liable to be suspended from the privileges of the Society, or to expulsion.

No member of the Society shall hold professional consultation or intercourse with any other than licensed physicians and surgeons in regular standing.

The annual meeting of the President and Fellows is held on the day preceding the Annual Convention of the Society, and in the same city where the Convention is held. The Convention is held on the Thursday following the fourth Wednesday in May, alternately at Hartford and New Haven. The annual meetings of the county associations are held at such times and places as may be agreed on by them, provided the annual meeting shall be at least four weeks before the fourth Wednesday in May.

The Proceedings of the Society are published annually. The annual assessment never exceeds five dollars.

The nomination to professorships in the Medical Institution of Yale College, since the year 1810, has been made by a joint committee of an equal number of persons appointed by the President and Fellows of Yale College and the President and Fellows of the Society; but all articles of agreement between the two organizations were annulled in 1884.

The Superintendent of the Retreat for the Insane has been nominated in like manner since 1823.

For the Third Year. — Obstetrics and Clinical Obstetrics, Theory and Practice of Medicine, Clinical Medicine, Surgery, Clinical Surgery, Dermatology, Diseases of the Nervous System, Diseases of Children, Mental Diseases, and Gynecology.

For the Fourth Year. — Clinical Medicine, Clinical Surgery, Clinical Microscopy, Genito-Urinary Surgery, Ovarian Tumors, Mental Diseases, Municipal Sanitation, Cookery, Ophthalmology, Otology, Laryngology, Orthopedics, Legal Medicine, and Syphilis; and, as elective studies, Ophthalmology, Otology, Orthopedics, Gynecology, Dermatology, Neurology, Bacteriology, Physiology, Chemistry, Hygiene, Operative Surgery, and Operative Obstetrics.

Besides the lectures, recitations, and demonstrations, thorough practical work in the large, well-equipped laboratories of the School is required of all students in Anatomy, Physiology, Pathology, Urine Analysis, Toxicology, Histology and Bacteriology, and is open to students in Hygiene and Pharmacology. Students who are fitted are aided and encouraged to undertake advanced or original work in these laboratories.

The subjects of Clinical Medicine, Surgery, Theory and Practice, and the various specialties, are thoroughly illustrated and largely taught by means of the unsurpassed clinical facilities afforded in the various hospitals of the city of Boston; namely, Massachusetts General Hospital, Boston City Hospital, Boston Lying-in Hospital, Boston Dispensary, Massachusetts Eye and Ear Infirmary, Free Hospital for Women, Children's Hospital, Carney Hospital, McLean Hospital (for the Insane), and Boston Lunatic Hospital.

Instructors in the Medical School are members of the medical and surgical staffs of these institutions, and students are admitted to all of them under their immediate supervision.

There are annually treated in these hospitals over 15,000 ward patients, and upwards of 100,000 out-patients.

There are more than sixty appointments annually for internes in the various hospitals, and nearly as many more for assistants in the out-patient departments.

EXAMINATIONS.

The regular examinations are conducted in writing and orally, and are (with a few exceptions) held at the end of each year in June, and during the opening week in September, on the studies of the preceding year. In some branches a portion of the examination consists of practical work in the laboratory.

First Year. — Anatomy (2 hrs.), Physiology (3 hrs.), Histology (1 hr.), Medical Chemistry (1½ hr.), Bacteriology (1 hr.).

Second Year. — Advanced Anatomy (2 hrs.), Pathological Anatomy (3 hrs.), Clinical Chemistry (2 hrs.), Materia Medica and Therapeutics (2 hrs.).

Third Year. — Theory and Practice (3 hrs.), Surgery

(3 hrs.), Obstetrics (3 hrs.), Pediatrics (2 hrs.), Dermatology (1 hr.), Neurology (1 hr.), Gynecology (1 hr.), Mental Diseases (1 hr.).

Fourth Year. — Clinical Medicine (3 hrs.), Clinical Surgery (2 hrs.), Orthopedics (1 hr.), Ophthalmology (1 hr.), Otology (1 hr.), Laryngology (1 hr.), Legal Medicine (1 hr.), Syphilis (1 hr.).

Electives. — Gynecology (2 hrs.), Dermatology (2 hrs.), Neurology (2 hrs.), Ophthalmology (2 hrs.), Otology (2 hrs.), Orthopedic Surgery (2 hrs.), Physiology (1 hr.), Chemistry (1 hr.), Operative Surgery (1 hr.), Operative Obstetrics (1 hr.), Bacteriology (1 hr.), Hygiene (1 hr.)

In addition to the above examinations each student is required to present a satisfactory report of the analysis of a specimen of urine, to examine and report upon a clinical case in Medicine and Surgery, and to take charge of and report upon six cases in Obstetrics; each student must also have dissected the three parts of the body to the satisfaction of the Demonstrator. In the fourth year, at least three hours of examination in electives are obligatory.

Requirements for a Degree. — Every candidate must be twenty-one years of age, and of good moral character; must give evidence of having studied in a recognized medical school at least four full years; have spent at least one continuous year at this School; and have passed the required examinations.

At the end of the four years of study the degree of Doctor of Medicine will be given to those students who have fulfilled its requirements. This degree *cum laude* will be given to candidates who have obtained an average of over seventy-five per cent in all the required examinations.

Fees and Expenses. — For matriculation, five dollars; for the first three years, two hundred dollars for each year;

for a half year alone, one hundred and twenty dollars; the fee for the full year to all students entitled to be classified as fourth-year students and who have been regular members of the School for three full years, will be one hundred dollars; for graduation, thirty dollars. During the first two years there are the following additional expenses: Two dollars for each of the three parts required for dissection; and four dollars per year for chemical material, in addition to the charge for breakage of glass apparatus. A deposit of fifteen dollars is required to cover these charges for chemical material and breakage. The balance of this deposit is returned at the end of the year. A deposit of two dollars with the Dean will entitle a student to the use of a locker in the School building. A student who wishes to rent a microscope of the School can do so upon payment of three dollars a term.

Pecuniary Aid. — Bullard Fellowships of an annual value of two hundred and twenty-five dollars each may be assigned by the Faculty to any student or physician who shall make useful original investigations in medical science. There are twelve established scholarships of values from one hundred dollars to three hundred dollars, which the Faculty may assign to deserving students.

COURSES OF STUDY FOR GRADUATES.

Courses are arranged for graduates covering practically the entire term, from October to May inclusive, in the following subjects: Anatomy, Embryology, and Histology, Physiology, Medical Chemistry, Pathology, Clinical Medicine, Surgery, Obstetrics, Dermatology, Otology, Ophthalmology, Gynecology, Laryngology, Mental Diseases, Bacteriology, Diseases of Children, Neurology, Legal Medicine, and Hygiene.

It is designed to supply those opportunities for clinical

and laboratory study which have hitherto been sought in Europe by young graduates and practitioners. Instruction in the graduate courses is entirely distinct from that of the undergraduate department of the School, with but few exceptions; but students of the former will be admitted also to all the regular lectures (not clinical) of the latter without extra charge during their connection with the School. Instruction will be conducted in small classes and under the personal direction of the heads of departments. Instruction will be given throughout the academic year, October to June.

The special fees in the graduate department will be apportioned on a basis of twenty-five dollars for twenty-four exercises.

An extra fee is required for the use of material in laboratory, dissecting, and operative courses. All fees are payable in advance to the Secretary of the Medical School.

A graduate of another medical school may obtain the degree of M.D. at this University, after a year's study in the graduates' course and after passing the required examinations, which may be taken at such times as shall be agreed upon by the examiners and the graduate student.

The fees for the separate courses in the several departments vary with the courses.

Fee for two months' attendance upon all the courses, one hundred dollars; four months, one hundred and fifty dollars; attendance throughout the academic year, two hundred dollars.

SUMMER COURSES.

Special summer courses, utilizing the laboratory and clinical facilities of the School, are arranged to begin about July 1.

For further information address the Dean or Secretary, Harvard Medical School, Boston.

Tufts College Medical School.

The School was organized in 1893, and offers medical instruction to students of both sexes.

The Course of Study consists of a three years' graded course of didactic and clinical lectures and recitations upon the different subjects of medical science, illustrated by charts, plates, drawings, and dissections. These will be supplemented by individual work in the laboratories and dissecting-room, thus requiring the student to become familiar with the various phenomena met with in practice.

Applicants for admission must be of good moral character, and unless they have previously matriculated in some accredited medical college or are graduates of a reputable college, high or normal school, or of an institution of a

similar grade, must pass an examination upon the branches of an English education, including Mathematics, Composition, and Elementary Physics.

Such entrance examinations will not be required of students who have matriculated in a regular medical school requiring a similar examination, nor of students who have passed the entrance examination required by the Regents of the State of New York, or similar constituted authority in other States; nor of students, matriculates, or graduates of reputable colleges of literature, science, and the arts, or graduates of high schools of the first grade, or of State normal schools.

Candidates for graduation must be twenty-one years of age, must have studied medicine three full years, attended three courses of medical lectures, the last at this College, dissected one full course, and passed all of the required examinations.

Graduates of other medical colleges, in good standing, can obtain the degree by attending one full course of lectures, and passing the examinations of the senior year.

It is understood that attendance upon a course of lectures requires actual presence at a majority of the exercises of each term.

Fees. — Matriculation fee, five dollars; demonstrator's fee, five dollars; laboratory fee, five dollars; general lecture ticket, ninety dollars; graduation fee, thirty dollars; ticket admitting to the three years' lectures (when paid in advance) two hundred and fifty dollars; instruction in a single branch, forty dollars; fee for graduate instruction, fifty dollars; dissecting material at cost.

The session commences on the first Wednesday in October, and continues until the first Wednesday in June.

College of Physicians and Surgeons.

517 *Shawmut Avenue, Boston, Mass.*

Incorporated in 1880, with power to confer the degree of Doctor of Medicine. Women are admitted. The plan of this institution comprises a three-years graded course upon the essential branches of medicine: First year, Anatomy, Physiology, and General Chemistry; second year, Materia Medica and Therapeutics, Pathology, and Medical Chemistry; third year, Obstetrics, Theory and Practice and Surgery.

The entrance examination takes place on the third Wednesday in September, and the regular session begins the next day.

Fees. — Matriculation, yearly, five dollars; full course of lectures, one hundred dollars; diploma fee, thirty dollars; three courses of lectures (cash in advance), two hundred and seventy-five dollars.

For further information, address Rev. David Shurtleff, Dean, 517 Shawmut Avenue.

Normal School of Physical Training and Sanatory Gymnasium.

Cambridge, Mass.

The objects of this School are to drill young women in the theory and practice of Physical Training in its broadest acceptation, and prepare them to teach in this branch of education. No rigid system is adhered to; in the opinion of the Director, the condition of the individual determines the selection, time, and amount of exercise, and the student is taught the value of all movements and efforts, according to the most approved anatomical and physiological tests, and shown how to apply them for the improvement of the individual. This method involves a careful study of the normal standard, and the variations therefrom, for each class, sex, and age, and a familiarity with a great variety of exercises in order to meet the wants of different conditions.

Special Treatment. — In addition to these objects, which are mainly for the education of the teacher, the School aims

to furnish a course of carefully prescribed exercises, under personal supervision, to those who are in poor health and in need of special treatment; to provide a system of recreative and developing exercises for those who wish to build up their physique and keep themselves in vigorous condition; and to furnish a series of æsthetic movements as a means of attaining poise, grace, and suppleness.

Students entering the Normal Course should be at least eighteen years of age, have good health, and a high-school education or its equivalent.

The Gymnasium is under the general direction of Dr. D. A. Sargent, who prescribes the work of the course, advises as to the best treatment of individual cases, and gives lectures and special instruction to the students of the Normal Class in Anatomy, Anthropometry, and the General Theory and Practice of Physical Training.

He is assisted by the following instructors: —

Physiology and Emergencies. — G. W. Fitz, M.D.
Physics. — J. Y. Bergen, Jr., A.M.
Superintendent, General Gymnastics. — Jennie B. Wilson.
Heavy Gymnastics. — Christian Eberhard.
Fencing. — F. W. Lister.
Swedish and Special Gymnastics. — Caroline E. Crawford.
Æsthetics and Voice Training. — Eva G. May.
Assistant in Physiology. — Helen P. Howell.
Accompanist. — Katherine T. Purcell.

Boston Polyclinic.

Organized in 1880. The Polyclinic provides clinical instruction in all branches of medicine and surgery for post-graduates and for students of medicine. The courses last from four to six weeks, and the classes are limited in numbers. The fees must be paid in advance. Names may be registered with, and all information will be furnished by H. L. Smith, M.D., Dean, 156 Newbury Street, Boston.

Dental Department of Harvard University.

North Grove Street, Boston, Mass.

Instruction in this School is given throughout the academic year, by lectures, recitations, clinical teaching, and practical exercises, uniformly distributed. The year begins on the Thursday following the last Wednesday in September, and ends on the last Wednesday in June. The course of instruction is progressive, and extends over three years, the teaching of one year not being repeated in the next.

The first year is identical with that of the Harvard Medical School, the student receiving the same instruction by the same professors, at the same time and place, with the medical students, and at the end of the year passing with them the same examinations.

It is the object of the Faculty to present a complete course of instruction in the theory and practice of Dentistry; and for this purpose a well-appointed laboratory and infirmary are provided, and such arrangements made as to insure an ample supply of patients. Clinical instruction is given by the professors and other instructors; and, under the direction of demonstrators, patients are assigned to the students, securing to all opportunity of operating at the chair, and becoming by actual practice familiar with all the operations demanded of the dentist.

The Infirmary remains open, and one of the Clinical Instructors and the Demonstrator are in attendance, daily, throughout the academic year.

Students have access to the hospitals of the city; to the dissecting-room and museum of the Medical College; and also, without additional charge, to the instruction and examinations given in any other department of the University with the exception of exercises carried on in the special laboratories.

Requirements for Admission. — All candidates for admission, except those who have passed an examination for admission to Harvard College, or the Lawrence Scientific School, must present a degree in Letters, Science, or Medicine, from a recognized college or scientific school, or pass an examination in English and Physics, and in one of the following subjects; namely, Latin, French, German, the Elements of Algebra, or Plane Geometry.

The examination for admission is held at the Dental School in North Grove Street, Boston, on the Monday preceding the last Wednesday in September, beginning at 10 A. M. No person will be examined for admission at any other than the regularly appointed time.

Students may be admitted to advanced standing upon passing a satisfactory examination in a *majority* of the studies already pursued by the class. Graduates of recognized dental schools are admitted without examination to the courses of Operative and Mechanical Dentistry.

The entrance and first-year examinations will be allowed to foreign students who have passed *equivalent* examinations abroad, upon presentation of proper certificates from the examining boards vouching for the facts.

The diploma is accepted by the English Board of Registration under the new Dental Act, so that graduates of

this School, not British subjects, can practise Dentistry in Great Britain without further examination.

All persons intending to take the entrance examination must send their names to the Dean for registry at least two weeks previous to the day on which the examination is to take place.

The course of instruction includes lectures, demonstrations, and practical exercises in Anatomy, Physiology, Chemistry, Surgery, Surgical Pathology, Operative Dentistry, Oral Anatomy, and Physiology, Dental Pathology, Dental Materia Medica and Therapeutics, and Mechanical Dentistry.

Examinations. — The regular examinations, conducted in writing and orally, are held at the end of each year in June in the following order, namely: —

At the end of the first year in Anatomy, including Dissection, Physiology, General Chemistry, and Materia Medica.

At the end of the second year, in Oral Anatomy and Physiology, Dental Pathology, Dental Materia Medica and Therapeutics, Oral Surgery and Surgical Pathology, Operative and Mechanical Dentistry, except that no student shall take the examinations in Operative and Mechanical Dentistry till the year of his graduation. The examinations in Operative and Mechanical Dentistry will include actual operations performed during the year, and the preparation of specimens of Mechanical Dentistry.

Examinations for advanced standing, on the studies of the preceding year, are held a week before the opening of the School in September.

Requirements for the Degree. — The degree of Doctor of Dental Medicine (*Dentariæ Medicinæ Doctor*) may be conferred on each candidate of adult age, and of good moral character; who must give evidence of having studied

medicine or dentistry three full years, at least one continuous year of which must have been spent at this School. He must also have passed *all the required examinations*, and convinced the Professors of Operative and Mechanical Dentistry of his ability to meet satisfactorily the requirements of his art.

He must also deposit with the Dean, to be placed in the Museum of the School, a specimen of Mechanical Dentistry, or of Practical or Pathological Anatomy prepared during the course under the eye of the instructor.

Admission to advanced standing does not diminish the time (three years) to be spent in professional studies.

Fees. — For the first year the fee is two hundred dollars, in two payments of one hundred and twenty dollars and eighty dollars, at the beginning of each term; for the second year, one hundred and fifty dollars, in two payments of one hundred dollars and fifty dollars, payable at the beginning of each term; for any subsequent year, fifty dollars, payable at the beginning of the year. Fees must be paid in advance or a satisfactory bond given.

Graduates of recognized dental schools will be admitted to the courses of Operative and Mechanical Dentistry, for the whole or any portion of the academic year, on payment of fifty dollars for each course.

Boston Dental College.

563 *Tremont Street, Boston, Mass.*

Incorporated June 3, 1868. It is authorized by the Legislature to confer the degree of Doctor of Dental Surgery. The College pupilage is continuous over three years of nine months each.

Requirements for Admission. — Candidates for admission must pass a preliminary examination in reference to their preparatory education. They must bring a certificate of the period of their professional study.

The examinations for admission are held the second Mon-

day in June and the second Monday in September, beginning at 10 A. M.

Students who began their professional studies elsewhere may be admitted to advanced standing; but all persons who apply for admission to the advanced classes must pass an examination in the branches already pursued by the class to which they seek admission, or furnish satisfactory certificates of the time spent in professional study.

Students of the Freshman class devote themselves to the study of Anatomy, Mechanical Dentistry, Clinical Dentistry, Materia Medica, Physics, Dissection, Carving, and other elementary branches.

The course during the Junior year comprises Chemistry, Histology, Anatomy, Therapeutics, Operative, Clinical, and Mechanical Dentistry.

In the Senior year, students attend lectures on Surgery, Surgical Pathology, Chemistry, Physiology, Pathology, Microscopy and Dental Histology, Operative, Clinical, and Mechanical Dentistry.

The year begins on the second Monday in September, and ends on the third Wednesday in June. Two or more lectures are given to each class each week-day, except Saturday.

The College is furnished with all the necessary and most approved modern appliances requisite for dental instruction. In the same building is the Infirmary, which is open daily from nine to two except during the months of July and August, where every character of dental operation will be performed and demonstrated, and opportunities given for the student to operate. Anæsthetics are given only on Thursday.

The students of the College are permitted to visit the wards of the Massachusetts General and City Hospitals and the Boston Dispensary.

Requirements for Graduation. — Each candidate for a degree must have attended three full courses of study at a reputable dental or medical college, one at least at this College. He must maintain a thesis on some subject approved by the Faculty. He must undergo an examination to the satisfaction of the Faculty, and must satisfy the Professors of Operative and of Mechanical Dentistry of his ability to meet satisfactorily the requirements of his art. He is also required to deposit with the Dean of the Faculty a satisfactory specimen of Mechanical Dentistry, prepared during the course under the supervision of the Professor of Dental Art and Mechanism.

Fees. — Matriculation fee (paid but once), five dollars; full course, for each year, one hundred dollars; demonstrator's ticket (anatomy), ten dollars.

Payment to be made when students matriculate.

Other information regarding the College will be given by the Dean, J. A. Follett, M.D., 637 Dudley Street, Boston, Mass.

School of Pharmacy of the Massachusetts College of Pharmacy.

The lectures of the School of Pharmacy, under the control of the College of Pharmacy, are delivered during the winter season at the College building, St. Botolph and Garrison streets, Boston. The regular course of instruction begins the third week in September, and ends on the third week in May of each year.

The course comprises theoretical and practical instruction by means of lectures, experiments, specimens, models, and diagrams in the departments of General, Pharmaceutical, and Analytical Chemistry, Botany, Toxicology, and Materia Medica, and Theory and Practice of Pharmacy, with practical laboratory work in Pharmacy and Chemistry, and recitations in each of the departments.

Elective courses are offered in addition in Micro-Chemical Examination of Drugs, Analysis of Urine, Qualitative and Quantitative Analysis, and Bacteriology.

The College library, known as the S. A. D. Sheppard library, is one of the largest pharmaceutical libraries in the world, and is accessible to all students. All the current pharmaceutical journals are regularly received.

No regular student will be admitted to the course who does not pass a preliminary examination or present in its place a diploma of graduation from a high school; special students not expecting a degree will be received as heretofore. The preliminary examination is held on the third Wednesday in September.

Every person upon whom the diploma of Graduate in Pharmacy of this College shall be conferred must be of good moral character, must have arrived at the age of twenty-one years, have attended two courses of each of the lectures delivered in the College, or the senior course in this College after one course in some other recognized College of Pharmacy, and have gained at the least sixty per cent in each branch at the general examinations; he must have served an apprenticeship of at least four years with some qualified dispensing pharmacist or pharmacists, of which fact he must produce satisfactory evidence to the Board of Examiners. He must also produce an original dissertation or thesis, in his own handwriting, upon some subject of Pharmacy, Materia Medica, Botany, Chemistry, or one of the branches of science closely connected therewith. The regular examinations for the degree take place in May.

Medical students and others who are not looking forward to pharmacy as their calling will be admitted to the lectures in any of the departments they may wish. Such persons will be ineligible to the degree, but will in other respects have the same advantages as regular students of pharmacy.

Fees. — For each professor's ticket, twenty dollars; matriculation ticket, five dollars; diploma fee, ten dollars. Special courses, each fifteen dollars.

The laboratories of the Massachusetts College of Pharmacy are open for the instruction of special students of either sex and any age.

School of Veterinary Medicine of Harvard University.

The academic year begins on the Thursday following the last Wednesday in September, and ends on the last Wednesday in June.

Division of Studies, for the First Year. — Anatomy, Physiology, General Chemistry, and Botany.

For the Second Year. — Advanced Anatomy, Practical Anatomy, Medical Chemistry, Materia Medica, Pathological Anatomy, Surgical Pathology, Therapeutics, Theory and Practice of Veterinary Medicine, Clinical Medicine, and Clinical Surgery.

For the Third Year. — Obstetrics, Theory and Practice of Veterinary Medicine, Bovine Pathology, Clinical Medicine, Operative Veterinary Surgery, Clinical Surgery,

Ophthalmology, Parasites and Parasitic Diseases, Warranty and Evidence.

A fully equipped veterinary establishment has been provided, which with its other facilities makes this School one of large resources for students who wish to become thoroughly practical as well as scientific veterinarians.

Adjoining the Hospital and connected with it, another building contains boxes and stalls for horses, a lecture-room, in which a separate desk is provided for each student, the dissecting-room, a students' reading-room comfortably furnished, the library, to which the members of all the classes have access, and the Museum.

Forge. — The forge is used for the shoeing of both sound and lame horses. The theory of orthopedic shoeing will be taught, as well as that of shoeing sound animals. It will be possible also for those students who desire it to procure a course in practical horse-shoeing.

Methods of Instruction. — In all departments, cases will be placed under the care of the senior students, who will act in regular order as visitors and dressers, to keep a full record of all work done, and report the same to the class for criticism. In the same way it is expected that students will do the work of mixing and dispensing medicines in the pharmacy, that they may thus become thoroughly competent veterinary pharmacists.

A thorough drill will be given at the hospitals in the various methods of restraining animals during operation, in the application of bandages, and the administration of medicine, as well as in the common methods of approaching and handling animals.

Practice in the examination of horses for soundness will be given frequently during the last two years of the course, and students will be required to write certificates

of such examinations and to present them before the class for criticism.

Two scholarships for needy and meritorious students have been established, of the value of one hundred and fifty dollars a year each.

Every candidate for the degree of Doctor of Veterinary Medicine must be twenty-one years of age, and of good moral character; must give evidence of having studied Veterinary Medicine three full years; have spent at least one continuous year at this school; have presented a satisfactory thesis; and have passed the required examinations.

Fees. — For a year, one hundred and fifty dollars; for a half-year alone, sixty dollars.

Bowdoin College — Medical School of Maine.

Brunswick, Me.

The Medical School of Maine, by an Act of the Legislature, is placed under the superintendence and direction of the Board of Trustees and Overseers of Bowdoin College. By their joint authority the degree of M.D. is conferred.

Instruction is given at Brunswick, and the term commences on the second Thursday in January, and continues twenty-four weeks.

Candidates for matriculation are examined in English Composition, Natural Philosophy, and Mathematics, excepting those who are graduates of Colleges, Normal Schools, or High Schools.

The anatomical cabinet was purchased in Paris, and many of the preparations were there made under the direction of the late Professor Thillaye. It has been recently thoroughly rearranged, and enriched by valuable purchases abroad. A new laboratory has been furnished for special courses in Analytical Chemistry, Urinary Analysis, and Toxicology.

Fees payable in advance, and by cash only, are seventy-eight dollars. Matriculation fee, payable each term, five dollars. Pupils who have attended three full courses of

medical lectures, two of which have been in this school, are admitted to all subsequent courses without payment of any lecture fees. Students who have attended two full courses at other regular medical institutions are required to pay fifty dollars for admission to their first course of lectures at this school, in addition to the matriculation fee. The graduation fee, including the diploma, is twenty-five dollars.

Members of the medical profession are invited to attend the lectures at any time. Graduates of other schools, who have been engaged three years in the regular practice of medicine, may receive a general ticket upon presentation of their diplomas and payment of the matriculation fee.

Examinations and Graduation. — Students, and particularly candidates for a degree, are examined at least twice each week on the subjects of the lectures.

Examinations will be held at the end of the *first* year of study, — in Anatomy, upon histology, the anatomy of the skeleton, and the viscera; in Physiology, upon the functions of nutrition and reproduction; in Chemistry, upon the instruction given in lectures and recitations.

At the end of the *second* year, examinations will be held in Anatomy upon the remainder of descriptive anatomy and topographical anatomy; in Physiology, upon the functions of relation; in Chemistry, upon laboratory work in analytical and medical chemistry.

Final examination will be held in Obstetrics at the end of two years of study.

Final examinations in Anatomy are conditional upon the dissection and demonstration of two parts and the completion of two full years of study.

Final examinations may be taken in Physiology and Chemistry at the end of the first year, upon presentation of certificate of two years of study, or of having pursued

approved courses in those branches in a reputable college or technical school.

The candidates must be twenty-one years of age, and must have devoted three years to their professional studies under the direction of a regular practitioner of medicine. They must have attended three full courses of lectures in some regular incorporated medical institution; and the last course previous to examination must have been at this School. Fifteen months' time must elapse between the beginning of a student's first course of lectures and his graduation. Candidates must deposit with the Secretary of the Faculty satisfactory certificates of good moral character, and of having pursued their medical studies for the required term. They must pass a satisfactory written and oral examination in Anatomy, Physiology, Surgery, Chemistry, Materia Medica, Pharmacy, Obstetrics, Pathology, and Practice. They must also present a thesis or dissertation on some medical subject.

Other information will be given by Alfred Mitchell, M.D., Secretary, Brunswick, Me.

Portland School for Medical Instruction.

188 *Middle Street, Portland, Me.*

The School was organized in 1858. Systematic recitations are held in the departments of Anatomy, Materia Medica, and Therapeutics, Surgery, Theory and Practice of Medicine, Obstetrics, and Chemistry. Lectures and demonstrations are given in the course of the year, on the physical exploration of the chest, and diseases of the heart and lungs, minor and operative surgery, on the diseases of women, physiology, the art of prescribing, and the application of bandages and surgical dressings. Clinical instruction is afforded the students at the Maine General Hospital by the physicians and surgeons at that institution, at the Portland Dispensary, the Greely Hospital, and the United States Marine Hospital. Cases of midwifery are furnished to advanced students as far as possible.

Applicants are required to satisfy the instructors that they are possessed not only of a good common-school education, but also of such a familiarity with the Latin language as may be acquired by the study of Harkness's Introductory Latin Book, and of a knowledge of Physics equal to that which may be got from Norton's Elements of Natural Philosophy. The fact of graduation from a college, or from a high school or academy whose curriculum requires the study of these books, or their equivalent, will be taken as sufficient evidence of these acquirements; but in the absence of such evidence a written examination will be held, in which the orthography and syntax will be taken into account.

Students have access at all times to the anatomical and pathological museum connected with the School, which

contains many valuable specimens, and is rapidly increasing in size and importance.

There are two terms in each year: a summer term of eleven weeks, commencing early in July, and ending the last of September; and a winter term also of eleven weeks, beginning in the early part of October, and closing the last of December, — thus allowing students to attend the spring course of lectures in the Medical School of Maine. The plan of study is so arranged as to cover the whole field in the two terms which constitute the year.

Fees, for the year, fifty dollars; for the summer term alone, thirty dollars; for the winter term alone, thirty-five dollars; demonstrator's ticket (including material for dissection), eight dollars. Students attending the School for half a term or less will be charged for half a term. All fees are payable invariably in advance.

Medical Department of Dartmouth College.

Hanover, N.H.

The Dartmouth Medical College dates its origin from the establishment, in 1798, of a professorship of medicine

by the trustees of the College, Dr. Nathan Smith being elected to fill the chair.

The lecture-course of this Institution commences on the 15th of July, and continues twenty weeks. Six lectures are delivered daily, except Saturdays. Medical instruction is further given by daily recitations, commencing early in January, and continuing till the last of June. Students are classified according to their advancement in their studies, and take up in regular order the different branches of medicine. They are admitted to the public courses of lectures in the academical department of the College. They have access to the various museums of the institution. They also have the privilege of the College library on the same terms with students in the other departments of the College.

Applicants for admission must be eighteen years of age and unless already matriculants of some regular medical college, or graduates of some reputable college, academy, or high school, will be examined as to their fitness for entering upon and appreciating the technical study of medicine. They will be expected to be familiar with the elementary principles of Physics (light, heat, electricity, etc.) on entrance.

Examinations and Graduation. — At the end of one full year of the study of medicine and one course of lectures in this School, an examination will be required in Descriptive Anatomy, Physiology, and Chemistry. At the end of two full years of the study of medicine and two courses of lectures, at least one in this School, an examination will be required in Descriptive and Regional Anatomy, and further examinations in Physiology and Chemistry. The examinations thus taken, if satisfactory, shall stand as final.

The fee for the first examination is five dollars; for the

second examination it is ten dollars. These sums will be deducted from the graduation fee at the final examination. Certificates of examinations passed at other colleges are not accepted in place of our own examinations for a degree.

Every candidate for the degree of Doctor of Medicine must be twenty-one years of age, and must give satisfactory evidence of good moral character. He shall have attended three full courses of lectures on all the branches of medical science, at some regular medical school, one of which shall have been at this institution. He shall give satisfactory evidence that he has devoted four full years to his professional studies, under the direction of some regular practitioner, — the time spent at lectures being included. He shall present evidence that he has dissected all parts of the cadaver, and shall pass a satisfactory written examination in Anatomy, Physiology, Surgery, Obstetrics, Therapeutics, Chemistry, Gynecology, and Practice. No thesis will be required. Possession of the degree of B.A., B.L., or B.S. will be accepted in place of one year of professional study. Three full years spent in medical study in this School will be accepted in place of four full years with a practitioner elsewhere.

Final examinations (oral), by Delegates from the New Hampshire and Vermont Medical Societies, occur on Monday and Tuesday of the week in which the Lecture Term closes in November, and on Monday, June 24, 1895.

Fees. — Matriculation (paid annually), five dollars; for the first and second courses of lectures, seventy-seven dollars each, and for the third course, fifty dollars; examination fee (not returnable), twenty-five dollars; chemicals and ordinary breakage, two dollars. Students who have attended two courses, one of them at this institution, may attend the third on payment of the matriculation fee and

fifty dollars; of those who have attended two courses at any other regular institution, seventy-seven dollars will be required in addition to the matriculation fee. For recitations for the term, forty dollars.

Anatomical material at cost.

University of Vermont. — Medical Department.

Burlington, Vt.

The Medical Department of the University and State Agricultural College was chartered by the State in 1823. It was organized on the present basis in 1854.

The plan of instruction adopted by this Institution consists of a course of lectures in Anatomy, Physiology, Chemistry, Materia Medica and Therapeutics, Surgery,

Obstetrics, and the Theory and Practice of Medicine, with lectures upon special subjects, by non-resident instructors, eminent in their several branches.

The College now occupies its new building, erected in 1884, the gift of John P. Howard of Burlington. Clinical instruction is given in the Mary Fletcher Hospital.

The regular course of lectures commences on the last Thursday of January, and continues six months. This course consists of from five to six lectures daily. Clinics in the various branches of medicine and surgery are held during the regular term.

Requirements for Graduation. — Candidates for the degree of Doctor of Medicine must have attended three full courses of lectures, the last in this College. They must have studied medicine three years, under the direction of a regular physician or surgeon, and have attained the age of twenty-one years.

Each candidate is required to deposit his graduation fee with the Secretary of the Faculty one month before the close of the session. Full certificates of the time of study, of age, and of moral character, must also be furnished. They must also pass a satisfactory examination before the Medical Faculty and Board of Medical Examiners, appointed by the State Medical Society. No thesis is required.

The tickets and diplomas of eclectic, homœopathic, or botanic colleges, or of colleges devoted to any special system of medicine, are considered irregular, and will not be recognized under any circumstances. Certificates from instructors who practise any peculiar system of medicine, or who advertise, or violate in any way the code of ethics adopted by the profession, will not be received, under any circumstances, even if the instructors be regular graduates in medicine.

Graduates of other regular colleges, who desire a degree from this institution, must take one laboratory course in Urinary Analysis, in Histology, and in Pathology and Bacteriology; one course of practical work in Physical Diagnosis and in Demonstrative Obstetrics at this College, and they must furnish evidence of having pursued the study of practical anatomy under the direction of a demonstrator; they must pass a satisfactory examination in the branches of Anatomy, Physiology, Chemistry, Materia Medica and Therapeutics, Practice of Medicine, Surgery, and Obstetrics. They will be required to pay the matriculation and the graduation fee.

Two prizes are offered each year by the Faculty for general proficiency in examination. (See prizes on a subsequent page.)

Fees, for matriculation, payable each term, five dollars; for the full course of lectures, eighty dollars for the first two years, for the third year sixty dollars; for graduation, twenty-five dollars; for the preliminary course, thirty dollars. Demonstrator's fee, including dissecting material, ten dollars.

Students who have already attended two full courses of lectures in other regular schools are admitted on paying the matriculation fee and sixty dollars.

Students who have attended three full courses in this School are admitted to subsequent courses of lectures on paying the matriculation fee only.

Students who have attended one full course in this College and one full course in some regular Medical School are admitted on paying the matriculation fee and sixty dollars.

Graduates of this School are admitted without fee; graduates of other regular schools, on payment of the matriculation fee and twenty-five dollars; theological students,

unless they intend to graduate in Medicine, are admitted on general ticket, by paying the matriculation fee only.

Further information concerning the School may be obtained from J. B. Stearns, M.D., Secretary of the Faculty, Burlington, Vt.

Medical Department of Yale University.

New Haven, Conn.

In the fall of 1810, a charter was granted to the President and Fellows of Yale College and the President and Fellows of the Connecticut Medical Society, authorizing them to unite according to the terms of certain "Articles of Union," before agreed upon, for the establishment of a medical seminary, to be styled the Medical Institution of Yale College. Two years later the School was organized, and in the fall of 1813 instruction was begun. In 1884, by an agreement with the Medical Society, the College authorities assumed the entire control of the School.

The College year extends from the first Thursday in October to the Commencement in June.

Throughout the year instruction is given by lectures and recitations, combined with practical work in the Chemical, Anatomical, Histological, Physiological, and Pathological Laboratories.

Abundant facilities for clinical instruction are found in the numerous clinics at the State Hospital, and the New Haven Dispensary.

The museum contains a large collection of natural and morbid specimens, numerous casts, plates, and models of elegant execution, and an extensive cabinet of Materia Medica. The libraries of the University and the cabinets of mineralogy and natural history are also open for the use of students.

New Haven offers special advantages to medical students for the study of Zoölogy, Comparative Anatomy, Botany, and other branches, under distinguished teachers, in connection with the Sheffield Scientific School.

Candidates for admission to the course must be at least eighteen years of age, and must present satisfactory testi-

monials of good character. Each candidate must present proof that he has passed the matriculation examination of some scientific, literary, or professional college in good standing; or present testimonials from the proper officer that he has pursued the course at some high school, academy, or preparatory school approved by the Faculty, or must pass an examination in English, Mathematics, and Physics.

Examinations are held at the Medical College on the Wednesday preceding the opening of the College year, and also on the Thursday after Commencement. Examinations are also held on the Thursday following Commencement, in Chicago, Cincinnati, and San Francisco. A fee of five dollars is charged for admission to these examinations.

Requirements for Graduation. — Examinations are held at the close of each year on the studies of that year. The examinations at the end of the first year are upon General and Medical Chemistry, Histology, Anatomy, and Physiology.

Those at the end of the second year are upon advanced Physiology, advanced Anatomy, and Materia Medica.

Those at the end of the third year are upon Pathology, Surgery, Medicine, Therapeutics, and Obstetrics, with a practical examination in Clinical Medicine.

Every candidate must be twenty-one years of age, and of good moral character; he must have pursued medical studies in this University for three years, or if but one or two years in this School, he must have pursued such studies in some other recognized institution as are considered by the Faculty to be the equivalent of the remainder of the full term of study (the last year must have been in this School), and have passed the required examinations in all the studies of the three years' course,

and have presented a satisfactory thesis on some subject relating to medicine.

The degree of Doctor of Medicine *magna cum laude* will be conferred on students whose examinations and school-work show distinguished merit.

The degree of Doctor of Medicine *cum laude* will be conferred on students whose examinations and school-work show unusual merit.

Fees, for matriculation, paid on entering the School, five dollars; tuition for first and second year, one hundred and forty dollars; for third year, eighty dollars; graduation fee, thirty dollars.

Other information regarding the institution may be obtained from the Dean, H. E. Smith, M.D., New Haven.

Army Medical School.

By a recent order, the Secretary of War authorized the establishment of an Army Medical School in the city of Washington, for the purpose of instructing approved candidates for admission to the medical corps of the army in their duties as medical officers.

The course of instruction is for four months and is given at the Army Medical Museum in Washington, commencing on the first day of November. Five professors have been selected from among the senior medical officers of the army stationed in or near the city of Washington, and as many associate professors as may be required to give laboratory instruction in the methods of sanitary analyses, microscopical technique, clinical microscopy, bacteriology, urine analysis, etc.

The Faculty of the Army Medical School consists of:

1. A President of the Faculty, who shall be responsible for the discipline of the School, and who will deliver a course of lectures upon the duties of medical officers in war and peace, including property responsibility, examination of recruits, certificates of disability, reports, rights and privileges, customs of service, etc.

2. A Professor of Military Surgery, including the care and transportation of wounded.

3. A Professor of Military Hygiene, including practical instruction in the examination of air, water, food, and clothing from a sanitary point of view.

4. A Professor of Military Medicine.

5. A Professor of Clinical and Sanitary Microscopy, including Bacteriology and Urinology.

FACULTY.

Col. C. H. Alden, President.

Lieut. Col. W. H. Torwood, Professor of Military Surgery.

Major J. S. Billings, Professor of Military Hygiene.

Major Charles Smart, Professor of Military Medicine and Director of the Chemical Laboratory.

Capt. Walter Reed, Professor of Clinical and Sanitary Microscopy, and Director of the Pathological Laboratory.

Capt. J. M. Cabell, Assistant to Professor of Military Surgery, and Instructor in Hospital Corps Drill.

HOSPITALS AND DISPENSARIES.

Massachusetts General Hospital.

Blossom Street, Boston. (*Tele.*)

Incorporated Feb. 25, 1811; opened for the reception of patients, Sept. 3, 1821. From that time until Dec. 31, 1893, 90,602 persons have been treated as in-patients, and since the year 1847, 437,869 as out-patients.

This institution, with the exception of the Pennsylvania Hospital, is the oldest establishment of its kind in the country. During the first year of its existence it received substantial aid from the State; but with this exception, it has been entirely supported by voluntary contributions from citizens of Boston and its neighborhood.

Since 1872, five new pavilion wards have been constructed on the grounds of the Hospital. These buildings are called the Jackson, Warren, Bigelow, and Townsend Wards respectively, in memory of the valuable services of Drs. James Jackson, J. C. Warren, Jacob Bigelow, and S. D. Townsend, and the Bradlee Ward for abdominal and brain surgery, in memory of J. Putnam Bradlee. In 1894, there was built a pavilion Isolating Ward, the gift of George A. Gardner.

The Thayer building, for nurses, was built in 1882, and the Gay Ward, an extensive addition to the out-patient department, in 1883, — the former a memorial to the late Nathaniel Thayer, for many years a trustee of the Hospital, and a large contributor to its support, and the latter

a memorial by a friend to the late Dr. George H. Gay, for many years one of the surgeons to the Hospital.

The Hospital has 259 beds. Patients suffering from medical or surgical diseases or injuries are received from any part of the United States or the Provinces. Chronic or incurable cases and such as need only the comforts of a home are, as a rule, refused admission. No contagious diseases are admitted. Application for admission must be made to the Resident Physician at the Hospital, between 9 and 11 A. M. and 2 and 3 P. M., Sundays excepted. Accidents admitted at any hour. In urgent cases application may be made at other times. Application for admission of patients from a distance must be made in writing, accompanied by a full description of the case by the attending physician, and, when a free bed is desired, by a statement of the pecuniary condition of the patient. A reply should be awaited before sending the patient. The regular charges to paying patients are as follows: In the Jackson Ward (private), $28 per week; in small room in the Townsend and Bigelow Wards, $25 per week; in the General Wards, $10 per week. These rates, covering only expenses of board and lodging, may be increased or abated in individual cases by the Resident Physician. Five weeks' board must be advanced upon entering (any balance due being refunded), or an obligation with surety for its payment must be furnished. Out-patients are treated from 9 to 10 A. M., Sundays excepted. Ophthalmic patients are treated on Tuesday, Thursday, and Saturday at 9 A. M.

The Convalescent Home, connected with the Hospital, is located in Belmont, and has 30 beds.

Friends may be admitted to see patients in the wards every day from 2 to 3; but no patient in any ward can receive more than one visitor a day.

During the year ending Dec. 31, 1893, there were treated at the Hospital 3,524 in-patients, of which number 2,725 were discharged well or relieved. The average number of patients was 203, and the average cost per patient $16.11 per week. Besides those classed as in-patients, 26,527 persons were treated as out-patients in the medical and surgical departments.

Students of the medical and dental schools are admitted to the clinical visits of the physicians and surgeons. Operations are performed during the winter on Saturday at 11 A. M., and during the summer on Wednesday and Saturday, at the same hour. The operating theatre is provided with seats for 400 persons.

Three surgical externes are appointed in January, April, and October of each year, and begin terms of four months in April, August, and December; and are then promoted house pupils for one year; two medical externes are chosen in April and October; they serve six months as externe and one year as house pupils.

The Massachusetts Training School for Nurses became connected with the Hospital in 1873, and has since done the nursing of the Hospital. To Jan. 1, 1894, 340 nurses have been graduated.

The Treadwell Library, a valuable collection including particularly many large and expensive works not generally found in private libraries, is connected with the institution, and a large number of journals are taken for the use of the medical staff. (See Medical Libraries.) The general library for the use of the patients numbers 1,300 volumes.

A new edition of the History of the Hospital, by the late N. I. Bowditch, for which a fund was provided by his will, was issued in 1872, under the editorial care of Rev. George E. Ellis, D.D., one of the trustees at that time.

The Warren Prize, founded by the late Dr. J. Mason

Warren, in memory of his father, Dr. John C. Warren, and the Dalton Scholarship, established under the John Call Dalton and the Edward Barry Dalton Fund for promoting investigation in the science of medicine, are described on a later page of this volume.

The ambulance of the Hospital, accompanied by a medical officer, will be despatched to any point within the city proper, for the conveyance of cases of accident, or urgent sudden sickness, not contagious, to the Hospital or elsewhere, upon notice from a physician, the police, or other responsible source, subject to the approval of the Resident Physician. In cases requiring gratuitous treatment, no charge is made.

The Boston City Hospital.

Harrison Avenue, opposite Worcester Square. (*Tele.*)

The Boston City Hospital was authorized by an Act of the City Council, approved March 27, 1858. In July, 1861, the construction of the Hospital was authorized by the City Council. The work was begun on Sept. 9, 1861; and the Hospital was dedicated May 24, 1864, Hon. F. W. Lincoln, Jr., at that time being Mayor.

The buildings consisted of a central administration building, two three-storied pavilions, with a boiler-house and mortuary. In 1867, a two-storied pavilion was erected for purposes of isolation. The capacity of the Hospital at this time was 225 beds. In 1874 and 1875, the Hospital was further enlarged by the erection of two three-storied buildings, two one-storied pavilions, a new building for kitchen and domestic purposes, and a building for the use of the various departments for out-patients. The old buildings were reconstructed, the system of heating and

ventilation was radically changed, the basements abandoned as wards, and many alterations made.

In 1884, a Nurses' Home was erected, accommodating seventy nurses. In 1886, two additional buildings were erected for the reception of infectious cases. Another building was added in 1890 for purposes of a medical library, record rooms, and similar uses. The cost of the buildings, to the year 1890, was $874,423, not including the cost of the land. The Hospital at that time had accommodations for 480 patients.

In 1892, extensive additions were made; and during the years 1892, 1893, and 1894, $1,036,500 was appropriated for the further enlargement of the Hospital. A special hospital for the treatment of infectious diseases has been erected on the old Nursery grounds, between Massachusetts Avenue and Northampton Street. This Hospital consists of seven buildings, is complete in itself, and will accommodate 220 patients. A new boiler-house has been erected for heating the entire group of Hospital buildings, and with an electric plant added. A new pathological building, mortuary, and mortuary chapel are now being erected, and also the enlargement of the surgical operating building and the erection of a two-storied ward for surgical patients has been made.

The Boston City Hospital (proper) now has 500 beds, and is intended for the reception of those residents of Boston only who require temporary relief. The Trustees, however, admit in special cases those not resident in Boston, when compensation is received or guaranteed. Persons accidentally wounded, or otherwise disabled or injured, are received and treated at all hours. Separate apartments, and more accommodations than are customary when no compensation is made, are afforded to paying patients. The Hospital is established and maintained by

annual appropriations from the municipal government, aided by trust funds, and is especially intended as a hospital for acute medical and surgical diseases; exceptional chronic cases with urgent symptoms or capable of speedy relief are sometimes temporarily admitted. Bequests and donations have been given for general or special purposes amounting to $48,500. The Hospital was incorporated in 1880.

From the opening of the Hospital, June 1, 1864, to the close of the last Hospital year, Jan. 31, 1894, there were examined for admission, 161,336; patients admitted, 122,438; patients received, accidentally injured, 20,511; number of out-patients treated, 304,935. During the Hospital year ending Jan. 31, 1894, there were treated in the Hospital 8,763 patients; daily average, 457; number of out-patients, 15,592; number of visits made by out-patients, 57,758. The number of patients admitted with accidental injuries, 1,495; and of all patients treated in the Hospital, 1,153 died, of whom 447 died within forty-eight hours after admission. The cost per patient was $10.09 per week. When all buildings now under construction are completed, the number of beds will be 810.

The Hospital has a medical and surgical library of 2,743 bound volumes. It also contains the current leading American and foreign medical journals. The Annual Report of the Trustees and Superintendent is published in February, and contains a classified list of all cases treated, both as in-patients and out-patients. The Medical and Surgical Reports are issued each year, and include valuable statistical tables and scientific papers relating to, and based upon, the practice of the Hospital.

A Training School for Nurses is connected with the Hospital, under charge of the Trustees and the Superintendent of the Hospital. The School gives instruction to

ninety-four nurses ; the particulars of its system and course of instruction will be found on another page.

Operations are performed in the Amphitheatre on Tuesday and Friday at 11 A. M., and are open to physicians or students of medicine. Other visits to the Hospital wards are made only on invitation of the various members of the Hospital Staff.

There are thirty-one House Officers, appointed by the Trustees, after a rigid examination in the various branches of medicine and surgery.

There are seven ambulances connected with the Hospital department for the purpose of carrying patients to and from the institution. Their use is limited to accidents and patients suffering with severe medical or surgical disease, incapable of being transported by ordinary conveyance. It is not the intention of the Trustees that the ambulances shall be used as a conveyance to save carriage hire, and they do not go beyond the city limits.

Application for the admission of patients may be made on each day of the week, between nine and twelve. Whenever able, the patient should apply in person. When not able to apply in person, application may be made by a friend, by telephone, or by a letter from the last physician in attendance. Whenever in the opinion of the Trustees the circumstances of the patient warrant it, the whole or a part of the board should be paid. Persons having acute alcoholism are not admitted. Friends are permitted to visit patients on Monday, Tuesday, Thursday, and Saturday of each week, from 2 to 3 P. M. No patient is allowed to receive more than two visitors on the same day. Positively no visiting on Sunday, except to patients occupying private rooms, or patients who are dangerously ill.

A Convalescent Home was established in 1890, and is used in connection with the City Hospital. It is situated

at 2150 Dorchester Avenue, near Milton Lower Mills, on an estate of fifteen acres. The Home accommodates thirty-four patients, and at present is occupied by women and children. The Home is intended for patients after their discharge from the wards of the Hospital. It is under the supervision of the Trustees and Superintendent of the Hospital, but is placed under the immediate charge of a Matron. Visiting days are week-days, from 2 to 4 P. M.

Physicians and Surgeons to the various departments for out-patients are in attendance for the treatment of such out-patients as are unable to pay for medical and surgical treatment at their homes within the limit of the City of Boston each week as follows, namely : —

MEDICAL. — Tuesday, Thursday, and Saturday, from 9 to 11 A. M.

SURGICAL. — Every day, except Sunday, from 9 to 11 A. M.

OPHTHALMIC. — Monday, Wednesday, and Friday, from 9 to 11 A. M.

FOR DISEASES OF THE SKIN. — Monday, Wednesday, and Friday, from 10 A. M. to 12 M.

FOR DISEASES OF THE EAR. — Tuesday, Thursday, and Saturday, from 9 to 11 A. M.

McLean Hospital.

Washington Street, Somerville. (*Tele.*)

The charter of the Massachusetts General Hospital Corporation (1811) authorized the establishment of a general hospital, located in Boston, and a hospital for the insane, located in Somerville. They are under the control of one Board of Trustees.

The McLean Hospital was opened for the reception of patients, Oct. 6, 1818. It received its name from John McLean, who at his decease bequeathed the sum of $100,000 to the institution. The name was changed by the trustees in 1892, from McLean Asylum for the Insane to McLean Hospital. From the date of its opening to Dec. 31, 1894, 7,924 patients had been received. During the year 1894, 287 patients were treated, and the daily average number was 175. Rate of board, $15 to $50 per week. The reports of the McLean Hospital and the Massachusetts General Hospital are published together annually.

In June, 1875, the trustees purchased for the use of the Hospital a tract of land, containing about one hundred

and seven acres, in Waverly (town of Belmont), about seven miles from Boston. The situation is one of great beauty, elevated and salubrious. Additions have been made from time to time till now the estate comprises one hundred and seventy-six acres, on which the trustees are building a new hospital. It will be ready for occupancy in the summer of 1895, when the buildings at Somerville will be abandoned. The Hospital, when completed according to present plans, will comprise eighteen buildings. Ten of these, including two gymnasiums, for men and women, are to be occupied by patients, and are separate houses placed at a distance of from one hundred and fifty to two hundred and fifty feet from each other. All of these houses, excepting one, are connected with the Administration Building, on the basement level, by covered corridors, so constructed as to appear on their exterior like ordinary low garden walls. The effect of individual residences is gained by choosing sites for these houses at different levels, and by adopting for each of them a different style of architecture.

The McLean Hospital Training-School for Nurses was organized in 1882, and during the eleven years of its existence 167 persons have been graduated as nurses.

OFFICERS.

[General Officers the same as those for the Massachusetts General Hospital, on a previous page.]

Superintendent. — Edward Cowles, M.D.
First Assistant Physician. — G. T. Tuttle, M.D.
Second Assistant Physician. — D. H. Fuller, M.D.
Third Assistant Physician. — E. S. Abbot, M.D.
Pathologist and Assistant Physician. — August Hoch, M.D.
Superintendent of Nurses. — Miss L. E. Woodward.
Instructor in Physical Training. — Miss A. M. Hurlbutt.
Instructor in Cooking. — Miss B. E. Hazen.

Boston Lying-in Hospital.

24 *McLean Street, Boston.* (*Tele.*)

Organized in 1832, for the relief of poor and deserving women during confinement. The first building for the use of the Hospital was situated on Washington Street, near the present site of Waltham Street. In 1853 the Corporation bought 40,000 feet of land on Springfield and Worcester streets, on which the building now used by the Home for Aged Men was erected.

For several years prior to 1872, the Hospital had not, by itself, furnished the accommodation for lying-in women for which its charter provided; the objects of the institution were, however, carried out by the annual contribution of $1,000 to the New England Hospital for Women and Children, at which place the same class of patients was cared for. This donation ceased in 1871, and in January, 1873, the Board of Trustees opened the house numbered 24 McLean Street, with accommodations for eighteen patients. As the number of applicants for admission increased, the Hospital was enlarged by the addition of the next two houses. In the spring of 1890 the Trustees voted to purchase the houses between the Hospital and the House of the Good Samaritan, and to remodel the Hospital. For this purpose a fund of 100,000 dollars was raised and the present Hospital, with accommodation for sixty patients, was built. In 1881, an out-patient department was established. In 1889, a training-school for nurses was opened.

Admission of Patients. — The regular charge for patients living in Boston is $20; for those living elsewhere, $30. This charge must be paid upon entrance to the Hospital, and covers the confinement, board, and care for two weeks following confinement, and for any

further time during which the patient may be unable to leave the Hospital.

Deserving persons, residents of Boston, who are unable to pay, will be admitted and cared for without charge; and non-residents may also be admitted free by special vote of the Executive Committee.

Out-Patients. — Free medical attendance during confinement is furnished at their homes to women residing within the limits of the city proper, who are unable to pay for such service.

Applications for admission to the Hospital, or for attendance upon out-patients is made to the Visiting Physician at the Hospital between the hours of ten and eleven in the forenoon of any day except Sunday; and all such applications should, if possible, be made not less than one week before the expected date of confinement. Cases of emergency are, however, received at any time.

Visitors. — Relatives are admitted to visit patients in the wards between the hours of three and four in the afternoon of any day except Sunday; but no patient is allowed, except by the special permission of the Visiting Physician, to receive more than one visitor a day, or to receive any visitor whatever before the fifth day after her confinement.

Wet Nurses can usually be obtained at the Hospital. The fee for a wet nurse is ten dollars.

OFFICERS.

President. — O. W. Peabody.

Vice-President. — Augustus Flagg.

Treasurer. — G. V. L. Meyer.

Secretary. — W. D. Sohier.

Assistant Visiting Physician. — C. M. Green, M.D.

Physicians to Out-patients. — Edward Reynolds, M.D., C. W. Townsend, M.D., George Haven, M.D.

Massachusetts Charitable Eye and Ear Infirmary.

176 *Charles Street, Boston.* (*Tele.*)

This institution owes its origin to Drs. Edward Reynolds and John Jeffries, who, in November, 1824, opened a small room in Scollay's Building as a dispensary for the gratuitous treatment of the poor, afflicted with diseases of the eye. In March, 1826, the success of their efforts had been such that their dispensary was regularly organized as the Boston Eye Infirmary. A month later it was incorporated by the State Legislature under its present title. It was soon after removed to Court Street, and six years later to the Gore Mansion in Green Street, where it remained until 1850. It was then removed to the building now occupied in Charles Street, which was dedicated July 3 of that year.

A new wing was added in 1881. The aural department of the Infirmary now occupies buildings recently purchased for the purposes adjacent to the main building. They contain a suitable operating chamber, rooms for clinical use, wards for male and female patients containing some twenty-seven beds, isolating wards, an elevator, and accommodations for the surgeons, interne, and nurses. The rooms gained in the old building by the removal of the aural department are allotted to isolating wards for male and female patients, a surgeons' library, laboratory, and dark room for photographic purposes.

The Infirmary receives all poor patients with diseases of the eye and ear, making application for treatment. More than nineteen thousand were treated during the last year. The Infirmary is open daily, except on Sundays and holidays, from 9 to 11 A. M. Unless able to pay their board, all patients from Massachusetts are admitted free; those from other States are charged the usual rate, which is six

dollars per week. All applications for admission must be made at the Infirmary. The number of beds in the Ophthalmic Department is about eighty-four; in the Aural, twenty-seven.

Patients may be visited by their friends daily between the hours of 1 and 2, except on Sunday, when the visiting hour is from 11 to 12.

Physicians are invited to attend the practice of the surgeons any day from 9 to 11 o'clock. Students are admitted on Monday and Friday, throughout the year, from 9 to 11 o'clock. Clinical instruction is given to physicians and students by members of the staff.

Boston Lunatic Hospital.

The Hospital was established in 1839. In 1895, it is expected that all the remaining patients will be removed

from the original location in South Boston to the new one in Roxbury, at the corner of Walk Hill and Canterbury streets. It has here a site of seventy-five acres and two buildings for recent cases, of eighty-four beds each; and a domestic building, to which will soon be added an Administration building.

It has another site of fifty acres near by at Morton and Canterbury streets. Here are five buildings for three hundred and eighty patients. There is a chapel and associated dining-room, kitchen, bakery, and laundry. The total capacity of all buildings will be five hundred and fifty beds, or nearly one half of the city insane. The remainder for the present will continue to be boarded in the State hospitals.

The new Hospital is unique in design and construction, being on the cottage plan. Buildings two stories in height, and built of terra-cotta; they are in the half-timbered style, with overhanging second story, and finished in cement. All the rooms are well lighted and heated and ventilated independently, on the most approved plan.

The Hospital is intended particularly for the insane of the city of Boston, and its use is now restricted to those only who have a "settlement" in the city. The poor are admitted without charge, but board is paid by those who are able to pay.

Patients are committed to the Hospital by the Judge of Probate for Suffolk County, or may be admitted as emergency cases under the Public Statutes (chap. 87, § 26), when violently insane, or when no judge can be found, or as voluntary patients (§ 28), on their own written application.

Application for admission should be made at the office of the Commissioners for Public Institutions, 14 Beacon Street.

Small-Pox Hospital.

Canterbury Street, West Roxbury, Boston. (*Tele.*)

Organized in June, 1877. Contains 40 beds, but a larger number of patients could be accommodated if necessary. Cases of small-pox should be reported at once at the office of the Board of Health or at the nearest police station. The Hospital ambulance will be sent at the request of any citizen.

Resident Physician. — C. A. Frink, M.D.

The Channing Home.

30 McLean Street, Boston.

Established in May, 1857, by Miss Harriet Ryan (the late Mrs. John Albee), through the assistance of friends whom she had drawn into sympathy with her benevolent purpose. It was incorporated in 1861. The present building was opened May 1, 1870. This is not a hospital in the common acceptation of the word, but a home for incurables, for those whose early death seems quite certain, or for those who will probably live for a long time, but needing constant medical attendance. Some of the patients have been inmates of the Home for many years, and no pay is taken from any of them.

Application for admission must be made to the matron at the Home. The institution has accommodations for 14 inmates.

The annual meeting of the Corporation is held on the second Wednesday in April. A Report of the Home is published annually.

Carney Hospital.

Old Harbor Street, South Boston. (*Tele.*)

Established in June, 1863, and incorporated in 1865, for the purpose of affording relief to the sick poor. In 1868, a large and commodious brick structure was erected for the use of the sick. Both acute and chronic cases are received, contagious diseases excepted. The institution is in charge of Roman Catholic Sisters of Charity, but receives patients of all denominations.

Application for admission must be made at the Hospital.

The rate of board for pay-patients, treated in the wards, is five dollars or six dollars per week. The Hospital contains also a number of rooms for private patients, who pay from ten dollars to twenty-five dollars a week. Patients occupying private rooms may be attended by their own physicians, so long as they conform to the rules of the institution.

St. Joseph's Home for Sick and Destitute Servant Girls.

46 *East Brookline Street, Boston.*

Incorporated in 1867, for the purpose of providing a home for, and otherwise aiding, sick and destitute servant girls. It includes under its organization a hospital for the treatment of diseases, especially those of an incurable character, and for women who have become exhausted and unwell while at their work, and need a temporary respite. The institution has 90 beds, of which 24 are devoted to the hospital department. The institution was organized by, and is under the charge of, the Sisters of St. Francis. Application for admission must be made at the Home.

The annual meeting of the Corporation is held on the second Tuesday in January.

St. Elizabeth's Hospital.

61 *West Brookline Street, Boston.* (*Tele.*)

Established in 1868, by the Sisters of St. Francis, and incorporated Jan. 29, 1872, for the treatment of women. It is especially intended for patients in moderate circumstances who can afford to pay only a low rate of board and moderate fees for medical attendance. The institution has about seventy-two beds. In 1881, a branch was estab-

lished on Fort and Beech Glen avenues, Roxbury, and in 1885 the main Hospital was removed from the house in Waltham Street, where it had been located since its organization, to its present site. Applications for admission must be made to the Sister Superior at the Hospital between the hours of 9 and 11 A. M.

Out-patients receive free medical treatment in the dispensary daily between 9 and 11 A. M.

The Children's Hospital.

Huntington Avenue, Boston. (*Tele.*)

The Hospital was founded in 1869, for the purpose of providing medical and surgical treatment for the diseases of children, and for the attainment and diffusion of knowledge regarding the diseases incident to childhood. It received an Act of incorporation, Feb. 26, 1869.

Patients between the ages of two and twelve, suffering from acute diseases, are received at the Hospital. No patient is admitted whose case is considered chronic or incurable, unless there be urgent symptoms, which, in the opinion of the medical staff, are capable of being relieved; nor will any be admitted having an infectious or contagious disease. Application for admission may be made any day at 9 A. M.; but accidents and other cases of an urgent character will be received at any time. The beds in the Hospital are free to those who are really poor; but a moderate charge is made to those who are able to pay. Patients from beyond the limits of the city will be received on payment of not less than four dollars a week. The Hospital has at the present time ninety-six beds.

Rooms are assigned for the use of private patients and the mother or other person attending them; and every convenience is offered in the way of medical attendance, by members of the medical staff, trained private nurses, etc., for patients living beyond the limits of the city or those residents who require special accommodation. Reasonable rates are charged.

In December, 1882, the Hospital building on Huntington Avenue, near West Chester Park, was opened. In 1888 the Out-patient Department of the Hospital was thoroughly reorganized, and now offers every facility for the successful treatment of medical and surgical diseases of ambulant patients.

In the summer of 1875, the managers established a Convalescent Home at Wellesley, fourteen miles from the city, on the Boston and Albany Railroad. The managers of that department of the Hospital have erected a new building for the Home on a tract of thirty acres given them for the purpose.

The immediate care of the Hospital and the nursing is intrusted to ladies connected with the Protestant Episcopal Sisterhood of St. Margaret.

St. Margaret's Infirmary.

15 *and* 2 *Louisburg Square, Boston.*

Organized in 1882 by the Sisters of St. Margaret, in order to receive patients requiring medical or surgical care. Physicians, members of the Massachusetts Medical Society, are allowed to send patients, and to attend them, and can rely on their orders being fully carried out. The inmates are cared for by the Sisters and trained nurses, and receive every kindness. Price of rooms, from ten to forty dollars per week, including board and nursing.

In 1884, the house No. 2 Louisburg Square was added to the Infirmary, but is reserved more especially for patients requiring rest and quiet. The houses together can accommodate about thirty patients. Since the Infirmary was opened, it has received about 800 patients.

The Sisters of St. Margaret are also engaged at The Children's Hospital and St. Monica's Home for Colored Women, Boston, Children's Island Sanitarium, Marblehead, Mass., Sea View Home for Children, Humarock Beach, Mass., the Summer Hospital at Rainsford Island, Boston Harbor, Home for Girls needing Rest at New Ipswich, N.H., and Hospitals and Homes in Newark and Jersey City, N.J., Philadelphia, Montreal, and other places.

Free Hospital for Women.

Pond Avenue, Corner of Cumberland Street, Brookline.

Established in December, 1875; incorporated August, 1879. The Hospital is entirely free, and receives only those women who suffer from diseases peculiar to their sex, and have not the means to obtain the medical advice or the care which they need. It contains 20 beds, with a possible capacity for 60 beds, and is supported by contributions from religious societies and private individuals. The number of patients treated during the last hospital year was 189. Those who give the full amount, $250, which is fixed for the support of a bed, are entitled to designate a patient throughout the whole year; but any one giving not less than $150 is entitled to share with another person giving a like amount the right to designate patients. Any society or any individual supporting a bed may be represented by an active member of the Corporation and one lady on the Board of Visitors; and the society or individual has the right to fill the bed with any poor, worthy woman, if the medical staff consider her case a proper one for treatment in the Hospital.

For convenience, the department for out-patients has been retained in the city at 60 East Springfield Street, where 5,298 were treated in the last year. It is open for the reception and treatment of cases each week-day at 9 and 3; and on Tuesday and Friday evenings at 7. Applications for admission to the Hospital may be made at the Hospital in Brookline or at the Out-patient Department.

New England Hospital for Women and Children.

Dimock Street, Roxbury, Boston. (*Tele.*)

Incorporated March 12, 1863, for the purpose of establishing and maintaining in the city of Boston or its vicinity a Hospital for the treatment of the diseases of women and children, giving therein clinical instruction to female students of medicine, and of training nurses.

The present hospital building was erected in 1872, and opened in August of the same year for the reception of patients. It contains fifty-eight beds, in rooms of two and four beds each.

The Maternity Building is entirely separate, and consists of a small house of two stories, each having three rooms of two beds each, and a separate room for the delivery. There are also two isolated houses for the care of cases of contagion arising in the Hospital.

Application for admission must be made to the Resident Physician at the Hospital from 11 A. M. to 1 P. M., Sundays excepted, and from 2 to 3 on all days except Sunday, Wednesday, and Saturday. Chronic or incurable cases are, as a rule, not admitted. Contagious cases are refused. Urgent cases received at any hour.

The regular price for patients is ten dollars per week. Patients in the private wards pay from twenty-five to

thirty dollars per week. There are eleven endowment free beds and six annual free beds.

The training of nurses has been always kept in view, although there was no organized method adopted until the present building was occupied. To the late Dr. Susan Dimock, who was the Resident Physician at the time, is largely due the organization and success of the present Training School for Nurses. The present course of training extends over eighteen months. One month of the time, each nurse is employed in the New England Dispensary, nursing the out-patients under the direction of the dispensary physicians.

Eight medical internes are annually appointed from the women-graduates of recognized schools of medicine. Four months of their time they live at the New England Dispensary, No. 29 Fayette Street, giving their services to that branch of the work.

St. Mary's Infant Asylum and Lying-in Hospital.

Bowdoin Street, Dorchester, Boston. (*Tele.*)

Founded by Roman Catholic Sisters of Charity and the Society of St. Vincent de Paul in September, 1868, and incorporated in September, 1870, as an institution for the maintenance and support of foundlings, orphan and half-orphan children. It also accommodates deserving indigent females during their confinement in childbirth. The Asylum will receive 10 patients and 50 children.

Application should be made to the Sister Superior at the institution. No distinction is made on account of religion; and no patient is refused on account of her inability to pay.

Attending Physician. — E. D. Peters, Jr., M.D.

Boston Home for Incurables.

2049 *Dorchester Avenue, corner of Codman Street, Dorchester, Boston.*

Organized in 1882, through the instrumentality of the late Miss Cordelia Harmon, and formally opened for patients Dec. 4, 1882. The present estate was bought and occupied and the Home incorporated in 1884. Accommodations are furnished for thirty adult patients of both sexes, and thirty children. The design of the Home is to receive gratuitously patients who are incapacitated for life, who are unable to provide for themselves. No cases of contagious disease, syphilis, consumption, cancer, epilepsy, or any form of insanity received. Patients accepted after examination by one of the physicians, on notification by the Committee on Admission.

Visitors admitted on Monday and Friday, from 1 to 5 P.M.

Vincent Memorial Hospital.

44 Chambers Street, Boston.

Incorporated Dec. 12, 1890, under the general law of Massachusetts, to honor the memory of Mrs. J. R. Vincent, a member of the Boston Museum Company. In February, 1890, the physicians in charge of the Trinity Dispensary, attached to St. Andrew's Church at 38 Chambers Street, gave notice that if a few beds for the further care of dispensary patients were at their disposal, for the use of working women and girls, the usefulness of the Dispensary would be much increased. A little later a friend of Mrs. Vincent announced that she would give one thousand dollars toward the establishment of a hospital, if it might be made a memorial of that good lady. By the aid of the newspapers and in other ways, a considerable sum was subscribed, and the building 44 Chambers Street secured. There are ten beds, four of which are free.

The Sea-Shore Home.

Organized on the 27th of May, 1875, for the purpose of providing that poor sick children, or those recovering from disease, may obtain the advantage of change of air, and especially of sea breezes. During the first year the Home was located at Beverly Farms, and in later years at Plymouth, and Germantown, Quincy. In 1878, the Corporation purchased a suitable house and land at Winthrop for the use of the Home. After a successful existence in the last place for thirteen years, and the treatment of 3,634 patients from the time of its organization, the Home was forced to close its doors, August 25, 1890. Its future action is uncertain.

Massachusetts Hospital for Dipsomaniacs and Inebriates.

Foxboro'.

Organized by Act of the Legislature in 1890. Two hundred patients may be accommodated. Inebriates are committed by judges of courts, for periods not exceeding two years, on certificate of two physicians.

Superintendent. — Marcello Hutchinson, M.D.
Assistant Physician. — William Noyes, M.D.

Massachusetts School for the Feeble-minded.

Waltham.

Organized in 1848, and incorporated in 1850, for the care, instruction, and training of all grades of feeble-minded children. The instruction is not intended for epileptic or insane children, nor for those who are incurably hydrocephalic or paralytic. The best age for admission is between eight and twelve years.

Judges of Probate may commit suitable children to the School on application of parents or friends, on receiving certain blanks, furnished by the Superintendent.

The support of the School is collected from town, city, or county, or from the State, for all persons who have no property, or kindred able to support them, at a rate to be established, for the support of State, city, and town paupers, in State lunatic hospitals. This provision supersedes the annual State appropriation, and virtually places the institution upon the same footing as the State lunatic hospitals, in regard to its sources of income.

Residents of other New England States may avail themselves of the School, as State beneficiaries, upon the nomination of their Governors. Forms of application and information will be furnished by the Superintendent, at the School.

The School is situated at Waltham, near the Clematis Brook Station of the Fitchburg & Massachusetts Railroads.

Hospital for Nervous and Mental Diseases.

"Woodbourne," Forest Hills Station (N. Y., N. H., & H. R. R.), Boston.

A private establishment for the separate treatment or family care of cases of mental and nervous disease.

At office in Boston, 33 Marlboro' Street, Monday, Wednesday, and Friday, from 10 to 12. (P. O. address, Roslindale, Boston, Mass.)

Superintendent. — H. R. Stedman, M.D.

The Floating Hospital.

Established in the summer of 1894, by the Rev. Rufus B. Tobey, of the Berkeley Temple, for the purpose of carrying sick babies and young children on all-day excursions in Boston Harbor. Five trips were made during the season, and children and mothers were carried. This initial season of the institution will probably lead to more ample work in the future.

Children are taken on tickets furnished by physicians. Ample provision is made for feeding and care, and the presence of physicians and trained nurses insures every attention necessary.

Chairman. — R. B. Tobey.

Boston Summer Hospital.

Rainsford Island, Boston Harbor.

Organized by H. C. Ernst, M.D., in July, 1894, for the care of sick children during the summer months. By the kindness of the Board of Directors of Public Institutions, the old hospital building on Rainsford Island was devoted to the purpose, put in repair, transportation and many supplies furnished; special facilities were also given by the Board of Health. Accommodation was furnished for about 60 inmates.

The nursing was done by members of the Sisterhood of St. Margaret.

The Hospital was opened August 8, and closed September 12; in this time two hundred and fifty mothers and children were received, of which number one hundred and twenty-nine were entered as patients; of these patients seven only died.

Medical Director. — H. C. Ernst, M.D.
Resident Physician. — C. G. Page, M.D.

Woman's Charity Club Hospital.

Parker Hill Avenue, Roxbury, Mass. (*Tele.*)

This Hospital was opened Jan. 1, 1890, by the Woman's Charity Club, an incorporated body, at a house in Chester Square. The accommodations here being insufficient, a new hospital was built on the western slope of Parker Hill, overlooking the new Parkway and Brookline. There are accommodations for thirty patients at present. All the beds are entirely free. This Hospital receives poor women from any part of New England, who are in need of surgical operation for any gynecological or abdominal malady. Application should be made in writing, enclosing a physician's statement of the nature of the disease, to the Admission Committee, addressed to the Hospital.

Surgeons. — Drs. E. W. Cushing, F. W. Johnson, W. M. Conant.

Assistant Surgeons. — Drs. Samuel Crowell, E. F. Murphy, S. P. Cottrell.

Adams Nervine Asylum.

Centre Street, Jamaica Plain. (*Tele.*)

Incorporated March 16, 1877, for the purpose of establishing and maintaining a hospital to afford care and relief to indigent, debilitated, nervous persons, inhabitants of the State, who are not insane and who may be in need of the benefit of a curative institution. The asylum owes its origin to Seth Adams, late of Newton, who bequeathed

to it a large amount by his last will. It also receives for treatment persons, not indigent, who may be otherwise suitable for remedial treatment. Patients were first received in February, 1880, in the dwelling-house purchased with the estate occupied by the Asylum; the new Asylum building was first used in December, 1880. The institution will accommodate about thirty patients. Only female patients are received at present; but a building for male patients is nearly completed. Applications for admission must be made to the Superintendent. A certificate will be required from the attending physician that the patient is suffering from disease of the nervous system and is not insane, and that in his opinion the patient can be cured or materially benefited by treatment at the Asylum.

Boston Baptist Hospital.

47 *Bellevue Street, Longwood, Brookline.*

This Hospital is the outgrowth of the Ruggles Street Dispensary work which was begun Nov. 1, 1886, by Francis F. Whittier, M.D.

Articles of incorporation were granted by the Commonwealth, Sept. 19, 1893.

A large private house was secured and opened to patients, June 1, 1894. Accommodations for sixteen patients.

Out-patient departments at 161 Ruggles Street (where three hundred are treated annually), and 332 Hanover Street.

Any reputable physician may place patients in the Hospital, and care for them personally.

It has been the purpose of the Hospital from the inception of its work to become the centre of philanthropic effort for the Baptists of New England. The history of the work thus far shows that it is not confined to denominational lines.

The Hospital Cottages for Children.

Baldwinsville, Mass.

Organized June 17, 1882, and incorporated Dec. 9, 1882. New buildings were occupied in 1891. They are located on a farm of two hundred acres, with a little cultivated land.

About one hundred and ten children are accommodated on an average in the three central cottages, four or five at the farmhouse, and five or six at Blake Cottage. This Hospital is supported by gifts from its Women's Board, the Boston Committee of Women, the public in general, and from the board paid by children. About one-half of the cases are supported without cost to the family; the remainder pay according to their means and accommodations.

The classes of cases cared for in this Hospital are:

1. Those under fourteen years of age, suffering from epileptic or epileptiform seizures.

2. Children suffering from other nervous disorders, not feeble-minded.

3. Children with deformities, with disease of hip, knee, and other joints, spinal disease, infantile paralysis, and other affections, where the disorder is likely to require a long residence in a hospital.

4. Cases needing operation or fitting of supports, where this may be done by a residence of a few weeks or less.

In such cases the children return to their homes as soon as the appliances are fitted, and are brought to the Hospital at intervals for observation.

A free bed can be maintained by the annual payment of $150. Notice of a desire to establish a free bed should be sent to the Hospital Treasurer.

Patients from other States are admitted very rarely, and only by vote of the medical staff.

The payment of $3,000 entitles the donor to a permanent free bed, — this to apply to patients within the State; for any outside the State twice this amount is required.

Some private cases with separate attendance are taken.

Three teachers are employed; kindergarten work and special methods for correcting defects of speech have been carried on in the schools.

Riverview.

Baldwinsville, Mass.

A medical Home for the treatment of mental and nervous invalids; established 1884.

The aim of this establishment is to provide, at a moderate price, all the privacy and comforts of a pleasant country home, together with the care and treatment required by this class of patients. Three houses connected by glass-enclosed corridor and covered passage; accommodations for

twenty-one patients. Turkish and Russian baths, and massage.

Superintendent. — L. W. Baker, M.D.

Private Institution for Feeble-Minded Youth.

Barre.

Established in June, 1848. This institution, unendowed and strictly private, was established for the education and improvement of backward or eccentric children, and is adapted for all who are precluded from ordinary schools by reason of defective nervous organization.

In addition to the pupils, it receives a limited number of custodial cases, comprising persons of considerable intellectual ability sometimes, but unfitted to engage in business life or mingle in society because of physical or cerebral infirmity.

The cottage system has been adopted as best fitted to preserve the family type, and the household is classified in groups under the immediate supervision of cultivated, refined officials, who give their whole energies to the well-being and happiness of the inmates.

There are five separate cottages, one each for boys, girls, for custodial cases of both sexes, for epileptic boys, and a farmhouse for boys. The grounds extend over two hundred and fifty acres.

Since its opening, four hundred and ninety-two cases of defective mental condition have been treated. About seventy-five are at present in the establishment. Application for admission, terms, etc., to be made to the superintendents.

House of Mercy.

Pittsfield.

A Cottage Hospital, designed especially for the treatment of surgical and acute cases from Pittsfield and neighboring towns. Incorporated in 1874, and managed

by ladies of the several religious societies in Pittsfield. Thirty beds.

Two hundred and ninety-one patients were treated during the year ending Nov. 1, 1894.

In 1890, there was built a small brick isolated ward, for the treatment of contagious and infectious diseases. In 1892, an addition was made to the original hospital building, increasing the number of beds to fifty.

The Bishop Training-School has graduated seventy-two nurses, and forty-one are still connected with the Hospital.

In 1893, the Laflin operating-room was built, and is in every way adapted to the aseptic treatment of surgical cases.

A modern ambulance has recently been added to the hospital equipment.

Salem Hospital.

37 Charter Street, Salem.

This institution was opened to the public Oct. 1, 1874. It has a capacity of twenty-eight beds. Both free and pay patients are admitted.

The out-patient department is under the care of the medical staff. In order to aid this part of the Hospital, the funds of the Salem Dispensary (organized 1824) have been given to the institution, and its separate existence abandoned.

A training-school for nurses has been organized in connection with the Hospital; it now has six pupils.

Recently one of the Trustees has given to the Hospital a loan collection of utensils for the sick room, including syringes, urinals, bed-pans, rubber sheets, air-cushions, head-rests, etc. These articles are deposited at the Hospital for the use of the sick poor, and are delivered by the Superintendent to the bearer of a recommendation from physicians living in the city. Applications for admission to the Hospital are received between the hours of 11 and 12½ daily. Patients can be visited by their friends any afternoon except Sunday, from 2 to 5.

Medical out-patients are treated Tuesday, Thursday, and Saturday, from 12 to 1 o'clock, and surgical from 11 to 12½ daily (excepting Sunday). Eye and ear patients from 11 to 12½ on Monday, Wednesday, and Friday.

The Dentist is in attendance on Monday and Thursday, at 12½.

Springfield Hospital.

North Chestnut Street.

Incorporated Dec. 24, 1883. On Nov. 14, 1886, Dorcas Chapin, widow of Chester W. Chapin, died, bequeathing to the Corporation $25,000 upon the conditions that a like sum should be contributed, and that the city of Springfield should give to this Corporation its Hospital and equipments. This was done in 1887. A farm of thirty-five acres was bought, and the present Hospital built. It was dedicated May 4, 1889. It has fifty beds, and treats about three hundred patients each year. The city gave to this institution the land, buildings, and equipment of the City Hospital, which was discontinued.

Superintendent. — Merrick Bemis, M.D.

Worcester City Hospital.

Wellington and Chandler Streets, Worcester.

Incorporated by the Legislature May 25, 1871, and opened for the reception of patients October 26 in the same

year. By the will of George Jaques, the first Secretary, and the first benefactor of the Hospital, the city received, as residuary legatee of his estate, money and lands of the value of $250,000, or more, to be held in trust for the Hospital. The Hospital is situated about one mile from the City Hall, and was built by the city in 1881. It has about eighty beds, including the Knowles Maternity Ward.

Applications for the admission of patients may be made at the Hospital between 9 and 11 A.M., any day in the week. Patients able to pay for treatment are admitted at such rates of board as the Trustees determine, generally at ten dollars a week. Two weeks' board must be secured in advance.

No patient is admitted whose case is considered incurable, unless there be urgent symptoms which can be relieved. No person having acute venereal disease, or any contagious disease, can be admitted to the Hospital.

A training-school for nurses was established in 1883.

Boston Dispensary.

Bennet and Ash Streets, Boston. (*Tele.*)

Founded in 1796, and incorporated in 1801. This was the first institution of the kind in Boston, and the third in the United States. It is supported entirely by funds

heretofore contributed, and by private charity. It does not receive any support or assistance from the city. At present the operations of the Dispensary are extended only over that part known as the city proper, East, and South Boston, and Roxbury. The remaining portions of the city are otherwise provided for.

Physicians are in attendance daily, who treat respectively men, women, children, and surgical cases. At 9 o'clock Monday, Wednesday, and Friday, dental patients are treated; at 11, those suffering from diseases of the skin; and at the same hour cases of nervous diseases.

In addition to the service at the central office, the city is divided into eleven districts, and to each one is assigned a physician, whose duty it is to care for those unable to leave their homes. Medicines are given out at the central office daily, from 9 A.M. to 5 P.M.; on Sundays and on legal holidays from 9 to 10 A.M.

Since October, 1796, 1,248,730 patients have been treated; since July 1, 1856, 1,129,927 patients have been treated at the central office and in the districts. During the year ending September, 1894, 44,754 cases were treated at the central office, and 27,125 cases in the districts. The number of recipes put up was 73,586, of which 66,810 were paid, and 6,776 free. The average daily attendance at the office was 232. The services of the staff are rendered gratuitously at the central office; in the districts the physicians receive a moderate compensation.

Students are permitted to attend the practice of the physicians and surgeons at 9 o'clock.

Lewiston Hospital.

Maine General Hospital.

Western Promenade, Portland, Me.

The Hospital owes its existence to the concerted action of the physicians of the State Medical Society, who in 1867 appointed a committee, of which the late Dr. John T. Gilman was chairman, to memorialize the Legislature for an Act of Incorporation for a State General Hospital, to be located in Portland, and for an appropriation sufficient to secure its foundation. The bill incorporating the Hospital was passed in February, 1868, and by a subsequent enactment, in 1870, the State ceded to the Corporation, on certain conditions, the lot of land, the site of the State Arsenal on Bramhall's Hill, for the desired purpose. By a grant from the city of Portland, the Corporation enlarged its limits, the property now embracing more than seven acres, bounded on three sides by streets, and with a frontage on Congress and Arsenal streets of more than five hundred feet. The Hospital is situated 145 feet above the level of the sea, and commands an extended view in all directions.

The complete plan contemplates the erection of four pavilions, giving the Hospital a capacity of two hundred beds. At present it consists of a central administrative building and two pavilion wards, three stories high, 145 feet in length, with the necessary kitchen and boiler-house. It was dedicated Oct. 22, 1874.

Application for the admission of patients must be made to the resident physician at the Hospital between the hours of 9 and 11 on any day of the week, except Sunday. Persons accidentally injured are received at any hour. The price of board for paying patients varies from seven to twenty-eight dollars per week, according to the accommodation furnished. Visitors are admitted to see patients between two and four on any week-day.

The Mary Fletcher Hospital.

Colchester Avenue, Burlington, Vt.

Incorporated in 1876, and opened Jan. 22, 1879. The Hospital owes its origin to Miss Mary Fletcher, of Burlington, who gave the sum of $200,000 for its erection.

The Hospital consists of an administrative building, with a large number of rooms for private patients, and two pavilion wards. In a separate building, connecting with the wards and administrative building by a corridor, is a large amphitheatre, capable of seating nearly two hundred persons. Rooms for out-patients are also attached to this building.

The regular price of treatment is ten dollars per week. A limited number of free beds are available for those whose circumstances render them fit subjects for such charity. Applications from outside of Burlington must be made in writing addressed to the Superintendent, by the attending physician of the patient, accompanied by a *full* description of the case.

The number of beds is thirty-five; the number treated each year is about one hundred and fifty.

A training-school for nurses is connected with the Hospital.

Rhode Island Hospital.

Providence, R. I.

Incorporated in March, 1863, and opened for patients in October, 1868. Accommodates 125 patients. There are sixty-one endowed free beds. Apart from the main structure and its two connecting pavilions, are separate buildings for abdominal surgery, for contagious diseases, and for post-mortem and pathological work. A new building for out-patients, built at a cost of $22,000, was built in 1891.

During the year ending Sept. 30, 1890, 1,089 patients were admitted, and 4,697 new cases were received at the out-patient departments. The aggregate daily attendance in all the out-patient departments during the year was 16,549. The average number of in-patients was 83, and the average cost for each in-patient was eleven dollars and twenty-seven cents per week.

The Training-School for Nurses is under the supervision of a trained nurse, and has twenty-five nurses in training.

There are four internes. The term of service is two years. Appointments to this service are determined by competitive examinations held at the Hospital in March and November.

For the use of the medical staff the Hospital has a valuable library of two thousand volumes, including the most recent works in the various departments of medical science.

Woonsocket Cottage Hospital.

The Hospital was erected in 1887 and 1888, and opened in the latter year. It has a capacity of twenty-six beds, ten in each of two public wards, and six private rooms. It had its origin in the will of Dr. Ezekiel Fowler, who made a bequest, through trustees, which should go to a Hospital if such an institution should be erected within twenty-five years of his death. Through the bequests of other friends, largely Mr. George Law, the present buildings were erected and opened to the public in season to secure the original gift. Other gifts have secured a fund of about $100,000, from the income of which the Hospital is supported. Much of the work done is charitable, though many having otherwise poor accommodations for sickness have become inmates by paying such sums as their conditions warranted. The Hospital is supplied with the best means of heating, ventilating, and plumbing, and is situated a little more than a mile from the centre of the city, upon elevated grounds of about twenty-five acres' extent.

Butler Hospital for the Insane.

Butler Avenue and North Street, Providence, R. I.

The Butler Hospital for the Insane had its origin in a bequest of the late Hon. Nicholas Brown, of Providence, R. I., who died in September, 1841. Mr. Brown directed in his will that the sum of $30,000 be appropriated to the

purpose of aiding in the establishment of a hospital for the insane. In 1844, Cyrus Butler, Esq., a venerable merchant of Providence, offered to add to the bequest of Mr. Brown the sum of $40,000, on condition that an equal sum should be raised by subscription. The condition was speedily fulfilled by the contributions of benevolent persons throughout the community. The first meeting of the Corporation was held March 20, 1844, and the hospital building was completed and opened for the reception of patients Dec. 1, 1847. Since that time several important additions have been made. The "Ray Hall" was completed in the year 1866. It was the joint gift to the Hospital of Alexander Duncan and Robert H. Ives, and was named in honor of Dr. Isaac Ray, the Superintendent of the Hospital from its commencement to January, 1867. The Ray Hall contains a museum, a reading-room, billiard-room, and bowling-alleys for the use of patients.

In 1874, the "David Duncan Ward" was erected for women by Alexander Duncan, Esq., in memory of his son, and a similar ward for men has been erected. This is to be named in memory of Dr. John W. Sawyer, who was Superintendent from January, 1867, until his death in December, 1885. A house for the use of the Superintendent has been recently given by Mr. Alexander Duncan, its cost being $20,000. The aim of the institution is to provide suitably for patients of intelligence who are accustomed to comfortable homes, preference being given to those whose cases are likely to prove curable. The capacity of the Hospital is about one hundred and seventy. The rates charged vary from seven to fifty dollars per week, and the institution has a beneficiary fund, which enables it to aid some patients who are unable to pay for the care which their condition demands. A certificate signed by two phy-

sicians, and the written request of a near relative or guardian, are necessary for the admission of a patient. Blank forms will be furnished on application.

MISCELLANEOUS MATTERS.

United States Army Medical Service.

Brigadier-General CHARLES SUTHERLAND, M.D., Surgeon-General, Washington, D. C.

CIRCULAR OF INFORMATION FOR CANDIDATES SEEKING APPOINTMENT IN THE MEDICAL CORPS OF THE UNITED STATES ARMY.

The Medical Corps of the Army consists of a Surgeon-General with the rank of Brigadier-General, six Assistant Surgeons-General with the rank of Colonel, ten Deputy Surgeons-General with the rank of Lieutenant-Colonel, fifty Surgeons with the rank of Major, and one hundred and ten Assistant Surgeons with the rank of First Lieutenant, mounted, for the first five years, and the rank of Captain mounted, thereafter, until promoted to Major. Promotion through the intermediate grades of rank from that of Captain to that of Colonel is by seniority, but there is an examination for the rank of Captain and another for that of Major, to ascertain the fitness of the officer for promotion. Advancement to Lieutenant-Colonel and Colonel takes place without further examination. The Surgeon-General is selected by the President from among the members of the Corps. All vacancies are filled by appointment to the junior grade.

PAY AND EMOLUMENTS.

To each rank is attached a fixed annual salary, which is received in monthly payments, and this is increased by ten per cent for each period of five years' service until a maximum of forty per cent is reached. An Assistant Surgeon with the rank of First Lieutenant, mounted, receives $1,600 per annum, or $133.33 monthly. At the end of five years he is promoted to Captain, and receives $2,000 a year, which, with the increase of ten per cent for five years' service, is $2,200, or $183.33 per month. After ten years' service he receives $2,400, after fifteen years $2,600, and if he remains a Captain after twenty years, $2,800 per year. The pay attached to the rank of Major is

$2,500 a year, which with ten per cent added for each five years' service, becomes $3,250 after fifteen years, and $3,500 after twenty years. The monthly pay of Lieutenant-Colonel, Colonel, and Brigadier-General is $333.33, $375, and $458.33 respectively. Officers in addition to their pay proper are furnished with a liberal allowance of quarters according to rank, either in kind, or where no suitable government building is available, by commutation. When travelling on duty an officer receives four cents per mile and reimbursement of money actually expended for railroad or other fares. On change of station, he is entitled to transportation for professional books and papers and a reasonable amount of baggage at government expense. Mounted officers, including all officers of the Medical Corps, are provided with forage, stabling, and transportation for horses owned and actually kept by them, not exceeding two for all ranks below a Brigadier. Groceries and other articles may be purchased from the Commissary and fuel from the Quartermaster's Department at about wholesale cost price. Books and instruments are supplied in abundance for the use of medical officers in the performance of their duties.

DUTIES AND PRIVILEGES.

A medical officer, after completing the course of instruction at the Army Medical School, will be assigned for some months as junior at a large military post before he is thrown upon his own responsibility. His stations after that are likely to alternate between the frontier and more desirable points, a tour of duty being usually four years at one place.

Leave of absence on full pay is allowed at the rate of one month per year, and this when not taken may accumulate to a maximum of four months, which at the end of four years is then available as one continuous leave. Beyond this an officer may still be absent with permission on half-pay. Absence from duty on account of sickness involves no loss of pay.

Medical officers are entitled to the privilege of retirement at any time for disability incurred in the line of duty, or after forty years' service. On attaining the age of sixty-four, they are placed upon the retired list by virtue of law. Retired officers receive three-fourths of their pay proper at the time of retirement.

EXAMINATION AND APPOINTMENT.

Appointments to the Medical Corps of the Army are made by the President after the applicant has passed a successful examination be-

fore the Army Medical Examining Board and has been recommended by the Surgeon-General. Due notice of the meeting of the Board is usually published in the Medical Journals. The date of meeting is about April and October. Permission to appear before the Board is obtained by letter to the Secretary of War, which must be in the handwriting of the applicant, giving the date and place of his birth and the place and State of which he is a permanent resident, and enclosing certificates based on personal acquaintance from at least two reputable persons as to his citizenship, character, and habits. The candidate must be a citizen of the United States, between twenty-two and twenty-eight years old, of sound health and good character, and a graduate of some regular medical college, in evidence of which his diploma will be submitted to the Board. The scope of the examination will include the morals, habits, physical and mental qualifications of the candidate, and his general aptitude for service; and the Board will report unfavorably should it have a reasonable doubt of his efficiency in any of these particulars.

The physical examination comes first in order, and must be thorough. Each candidate will in addition be required to certify "that he labors under no mental or physical infirmity or disability which can interfere with the efficient discharge of any duty which may be required." Errors of refraction, when not excessive, and not accompanied by ocular disease, and when correctible by appropriate glasses, are not causes for rejection.

The mental examinations are conducted by both written and oral questions, upon —

1. Elementary branches of common-school education, including Arithmetic, the History and Geography of the United States, Physics, and upon General Literature and Ancient and Modern History. Candidates claiming especial knowledge of the Higher Mathematics, Ancient or Modern Languages, Drawing, Analytical Chemistry, or branches of Natural Science, will be examined in those subjects as accomplishments, and will receive due credit therefor according to their proficiency.

2. Professional branches, including Anatomy, Physiology, Chemistry, Physics, Hygiene, Pathology and Bacteriology, Therapeutics and Materia Medica, Surgery, Practice of Medicine, Obstetrics, and the Diseases of Women and Children.

Examinations at the bedside will also be conducted in Clinical Medicine and Surgery, and operations and demonstrations upon the cadaver.

Hospital training and practical experience in the practice of Medicine, Surgery, and Obstetrics are of great importance to candidates

seeking admission to the Medical Corps of the Army, and they will be fully appreciated and duly credited to those who have had such advantages.

The Board has discretion to deviate from this general plan of examination in such manner as it deems best when necessary for the interests of the service.

To save unnecessary expense to candidates, those who desire it may have a preliminary physical examination and a mental examination in the "elementary branches of a common-school education," by a medical officer of the army stationed most conveniently for this purpose, who will act under instructions from the Medical Examining Board.

The merits of the candidates in each of the several branches, and also their relative merit as evinced by the results obtained from the entire examination, will be reported by the Board, and in accordance with this report approved candidates will be appointed to existing vacancies or to such as may occur within two years thereafter. An applicant failing in one examination may be allowed a second after one year, but not a third. No concession will be made for the expenses of persons undergoing examination, but those who receive appointments will be entitled to travel allowances in obeying the first order assigning them to duty.

The medical officers in the United States Army on duty in New England are: —

Major Henry Lippincott, Surgeon, Post Surgeon, Fort Adams, Newport, R.I.

Captain E. F. Gardner, Assistant Surgeon, Attending Surgeon, and Examiner of Recruits, Boston, Mass.

United States Navy Medical Service.

J. R. TRYON, M.D., Surgeon-General, U. S. N., and Chief of Bureau of Medicine and Surgery, Navy Department, Washington, D.C.

CIRCULAR FOR THE INFORMATION OF PERSONS DESIRING TO ENTER THE MEDICAL CORPS OF THE U. S. NAVY.

A candidate for examination and appointment in the Medical Corps of the Navy must be between twenty-one and twenty-six years of age, and must apply to the Honorable Secretary of the Navy for permission to appear before the Naval Medical Examining Board.

The application must be in the handwriting of the applicant, stating age and place of birth, also the place and State of which he is a permanent resident; and must be accompanied by letters or certificates from persons of repute, testifying, from personal knowledge, to his good habits and moral character, and that he is a citizen of the United States.

Candidates will be expected to present to the Board testimonials of educational and professional fitness.

The Board is required, under oath, to report on the physical, mental, moral, and professional qualifications of the candidate; so that the examinations are necessarily rigid and comprehensive, though simple and practical, and not beyond the attainments of any well-educated physician.

A successful candidate, upon the completion of his examination, will be notified by the President of the Board that he has been found qualified.

An applicant found "not qualified" may be allowed a second examination after one year, but not a third.

No allowance will be made for the expenses of persons undergoing examination, which, if uninterrupted, is usually completed within a week.

Appointments will be made as vacancies occur, and in the order of merit reported by the Board, but a qualified candidate, not appointed within a year, must be re-examined.

The officers of the Medical Staff of the Navy are as follows: Medical Directors, Medical Inspectors, Surgeons, Passed Assistant Surgeons, and Assistant Surgeons.

Vacancies in these grades (by death or retirement at the age of sixty-two years) are filled in the order of seniority, and for each step

of promotion a physical and professional examination is required by law.

The pay of an Assistant Surgeon in the Navy is $1,000 per annum "on leave or waiting orders," $1,400 "on shore duty," $1,700 "at sea," and, when at sea, one ration at thirty cents per diem in addition.

Eight cents a mile is the allowance when travelling under orders.

ORDER OF EXAMINATION.

The Physical Examination will be very thorough, and the candidate will be required to certify, under oath, that he is free from any mental, physical, or constitutional defects, hereditary taint, or disability of any kind that would be liable to interfere with the efficient performance of duty.

Oral Examination. — The candidate will be examined orally upon his literary and scientific acquirements, including General History, Natural Science, Botany, Geology, Zoology, and English Literature; and professionally upon Anatomy (general, special, and surgical), Histology, Physiology, Theory and Practice of Medicine, Principles and Practice of Surgery, Chemistry, Legal Medicine, Toxicology, Materia Medica, Therapeutics, Pharmacy, Obstetrics and Diseases of Women and Children, Hygiene, Microscopy, and Physics.

Candidates possessing special knowledge of the higher Mathematics, Astronomy, Literature, Art, and Ancient and Modern Languages, will be given full credit for their proficiency.

Written Examination. — The candidate will be required to address a letter to the Board of Examiners, stating concisely —

1. The date and place of his birth; the school, institution, or college at which he received his general education; the several branches studied, including his knowledge of general literature, and of the ancient and modern languages; the exact title of the medical school or schools at which he received instruction, and, if an alumnus, the date of his graduation; the name and place of residence of his preceptor, and the time when he commenced the study of Medicine; also the title of the text-books studied or read on Chemistry, Anatomy, Physiology, Histology, Materia Medica, Pharmacy, Therapeutics, Pathology, Theory and Practice of Medicine, Microscopy, Principles and Practice of Surgery, Minor Surgery or Mechanical Therapeutics, Medical Jurisprudence, Toxicology, Obstetrics, Hygiene, Biology, and Physics.

2. The opportunities he has had of engaging in the practice of Medicine, Surgery, and Obstetrics, or of receiving clinical instruction; or

whether he has or has not been a resident physician or interne in a civil or military hospital.

3. The number of subjects or parts of subjects he has dissected; what opportunity he has had to become familiar with minor surgery and bandaging, chemical and pharmaceutical manipulations, and the physical properties of drugs.

The candidate will append to this letter his name in full, post-office address, and his local address at the date of the examination.

A thesis or short essay must next be written (without reference to notes or books) upon some professional or scientific subject indicated by the Board.

Written answers will be required on the following subjects propounded by the Board: —

Anatomy, Histology, Physiology, Surgery, Theory and Practice of Medicine, Pathology, Obstetrics, Materia Medica and Physiological Action of Drugs, Chemistry, Legal Medicine, Hygiene, Quarantine, Toxicology, Physics, Botany, Geology, Zoology, and General Literature.

The Clinical Examination of Patients will be made by the candidate at a Naval Hospital, and will include the use of the Microscope, Thermometer, Laryngoscope, Ophthalmoscope, and other aids to physical diagnosis; after which he will be required to submit a written clinical report on one or more medical or surgical cases.

The Practical Examination will comprise surgical operations on the cadaver, the application of splints, bandages, and surgical dressings, the use of the microscope (for clinical purposes, and the recognition of pathological or other specimens), and Chemical and Pharmaceutical manipulations.

A candidate may withdraw at any period of the examination, with the consent of the Board, and may at a future time present himself for re-examination.

The Board may conclude the examinations — written, oral, or practical — at any time, and may deviate from this general plan in such manner as it may deem best to insure the interests of the Naval Service.

United States Marine Hospital Service.

WALTER WYMAN, M.D., Supervising Surgeon-General, Washington, D.C.

The Marine Hospital Service of the United States, which furnishes medical and surgical relief to the sick and disabled seamen of the American mercantile marine, was established by Act of Congress, July 16, 1798, and

reorganized by Acts of Congress, June 29, 1870, and March 3, 1875. The Service is under the charge of a Supervising Surgeon-General, who is appointed by the President, by and with the advice of the Senate, and who is charged by law, under the direction of the Secretary of the Treasury, with the supervision of all matters connected with the Marine Hospital Service of the United States, and with the disbursement of the fund.

Relief is furnished to seamen at nearly one hundred ports of the ocean, gulf, and inland waters, either in hospitals established and maintained by the government exclusively for seamen, or in private or municipal institutions, with which arrangements are made from time to time. During the year ending June 30, 1890, 50,671 patients received relief from the service, of whom 14,587 were treated in the hospitals, and 36,084 at the dispensaries. During the fiscal year ending June 30, 1890, there were treated in the Marine Hospital at the port of Boston, Mass., 890 patients, and at the out-patient department in the Custom House 1,379 cases, making a total of 2,270 cases.

The current expenses of the service are met by the receipts from the tax on tonnage on vessels entering the ports of the United States; and the buildings and equipments are furnished out of the annual appropriations for public buildings. A sick or disabled seaman, to obtain relief, must apply to a medical officer of the Marine Hospital Service, or where there is no such officer at the port. to a United States collector of customs, and must furnish evidence that he has been actually employed as an American seaman. Relief is not furnished to indigent seamen, not sick or disabled, or to seamen who have abandoned their vocation for any other employment.

In addition to its work of extending relief to the sea-

men of the merchant-marine and allied services, the Marine Hospital Bureau supervises the national quarantines under the Act of Aug. 1, 1888, and in time of epidemics takes charge of the measures employed for the restriction and suppression of the disease, under the Act of March 28, 1890. The permanent quarantine stations are at Delaware Breakwater, Del.; Cape Charles, Va.; Sapelo Sound, Ga.; Dry Tortugas, Fla.; North Chandeleur Island, Miss.; San Diego, Cal.; San Francisco, Cal.; and Port Townsend, Wash. The stations are under the control of medical officers of the service, who board and inspect all incoming vessels from foreign ports, and subject those from infected and suspected ports to thorough disinfection, and detention in quarantine for the required period of time.

Physical examinations of applicants for enlistment into the Revenue-Marine and Life-Saving services, and of pilots for color-blind men, are conducted by the officers of the corps.

The Medical Corps consists of the Supervising Surgeon-General, Surgeons, Passed Assistant Surgeons, and Assistant Surgeons. Appointments to the service are made, after examination by a board of surgeons, to the grade of Assistant Surgeon. The service makes use of the nomenclature of diseases adopted by the Royal College of Physicians of London, and of the decimal (metric) system for all weights and measures. A report of its transactions is issued annually.

The district of the North Atlantic embraces the following-named relief stations; namely, Bangor, Maine; Barnstable, Mass.; Bath, Maine; Belfast, Maine; Boston, Mass.; Bristol, R.I.; Burlington, Vt.; Castine, Maine; Eastport, Maine; Edgartown, Mass.; Ellsworth, Maine; Fall River, Mass.; Gloucester, Mass.; Kennebunk, Maine; Machias, Maine; Marblehead, Mass.; Nantucket, Mass.; New

Bedford, Mass.; Newburyport, Mass.; Newport, R.I.; Plattsburg, N.Y.; Plymouth, Mass.; Portland, Maine; Portsmouth, N.H.; Providence, R.I.; Rockland, Maine; Saco, Maine; Salem, Mass.; Vineyard Haven, Mass.; Waldoboro', Maine; Wiscasset, Maine.

The district of the Middle Atlantic includes Bridgeport, Conn.; Hartford, Conn.; Middletown, Conn.; New Haven, Conn.; New London, Conn.; and Stonington, Conn.

All relief stations where the service is under the charge of a medical officer of the Marine Hospital Service are known as relief stations of Class 1. Relief stations where specific arrangements have been made for the care and treatment of sick or disabled seamen at rates fixed by the Treasury Department, but where collectors of customs, on account of the absence of a medical officer of the service, are authorized and required to issue permits, and to supervise the relief furnished, are known as relief stations of Class 2. All other ports where there are officers of the customs revenue, but where, on account of the infrequency of applications for relief, the absence of any hospital, or from other causes, sick or disabled seamen are cared for only in cases of emergency, are known as relief stations of Class 3.

The Marine Hospital for the Port of Boston was originally established in Charlestown in 1802; a second building was built at Chelsea in 1825–27. The present building, which has accommodations for 100 patients, cost $394,424, and was completed and occupied about 1860. The office dispensary for the reception of patients and for the treatment of those not requiring hospital relief, is at the Custom House in Boston. (*Tele.*, Hospital and office.) The Marine Hospital at Portland has accommodations for 50 patients, and is situated about three miles from the centre

of the city on Casco Bay. The Hospital was commenced in 1852, and completed in 1859, at a cost of $122,837. About 800 patients are annually treated. The service has a hospital at Vineyard Haven, Mass.

State Board of Health, Massachusetts.

State House, Boston. (*Tele.*)

The State Board of Health of Massachusetts was established in 1869. Its proceedings may be found in its set of Reports beginning with that year.

After an existence of ten years, its powers were transferred to the newly established Board of Health, Lunacy, and Charity; and for seven years from 1879, the public sanitary interests of the State were supervised by that Board.

In 1886, the State Board of Health was re-established with considerably enlarged powers and duties by the enactment of the following law: —

SECTION 1. The Governor, with the advice and consent of the Council, shall appoint seven persons who shall constitute the State Board of Health. The persons so appointed shall hold their offices for seven years; provided that the terms of office of the seven first appointed shall be so arranged that the term of one shall expire each year. All vacancies on said Board, whether occurring by expiration of term, or otherwise, shall be filled by the Governor, with the advice and consent of the Council.

SECT. 2. The Board shall be provided with rooms at the expense of the State, and shall hold meetings each month on a day fixed by itself, and at such other times as may be needful. It shall make its own by-laws, and shall make a report of its doings to the Governor and Council on or before the thirty-first day of December in each year, such report being made up to the thirtieth day of September inclusive.

The remaining sections of the Act relate to the election and duties of the Secretary, the expenses of the Board, and the numerous amendments of the statutes which were essential to the establishment of the Board, and its separation from the State Board of Health, Lunacy, and Charity.

The general powers and duties of the Board are defined by the following statutes, which are substantially the same as those enacted in 1869: —

CHAP. 80, SECT. 1. The State Board of Health shall take cognizance of the interests of health and life among the citizens of the Commonwealth. It shall make sanitary investigations and inquiries in respect to the causes of disease, and especially of epidemics and the sources of mortality and the effects of localities, employments, conditions, and circumstances, on the public health; and shall gather such information in respect to those matters as it may deem proper for diffusion among the people. It shall advise the government in regard to the location and other sanitary conditions of any public institutions.

If small-pox or any other contagious or infectious disease danger-

ous to the public health exists, or is likely to exist in any place within the State, the State Board shall investigate the same, and the means of preventing the spread thereof, and shall consult thereon with the local authorities, and shall have co-ordinate powers as a Board of Health, in every place, with the Board of Health or health officer thereof, or with the mayor and aldermen or the selectmen, if no such Board or officer exists in such place.

In addition to the general duties defined above, certain other duties have from time to time been intrusted to the Board, such as the power to prohibit noxious or offensive trades or occupations (Pub. Stat. chap. 80, § 93), and the regulation and location of swine-slaughtering associations.

To these have also been added in later years two important Acts giving to the Board supervision of food and drugs (Acts of 1882, chap. 263, and 1884, chap. 289), and also of water-supplies and drainage (chap. 274, Acts of 1886, chap. 375, Acts of 1888, and chaps. 124 and 441, Acts of 1890), and also certain authority relative to ice supplies and the establishment of crematories.

The State Board of Health, by the provision of certain Acts of 1882, 1883, and 1884, is intrusted with the inspection of food and drugs as sold in Massachusetts. For this purpose it is authorized to expend $11,500 annually in carrying out the provision of the Food and Drug Acts; three-fifths of this appropriation must be devoted to the enforcement of the laws for the prevention of the adulteration of milk and milk products.

Under these Acts about 60,000 samples of food and drugs have been examined by the analysts of the Board, at least 1,000 prosecutions have been conducted against offenders, and the actual advantage secured to the people has been of a two-fold nature; that is, in the direction of public health, and also of public economy, since the saving which has been gained in the quality of the food-supply

has been many times greater than the cost of enforcing the statutes.

The analytical work of this department is now conducted at the Laboratory of the Board in the State House Annex. The work of the Board in this direction has been re-organized, and is now in charge of the following analysts: —

Analyst. — C. P. Worcester, M.D.
Assistant Analyst. — Albert Leach.

In 1886, the Board was empowered to have the general oversight and care of all inland waters, and by a resolve of the same Legislature the property of the Drainage Commission, including its maps and plans, was turned over to the Board of Health. In 1888, an amendment was enacted providing that all petitions to the Legislature for authority to introduce systems of water-supply and sewerage be accompanied by copies of the recommendation and advice of the Board. The important work of the Board which has been accomplished under the provisions of this Act was published in two special volumes upon water-supply and sewerage, issued in 1890, and continued in the succeeding Annual Reports of the Board. The following officers were appointed by the Board for the purpose of carrying out the provisions of the Act:

Consulting Engineer. — J. P. Davis.
Chief Engineer. — F. P. Stearns.
Assistant Engineer. — X. H. Goodnough.
Chemist. — T. M. Drown, M.D.
Biologist. — W. T. Sedgwick.

In addition to the routine work of the Board, other important duties have been intrusted to it in recent years, as follows: —

In 1887, by the provisions of chap. 95 of that year, the Board was charged with the duty of considering and report-

ing upon a system of sewerage for the cities and towns embraced in the Mystic and lower Charles River valleys. This report was made in January, 1889, and the work, involving an expenditure of about $5,000,000, is nearly completed, and substantially upon the plan reported by the Board.

Another important Act of 1893, chap. 459, instructed the Board to investigate and report upon a water-supply for the Metropolitan district, comprising Boston and the suburban cities and towns within a circuit of ten miles. This report will be made to the Legislature early in 1895.

Other important questions recently submitted to the Board are a plan for the improvement of the lower Charles River valley (chap. 475 of the Acts of 1893), the removal of obstructions from the Concord and Sudbury rivers (chap. 426, Acts of 1894), the investigation of the pollution of ice-supplies, the manufacture of artificial ice, and the question of the amount of arsenic in wall-papers.

The following persons compose the Board: —

H. P. Walcott, M.D. J. W. Hastings, M.D. G. C. Tobey.
F. W. Draper, M.D. H. F. Mills, C.E. J. W. Hull.
C. H. Porter.

Board of Lunacy and Charity, Massachusetts.

State House, Boston. (*Tele.*)

The Legislature of 1879 established the State Board of Health, Lunacy, and Charity, at the same time abolishing the Board of State Charities, organized in 1863, and the Board of Health and Vital Statistics, organized in 1869.

The Legislature of 1886 passed an Act (chap. 101) re-establishing the State Board of Health. By the operations of this Act the health functions of the State Board of

Health, Lunacy, and Charity are withdrawn from it, and the word "Health" is stricken from the title. In all other respects the Board remains as before. The Act went into operation June 1, 1886.

The Board has general supervision over all the State charitable institutions, including the State Lunatic Hospitals, State Almshouse, State Farm, State Primary School, Lyman School for Boys, and Industrial School for Girls.

Regular meetings of the Board are held on the first Saturday of each month at the office of the Board in the State House.

State Board of Health, Vermont.

Incorporated by the Legislature of Vermont, November, 1880. Consists of six members, who, with the Secretary, constitute a Board, to meet once in two years.

Secretary.—J. H. Hamilton, M.D., Richford.

State Board of Health, Rhode Island.

Incorporated by the Legislature of the State in 1878 (G. S. 680). The Board consists of six persons (three of whom must be physicians), two from the County of Providence, and one from each of the other counties, and takes cognizance of the interests of life and health among the citizens of the State, makes investigations into the causes of disease, and especially of epidemics and endemics among the people, and other topics of general interest. They also have charge of the registration of births, marriages, and deaths. The Board meets at its office in Providence on the first Wednesday of July, October, January, and April.

The office of the Secretary is open daily from one to three o'clock. An Annual Report is published. The Secretary is *ex-officio* a member of the Board, the Commissioner of Public Health, and State Registrar.

MEMBERS OF THE BOARD.

H. E. Turner, M.D., Newport County, Chairman.
S. M. Gray, C.E., Providence County.

Board of Health.

Newport, R.I.

Organized by city ordinance, Feb. 6, 1885.

Secretary. — W. C. Rives, Jr., M.D.

Sanitary Protective Association.

Newport, R.I.

Established Nov. 11, 1878, and incorporated in 1879, for the following objects: —

1. To provide its members, at moderate cost, with such advice and supervision as shall insure the proper sanitary condition of their own dwellings.

2. To enable members to procure practical advice, on moderate terms, as to the best means of remedying defects in houses of the poorer class, in which they may be interested.

3. To aid in improving the sanitary condition of the city.

Persons become members upon payment of an annual subscription, which, for original members, is limited to six dollars for permanent residents of Newport, and ten dollars for those whose houses are closed for a portion of the year; this difference being based upon the fact that premises continuously occupied are more likely to be kept in good order, and therefore to require less rigid and extensive examination. Membership shall cease upon failure at any time to pay this annual subscription within three months after it shall have become due.

Official Agents of Boards of Registration and Vital Statistics.

The following persons are designated as the official agents, and may be addressed, by title, for information desired: —

Massachusetts, Secretary of State, Boston.

Maine, Secretary of State Board of Health, Augusta.

New Hampshire, Secretary of State Board of Health, Concord.

Vermont, Secretary of State, Montpelier.

Rhode Island, Secretary of State Board of Health, Newport.

Connecticut, Secretary of State Board of Health, Hartford.

The Massachusetts Medical Examiner System.

The method of inquiry now employed in Massachusetts in cases of death by violence is no longer a matter of mere experiment. The law enacted in 1877, known as the Medical Examiner Law, effected a radical change throughout the State, whereby the old coroner system was abolished and an entirely different plan of operation was substituted in its place.

The principal points of importance in the present law are, — the abolition of the coroner's jury, and the proper division of the investigation into its medical and its legal parts, the former being intrusted to intelligent, educated medical men, and the latter to properly qualified legal officers. A similar process has been the rule for centuries among all the continental nations of Europe, and also in Scotland.

In proof that the present system of Massachusetts has been a thoroughly successful one, and also perfectly satisfactory to the people as well as to the medical and the legal profession, it is only necessary to state that since its introduction in 1877, nearly 25,000 cases of violent, sudden, and suspicious death have been investigated in a satisfactory manner in Massachusetts.

Medical examiners are appointed by the Governor, by and with the consent of the Council, for the term of seven years. The counties are divided into districts as shown below; but medical examiners are authorized to act at any place within the county for which they have been appointed. The law governing medical examinations is given in full on a later page.

Practice of Medicine.

The following laws govern the Practice of Medicine in the New England States: —

MASSACHUSETTS.

[Chapter 458, Acts of 1894.]

SECT. 1. The governor, with the advice and consent of the council, shall appoint seven persons, residents in this Commonwealth, who shall be graduates of a legally chartered medical college or university having the power to confer degrees in medicine, and who shall have been actively employed in the practice of their profession for a period of ten years, who shall constitute a Board of Registration in Medicine. Such persons shall be appointed and hold office for terms of one, two, three, four, five, six, and seven years, respectively, beginning with the first day of July in the present year, and until their respective successors are appointed, and thereafter the governor, with the advice and consent of the council, shall appoint, before the first day of July in each year, one person qualified as aforesaid, to hold office for seven years from the first day of July next ensuing. No member of said board shall belong to the faculty of any medical college or university. Vacancies in said board shall be filled in accordance with the provisions of this Act for the establishment of the original board, and the person appointed to fill a vacancy shall hold office during the unexpired term of the member whose place he fills. Any member of said board may be removed from office for cause by the governor, with the advice and consent of the executive council, and not more than three members of said board

shall at one time be members of any one chartered State medical society.

Sect. 2. The members of said board shall meet on the second Tuesday of July next, at such time and place as they may determine, and shall immediately proceed to organize by electing a chairman and secretary, who shall hold their respective offices for the term of one year. The secretary shall give to the treasurer and receiver-general of the Commonwealth a bond in the penal sum of five thousand dollars, with sufficient sureties to be approved by the governor and council, for the faithful discharge of the duties of his office. The said board shall hold three regular meetings in each year, — one on the second Tuesday of March, one on the second Tuesday of July, and one on the second Tuesday of November, — and such additional meetings at such times and places as it may determine.

Sect. 3. It shall be the duty of said board immediately upon its organization to notify all persons practising medicine in this Commonwealth of the provisions of this Act, by publication in one or more newspapers in each county, and every such person who is a graduate of a legally chartered medical college or university having power to confer degrees in medicine, and every person who has been a practitioner of medicine in this Commonwealth continuously for a period of three years next prior to the passage hereof, shall upon the payment of a fee of one dollar be entitled to registration, and said board shall issue to him a certificate thereof signed by the chairman and secretary.

Sect. 4. Any person not entitled to registration as aforesaid shall, upon payment of a fee of ten dollars, be entitled to examination, and if found qualified by four or more members of said board shall be registered as a qualified physician, and shall receive a certificate thereof as provided in section three. Any person refused registration may be re-examined at any regular meeting of said board, within two years of the time of such refusal, without additional fee, and thereafter he may be examined as often as he may desire, upon the payment of the fee of ten dollars for each examination. Said board, after a conviction before a proper court, for crime in the course of professional business, has been shown, and after hearing, may by unanimous vote revoke any certificate issued by them and cancel the registration of the person to whom the same was issued. All fees received by the board under this Act shall be paid by the secretary thereof into the treasury of the Commonwealth once in each month.

Sect. 5. The compensation, incidental and travelling expenses of the board shall be paid from the treasury of the Commonwealth. The compensation of members of the board shall be ten dollars each for every day actually spent in the discharge of their duties, and three cents per mile each way for necessary travelling expenses in attending

the meetings of the board, but in no case shall any more be paid than was actually expended. Such compensation and the incidental and travelling expenses shall be approved by the board and sent to the auditor of the Commonwealth, who shall certify to the governor and council the amounts due as in case of other bills and accounts approved by him under the provisions of law: *provided*, that the amounts so paid shall not exceed the amount received by the treasurer and receiver-general of the Commonwealth from the board in fees as herein specified, and so much of said receipts as may be necessary is hereby appropriated for the compensation and expenses of the board as aforesaid.

SECT. 6. The board shall keep a record of the names of all persons registered hereunder, and a record of all moneys received and disbursed by said board, and said records or duplicates thereof shall always be open to inspection in the office of the secretary of the Commonwealth. Said board shall annually report to the governor, on or before the first day of January in each year, the condition of medicine and surgery in this Commonwealth, which report shall contain a full and complete record of all its official acts during the year, and shall also contain a statement of the receipts and disbursements of the board.

SECT. 7. It shall be the duty of the board to investigate all complaints of disregard, non-compliance or violation of the provisions of this Act, and to bring all such cases to the notice of the proper prosecuting officers.

SECT. 8. On and after the first day of January in the year eighteen hundred and ninety-five the board shall examine all applicants for registration as licensed physicians or surgeons. Applicants must give satisfactory proof of being twenty-one years of age and of good moral character; and every applicant who is a graduate of and has received a degree of Doctor of Medicine from a legally chartered medical college or university having power to confer degrees in medicine in this Commonwealth, shall be entitled *prima facie* to be registered under this Act, upon the payment of the fees herein provided.

SECT. 9. Examinations shall be, in whole or in part, in writing, and shall be of an elementary and practical character. They shall embrace the general subjects of surgery, physiology, pathology, obstetrics, and practice of medicine, and shall be sufficiently strict to test the qualifications of the candidate as a practitioner of medicine.

SECT. 10. Whoever, not being registered as aforesaid, shall advertise or hold himself out to the public as a physician or surgeon in this Commonwealth, by appending to his name the letters "M.D.," or using the title of doctor, meaning thereby a doctor of medicine, shall be punished by a fine of not less than one hundred nor more than five hundred dollars for each offence, or by imprisonment in jail for three months, or both.

SECT. 11. This Act shall not apply to commissioned officers of the

United States army, navy, or marine hospital service, or to a physician or surgeon who is called from another State to treat a particular case, and who does not otherwise practise in this State, or to prohibit gratuitous services, nor to clairvoyants, or to persons practising hypnotism, magnetic healing, mind cure, massage methods, Christian science, cosmopathic or any other method of healing: *provided*, such persons do not violate any of the provisions of section ten of this Act.

SECT. 12. For the purposes of the appointment of said board, and of registration of persons by it hereunder, this act shall take effect upon its passage, and shall take full effect on the first day of January in the year eighteen hundred and ninety-five. [*Approved June* 7, 1894.]

Members of the Board. — Drs. C. E. Miles, Chairman; E. J. Forster, Secretary; A. L. Chase, D. B. Whittier, W. P. Bowers, S. H. Blodgett, A. C. Walker.

MAINE.

SECT. 9, Chapter 13, Laws of 1883, enacts that: No person who has not received a medical degree at a public medical institution in the United States, or a license from the Maine Medical Association, shall recover compensation for medical or surgical services, unless previous to such service he had obtained a certificate of good moral character from the municipal officers of the town where he then resided.

In 1885 an effort was made at the session of the legislature to pass a bill, of which the following were the provisions: Graduates of institutions legally qualified to confer medical degrees, and all who had practised without a diploma for thirteen or more years continuously, should be allowed to register. All persons practising medicine without having been registered should be deemed guilty of a misdemeanor, and, on conviction thereof, be punished by a fine of from one to five hundred dollars, or by imprisonment of from three to twelve months, or both.

This bill was favored by the better elements of all sects; but a combination was made against the bill, and it was defeated by a small majority in the house. It had passed the Senate quite unanimously.

In 1887 a bill to regulate the practice of medicine in the State was passed by both houses, but was vetoed by the governor.

NEW HAMPSHIRE. (No Law.)

VERMONT.

SECT. 3908, Revised Laws, 1880. Medical societies, organized under a charter from the General Assembly, shall, at each annual session,

elect a board of censors, consisting of three members, who shall hold their office till others are elected; which board may examine and license practitioners of medicine, surgery, and midwifery.

SECT. 3909. A practitioner of medicine, surgery or midwifery, who, by sign or advertisement, offers his services to the public as practitioner of either medicine, surgery, or midwifery, or who, by such sign or advertisement, assumes the title of doctor, shall obtain a certificate from one of such medical societies, either from a county, district, or State society.

SECT. 3910. A person not a resident of this State, who has not received a diploma from a chartered medical college, shall obtain a certificate from a board of censors in this State before he shall be permitted to practise the medical art in this State.

SECT. 3911. Each board of censors shall issue certificates without fee, to physicians and surgeons who furnish evidence, by diploma from a medical college or university, or by certificate of examination from an authorized board, which satisfies said censors that the person presenting such credentials has been, after due examination, deemed qualified to practise the branches mentioned in such diploma or certificate.

SECT. 3912. The censors of each medical society aforesaid shall, in their discretion, notify practitioners of medicine, surgery, or midwifery of the terms of this chapter, and shall require such persons to comply therewith within thirty days after such notification, or within such further time as is allowed by the censors, not exceeding ninety days.

SECT. 3916. A person who practises medicine, surgery, or midwifery in the State or signs a certificate of death for purposes of burial or removal, unless authorized so to do, by a certificate and recorded as provided, shall for the first offence be fined not less than fifty dollars nor more than two hundred dollars, and for a subsequent offence, not less than two hundred dollars nor more than five hundred dollars, which fine may be recovered in an action of debt for the use of any person who sues therefor or by an indictment.

RHODE ISLAND. (No Law.)

CONNECTICUT.

SECT. 1. No person, after the first day of October, 1893, shall, in this State, for compensation, gain, or reward, received or expected, treat, operate, or prescribe for any injury, deformity, ailment, or disease, actual or imaginary, of another person, nor practise surgery or midwifery, unless or until he has obtained a certificate of registration as hereinafter provided, and then only in the kind or branch of practice

as stated in said certificate; but this Act shall not apply to dentists while practising dentistry only; nor to any person in the employ of the United States government while acting in the scope of his employment; nor to any person who shall furnish medical or surgical assistance in cases of sudden emergency; nor to any person residing out of this State who shall be employed to come into the State to assist or consult with any physician or surgeon who has been registered in conformity with the provisions of this Act; nor to any physician or surgeon then actually residing out of this State who shall be employed to come into this State to treat, operate, or prescribe for any injury, deformity, ailment, or disease from which any person is suffering at the time when such non-resident physician or surgeon is so employed, nor to any actual resident of this State recommending, by advertisement or otherwise, the use of proprietary remedies sold under trade-marks issued by the United States government; nor to any chiropodist or clairvoyant who does not use in his practice any drugs, medicines, or poison; nor to any person practising the massage method, or Swedish movement cure, sun cure, mind cure, magnetic healing, or Christian science; nor to any other person who does not use or prescribe in his treatment of mankind, drugs, poisons, medicine, chemicals, or nostrums.

SECT. 2. Any resident of this State who at the time of the passage of this Act shall be, or previously thereto has been, actually engaged in this State in the practice of medicine, surgery, midwifery, or any alleged practice of healing, may, before the first day of October, 1893, file with the State Board of Health duplicate statements subscribed and sworn to by him upon blanks furnished by said board. . . . Upon the receipt of such statements, as aforesaid, the State Board of Health shall issue, upon the receipt of two dollars, to the person filing the same, a certificate of registration which shall state the kind or branch of practice in which the person named therein is engaged.

SECT. 3. Any person who shall, subsequent to said first day of October, 1893, file with said State Board of Health duplicate statements in the form prescribed in the preceding section, showing that he is a graduate of a medical college which is recognized as reputable by any one of the chartered medical societies of the State, shall receive from said State Board of Health, upon the payment of two dollars, a certificate of registration, which shall state the kind or branch of practice in which the person named therein is engaged or is to be engaged.

SECT. 4. Any person residing in any town in another State which town adjoins the boundary line of Connecticut, who at the time of the passage of this Act shall be actually engaged in such town in the practice of medicine, surgery, or midwifery, or any branch of practice, may, before the first day of October, 1893, obtain from the State Board of Health of this State a like certificate of registration. . . .

SECT. 5. Except as provided in sections two, three, and four of this

Act, no person shall, after the first day of October, 1893, obtain or receive a certificate of registration, as required by the provisions of section one, until he has passed a satisfactory examination before a committee to be appointed for the purpose by the State Board of Health, as hereinafter provided. . . .

SECT. 6. During the month of December, 1893, The Connecticut Medical Society, The Connecticut Homeopathic Medical Society, and The Connecticut Eclectic Medical Association, shall each file with the State Board of Health the names of five physicians . . . who shall have been recommended by the respective medical societies as persons competent to serve upon the examining committees to be appointed by the State Board of Health as hereinafter provided. . . .

SECT. 7. In the month of January, 1894, the State Board of Health shall appoint three examining committees, each consisting of five physicians, which committees shall severally be composed wholly of the persons nominated by one of the said medical societies respectively, as aforesaid. . . .

SECT. 8. The State Board of Health shall designate when and where said committees shall hold said examinations, but shall call a meeting of a committee within thirty days after receipt of application for examination by it. Applicants to practise medicine or surgery shall be examined in anatomy, physiology, medical chemistry, obstetrics, hygiene, surgery, pathology, diagnosis, and therapeutics, including practice and materia medica. Each committee shall frame its own questions and conduct its examinations in writing, and both questions and answers shall be placed on file with the State Board of Health. Each applicant shall have the right to choose which of the three committees shall be the one by whom he shall be examined; but before taking such examination, he shall pay to the committee their expenses, not exceeding, however, the sum of ten dollars. An applicant, after having been rejected by any of said examining committees, shall not be eligible to examination by another committee of examination until after the expiration of twelve months.

SECT. 10. The secretary of each of said medical societies shall file with the secretary of the State Board of Health a list of medical colleges or institutions recognized as legal and reputable by his society; or all of such secretaries may agree upon a single list; and such list or lists may be corrected from time to time as may be necessary.

SECT. 11. Every person violating any of the provisions of section one of this Act shall be deemed guilty of a misdemeanor, and on conviction shall be punished by a fine of not less than one hundred nor more than three hundred dollars for the first offence, and for each subsequent offence by a fine of not less than two hundred nor more than five hundred dollars, or by imprisonment in the county jail for not less than thirty nor more than ninety days, or by both such fine and im-

prisonment; the fine, when collected, shall be paid one half to the person or corporation making the complaint, and the other half to the State Board of Health.

SECT. 12. Any person who shall swear to any false statement contained in any statement required by this Act to be filed with the State Board of Health, shall be deemed guilty of perjury and be punished accordingly.

SECT. 15. The provisions of this bill shall not apply to licensed pharmacists.

SECT. 16. All physicians or surgeons practising under the provisions of this Act shall, when requested, write a duplicate of their prescriptions in the English language. Any person who shall violate the requirements of this section shall pay a fine of not less than ten dollars for each and every offence.

APPROVED May 25, 1893.

Training-Schools for Nurses.

The training of women desirous of becoming professional nurses is carried on in schools connected with many of the hospitals of New England. The plans and methods therein adopted are substantially the same in all; a résumé of such plans is given immediately following, in which most of the points on which information is desired are given.

The course of training and practice for nurses generally requires two years, and includes general medical and surgical nursing, together with ophthalmic, aural, and gynecological nursing, and also the nursing of contagious diseases. Maternity nursing is theoretically taught.

The most desirable age for candidates is from twenty-three to thirty-five years. They must be of sound health, and should send with their application a certificate from a physician, certifying to the fact. They should also send a brief personal history, and give the names and addresses of responsible persons not of their own kin who know of their good character and capabilities. Candidates are generally received for one or two months on probation.

The Superintendent of Nurses has the immediate charge of the Training-School, under the authority of the Superintendent of the Hospital and of the Trustees, and the nurses are subject to the rules of the Hospital, as in any other service of the institution.

Their fitness for the work, and the propriety of retaining or dismissing them at the end of the month of trial, is determined by the resident Physician of the Hospital and the Superintendent and Directors of the school; and the same authorities can also discharge them at any time, in case of misconduct or inefficiency. They serve as assistant nurses in the wards of the Hospital.

Those fulfilling the conditions of the probationary period are accepted as pupils. They must sign a written agreement to remain at the school for a definite period.

All nurses are required to be sober, honest, truthful, trustworthy, punctual, quiet, orderly, cleanly, neat, patient, kind, and cheerful.

The instruction includes the general care of the sick, the making of beds, changing bed and body linen, management of helpless patients in bed, etc.; giving baths, keeping patients warm or cool; prevention and dressing of bedsores, and proper management of the patient under various conditions, with different diseases or injuries; the making and applying of bandages and rollers, preparation of splints, application and management of surgical apparatus; applying fomentations and poultices; the dressing of burns, ulcers and wounds, and other minor dressings, cupping, leeching, and subsequent treatment; the administering of enemas and use of the female catheter.

Nurses are taught how to act in the various emergencies occurring in hospital and private nursing, as well as in the accidents of ordinary life. They are also given lessons in elementary *massage* and the application of friction to the body and limbs in the best method. There is a systematic course of training in cookery for the sick, the serving of food and delicacies in the proper manner, and the feeding of helpless patients, or those who resist food.

Instruction is also given in the best practical methods of

supplying fresh air, of warming and ventilating sick-rooms in a proper manner, and the proper care of sick-rooms for the best good and comfort of the patient; in keeping all utensils and appliances perfectly clean and disinfected; in making accurate observations of the pulse, temperature, respiration, expectorations, the secretions, state of the skin, and eruptions; of mental condition as to delirium, stupor, shock, etc.; of the condition as to sleep, appetite, effects of diet or of stimulants and medicines; the behavior of wounds, and the after-treatment in surgical operations; and the managing of convalescents. Nurses are taught the administering of medicines, and the application of external remedies, how to take notes on cases, the making up of the nurse's record, and the reports to the attending doctor.

The course of training includes a fixed course of instruction during the two years from manuals and text-books, mainly given by the Superintendent of Nurses. Lectures and demonstrations, chiefly upon practical points, are given at stated times by the medical and surgical staff of the Hospital. While the instruction by the manuals, text-books, lectures, demonstrations, quizzes, and models is considerable, the main reliance is upon accurate daily drill in the wards, operating-rooms, and other departments of the Hospital. Examinations, both written and oral, are held from time to time by the authorities of the school and by the Hospital Staff, and nurses cannot pass to graduation unless attaining, on critical marking, a certain per cent.

Probationers are not paid during their first month, but for the remaining months of their pupilage they receive sufficient to pay for the expenses of their uniform, personal clothing, and other minor requirements. This sum is in no wise intended as wages, it being considered that

their education during this time is a full equivalent for their services. When the full term of two years is completed, the nurses receive, if they pass all the examinations and are otherwise satisfactory, a diploma certifying to the regular course of training and practice.

The majority of graduates engage in private nursing, but some are invited to remain in the service of the Hospital as head nurses. Such graduate head nurses as prefer to remain in hospital work are given post-graduate instruction in ward management, hospital house-keeping, and minor administration.

The school year has no fixed date, but accepted candidates may enter at any time as vacancies occur. They are, as a rule, received in the order of acceptance, but those desiring to enter with less delay can generally anticipate a fixed date by placing themselves on the emergency list. When coming to the Hospital, they should bring with them the following articles: Two or three gingham or calico dresses, made plainly; six large white aprons, made of bleached cotton, with bibs, plain at the top and gathered slightly at the bottom; two bags for soiled clothes; one pair of scissors, a pin-ball, and a napkin-ring; a good supply of plain underclothing, — every article to be distinctly marked with the owner's name.

Nurses must bring suitable outer-garments for all kinds of weather, and they are required to wear broad-toed and flat-heeled boots. If the teeth are out of order in any way, they must receive attention before coming for the probationary month. Nurses are required to wear the training-school uniform after they join the school. Material for dresses will be sold at cost price; caps are furnished free of charge.

Hours of duty for day nurses are from 7 A. M. to 8 P. M.; for night nurses from 8 P. M. to 7 A. M. No nurse is re-

quired to do both day and night duty on the same day, except in rare emergencies. Each nurse on day duty is allowed one hour after 2 o'clock P. M., for rest and recreation, one half day after 2 o'clock P. M. each week, and four hours on Sunday. Two weeks' vacation is allowed each year. If nurses are sick, they are cared for in the Hospital, but wages are stopped. Nurses on night duty are required to be in bed until 4 P. M. Nurses may be called upon for four months' night duty during the two years' training.

Directory for Nurses.

Medical Library, 19 *Boylston Place, Boston, Mass.* (*Tele.*)

The Directory was established Nov. 24, 1879. It has the names of seven hundred and thirty-five nurses on its list, and is able to meet all cases promptly at a great saving of time and expense to those requiring nurses.

A record is kept of the names and addresses of nurses, their present and future engagements, prices, the particular kind of nursing for which they are best fitted, and other details likely to be of service to those wishing to secure the service of a nurse for illness of any kind.

Prices of Nurses. — Trained Hospital nurses, from twenty-one to twenty-five dollars per week. Experienced nurses, from ten to fifteen dollars per week. Male nurses, first-class, thirty-five dollars per week; second class, twenty-one dollars per week.

N. B. — Both nurses and applicants for nurses are hereby notified that the Directory will not make any terms of employment for them. It only undertakes to send nurses as applicants for employment, leaving them to make their own terms and arrangements with their employers, except that the nurses have agreed not to charge more than their maximum price, although they are at liberty to take a lower price by special arrangement. Nurses who do not charge an extra price for contagious diseases, expect one week's extra pay for quarantine if they leave the case while the contagion is still active.

Male and female nurses may be obtained for all cases at any hour of the day or night. Fee, two dollars for each nurse furnished. An extra charge will be made in cases requiring unusual labor or responsibility, as when nurses *are found and sent* in answer to applications by letter, telegram, telephone, etc.

It is earnestly requested that any failure to find a nurse will be promptly reported to the Directory.

Any failure on the part of the nurse to fulfil an engagement should also be similarly reported.

The following suggestions are made in the interest both of the patient and of the nurse: —

In case of absence of a nurse, all messages should be left accurately in writing to insure prompt attention. Never trust merely to the memory of the person answering your call.

The price for service of the nurse, and in confinement cases the definite date at which the engagement is to begin and end, should be agreed upon in writing when the engagement is made.

Travelling expenses should be paid by the patient, and the nurse's washing be done.

A nurse should have sufficient sleep (if possible a continuous time), an hour for exercise in the fresh air every day, and facilities for bathing at suitable intervals.

A lunch or an early meal should be provided for the nurse, if required to sit up at night.

Committee of Management. — C. P. Putnam, M.D., from Library Association. John Homans, 2d, M.D.; Miss Wales, Miss Dixwell, Advisory Committee of Ladies; E. H. Brigham, M.D., Registrar.

South End Diet Kitchen.

37 *Bennet Street, Boston.*

Organized in November, 1875, and incorporated in 1882, at the south part of the city, to provide simple food for the sick. Any person may obtain diet at the kitchen upon presentation of the slip-card of the corporation, signed by a Boston physician of regular standing, by a Bible reader, a city missionary, an officer of the Associated Charities, or by such person as the managers of the Corporation may have authorized to sign such slip-card. The list of articles furnished is the same as that given above. Open from 12 to 1.

OFFICERS.

President. — Mrs. P. C. Brooks.
Treasurer. — Miss C. U. Gordon.
Secretary. — Mrs. F. Cunningham.

The New England Kitchen.

142 *Pleasant Street, Boston.*

Opened Jan. 24, 1890, for the purpose of furnishing to all comers, both sick and well, well-cooked food at reason-

able rates. Meat soups are furnished at twelve cents a quart, pea soup at ten cents, pressed meat for twelve cents a pound, mushes for five cents a pound. Circulars to be obtained from Mrs. M. H. Abel.

Fee Table — Boston (City Proper).

For each visit, either medical, surgical, or obstetrical, in cases of regular attendance, three dollars. For the first visit in a new case, it shall be considered proper to make a charge of from three to five dollars, and a similar charge should be made in cases in which but a single visit is required. In cases also of extraordinary service, detention or attendance, or when, for any reason, the case is one of unusual importance or responsibility, the charge should be proportionally increased; and the duty to make such increased charge shall be considered obligatory upon the practitioner.

For a visit in consultation, from ten dollars to twenty dollars. In case of a consultation, the attending physician may also charge the usual consultation fee instead of the fee for an ordinary visit. For each subsequent visit in consultation, where the attendance is continuous, the fee may be from three dollars to five dollars.

For a visit after 9 P.M. and before 8 A.M., from five dollars to ten dollars.

In cases of consultation or other extraordinary attendance in the night, the fee for such extra attendance shall be added to that for a night visit.

For attendance involving travel out of town, ten dollars per hour.

For advice at the physician's house, according to the importance of the case, unseasonableness of the hour, or time occupied, from three dollars to twenty dollars.

For a letter of advice, according to the importance of the case or the time occupied, from ten dollars to twenty dollars.

For an opinion involving a question of law in which the physician may be subpœnaed, fifty dollars. The above charge shall also be allowed in cases in which the physician is subpœnaed in consequence of an opinion obtained under any other pretext, but which is afterward sought to be introduced as evidence in a suit or action. Also for attendance in court as an expert. In case of an opinion involving special study or experimental investigation, such additional service shall be charged in proportion to the time and labor expended. In

case of detention in court as an expert, or in a matter involving a professional opinion, for each day's attendance after the first, the fee shall be fifty dollars.

For a written certificate of health or cause of death in cases of life insurance, five dollars to ten dollars.

For a post-mortem examination in a case of legal investigation, fifty dollars.

For post-mortem examination made at the request of the family or relations of the deceased, twenty dollars.

For vaccine inoculation, five dollars.

MIDWIFERY.

For attendance during labor, thirty dollars to fifty dollars. For attendance during tedious labor, it shall be considered obligatory to make such additional charge as, in the discretion of the practitioner, the extraordinary detention or service shall seem to demand.

Obstetric operations, when necessary, shall be charged in addition to the usual fee for attendance.

In obstetrical practice, all subsequent visits shall be charged as in cases of ordinary attendance.

In cases of labor when the child is born, but not the placenta, before the arrival of the accoucheur, the whole fee is to be charged. When both the child and placenta are born before the arrival of the accoucheur, half or the whole fee may be charged, according to circumstances. This rule is intended to apply to cases in which the services of the accoucheur have been previously engaged, and in which the delay does not arise from his fault.

If, in any case of labor, a second physician is called in consultation, and subsequently detained in joint attendance, both attending and consulting physicians shall be entitled to the full fee for attendance, and also to such additional amount as may be deemed proper in view of the importance of the case, the unseasonableness of the hour, or any extraordinary detention, or service rendered.

OPERATIVE SURGERY.

For capital operations, or operations of unusual difficulty, such as amputations of large limbs, ligation of large arteries, operations for stone in the bladder, removal of breasts or of other large tumors, operations for cataract, for strangulated hernia, for vesico-vaginal fistula, for cleft palate, etc., one hundred dollars to five hundred dol-

lars, according to the importance of the case and the pecuniary circumstances of the patient.

For operations of secondary importance or difficulty, such as operations for fistula in ano, for hare-lip, for the radical cure of hydrocele, tapping and injection of ovarian cysts, reduction of dislocations or fractures of large bones, amputation of fingers or toes, tracheotomy, removal of small tumors not involving important organs, passing catheter in cases of obstruction, ligature of arteries of secondary size, etc., twenty-five dollars to one hundred dollars.

For minor operations, such as excision of tonsils, removal of nasal polypi, tapping for hydrocele or for ascites, opening abscesses, catheterism, stitching recent wounds, cupping, passing setons, excision of wens, etc., five dollars to twenty-five dollars.

After surgical operations, all subsequent visits shall be charged as in ordinary cases of attendance.

It is not designed by these regulations to prevent the members of this Association from rendering their services gratuitously to persons who are incapable of remunerating them without distressing themselves or their families; and in every case, in settling his account, the practitioner may make any deduction which he conscientiously believes that the circumstances of the patient render necessary.

No member of this Association shall omit charging any necessary visits made on the same day, on account of their number.

No member of this Association shall make a previous contract with any family for a definite sum, as a remuneration for his annual attendance on that family.

Those physicians of the adjoining towns who are members of the Massachusetts Medical Society, or have been licensed by it, shall be requested to conform in their charges to the fee-bill of this Association, whenever they attend patients in the city.

Physicians called to visit other physicians, or their families, living at a distance from Boston, shall be entitled to charge one-half the usual fees.

The Army Medical Museum.

Corner Seventh and B Streets, Washington, D.C.

The Museum was founded and a large portion of the medical and surgical specimens collected during the War of the Rebellion. Additions are continually being made

by medical officers of the army at the several military posts and by physicians in private practice. It is richer in specimens illustrating the results of gunshot wounds and of the surgical operations which they necessitate than any other collection in the world, and contains thirty thousand specimens. The collection is open to visitors daily from 9 to 4.

Museum of Hygiene, United States Navy.

18th and D Streets, Washington, D.C.

Organized under the Bureau of Medicine and Surgery, U.S.N., and recognized by Act of Congress, June 30, 1883. The plan comprehends a collection illustrative of the entire range of sanitary science, the establishment of a course of lectures by authoritative sanitarians from all sections of the country, and a library of sanitary science accessible, under proper restrictions and guarantees, to all who are engaged in the study of this branch of knowledge.

It is intended that it shall exhibit the present state and future progress of the nation in all departments of hygiene, and, to carry out this important scheme, the co-operation of physicians, engineers, architects, builders, manufacturers, inventors, and others interested in sanitary matters is not only desirable, but indispensable.

Contributions of articles, appliances, models, drawings, etc., illustrating improvements in food, water-supply, bedding, clothing, marine architecture, house and hospital construction and furniture; apparatus for heating, illuminating, ventilation, and removal of excreta and refuse; culinary, laundry, and bath facilities; appliances for physical culture and exercise; and whatever else tends to the preservation of health and the prevention of disease are therefore solicited.

The Library has over five thousand bound volumes of

foreign and domestic works of reference, etc., and constant additions are being made. It is intended to make this one of the most complete departments of the Museum. Attached to the library is a reading-room, with at present one hundred and fifteen periodical publications devoted to hygiene, science, and medicine.

Warren Museum.

Medical College, Boylston Street, Boston, Mass.

The nucleus of this collection was formed by Dr. John C. Warren, who presented his collection to Harvard College, with five thousand dollars for its proper preservation, for the purpose of illustrating the lectures at the Medical School. The preparations were mostly the result of his own labors for forty or fifty years, with those of his friends and pupils. Among those engaged in making preparations for it were Drs. William Gamage, Edward Warren, Jeffries Wyman, George Parkman, Samuel Parkman, and Winslow Lewis.

Anatomical preparations were given to Dr. Warren, from time to time, by Drs. James Jackson, John Gorham, J. B. S. Jackson, and others. Many specimens were added to it, both surgical and anatomical, by Dr. J. M. Warren, who, during his visits to Europe, made a large collection of morbid bones and of the anatomical preparations of Auzoux.

Since the collection came into the possession of the college, in 1847, it has been largely increased by gifts from various members of the profession, and by the constant labors of its late curator, Dr. J. B. S. Jackson. A detailed catalogue of the specimens in the Museum has been published.

The Museum has received, since its removal to its pres-

ent fire-proof receptacle, the collection of the late Dr. J. Mason Warren, consisting of crania and anatomical and physical preparations. The cabinet of the Boston Society for Medical Improvement, presented some time since as the Jackson Cabinet, has also been added. This Museum contains probably the finest general medical collection in America.

The Museum of the college also contains the Model Museum of Dermatology and Syphilography, established by Dr. Edward Wigglesworth, and by him given to the college. It is composed of models of diseases of the skin, each model being made from a cast taken directly from the patient, and subsequently colored at the bedside. The models were made by the celebrated French artist Baretta, modeller to the hospitals of Paris, and with him the composition and method of staining employed remain a secret.

The Museum comprises all the best specimens of the Museum of the St. Louis Hospital, as well as of the private collection of M. Baretta, and is the first collection of these models brought to America. It contains about two hundred specimens, and ranks in point of numbers second only to the collection of St. Louis. M. Baretta has given special attention to this Museum, and he offers it in America as a specimen of his powers, by which he is willing to be judged.

The Warren Museum may be inspected by any person on making application at the college.

Warren Museum of Natural History.

82 *Chestnut Street, Boston, Mass.*

Incorporated by the Legislature, Feb. 19, 1858. The collections contained in this building have for their nucleus

the skeleton of the great mastodon — the only perfect specimen in existence — which was discovered in 1845, near the Hudson River at Newburgh, and purchased in 1846 by Dr. John C. Warren. Dr. Warren, knowing that all collections were, sooner or later, destroyed by fire, in 1849 erected the present fire-proof building for the preservation of this specimen and for his other valuable collections in natural history.

The lower hall of the building contains the skeleton of the mastodon. At the side of it, and for the purpose of comparison, is that of the elephant "Pizarro," one of the largest elephants ever brought to this country, together with that of a horse. The room also contains one or two skeletons of the mastodon which have not been articulated, and a great number of the heads and teeth of animals at different periods of life. There are also the head of a whale, and casts of heads of various animals from the British Museum, among which are those of fossil heads of elephants from the Himalaya Mountains. Around the room is arranged a specimen of the fossil skeleton of the Zeuglodon Cetoides, sixty feet long.

In the hall are slabs containing the fossil impressions of gigantic birds and of other large animals. The story above contains specimens of the Ornithorhynchus paradoxus, and casts of the egg of the gigantic birds, Epyornis and Dinornis, from New Zealand and New Holland, and many other objects of interest. The Museum can be visited by making application to Dr. J. Collins Warren, 58 Beacon Street, or Dr. Thomas Dwight, 235 Beacon Street.

Medical Libraries.

LIBRARY OF THE SURGEON-GENERAL'S OFFICE, U.S.A.

The Library of the Surgeon-General's Office occupies a wing of the new building on the corner of Seventh and B streets, S. W., which was completed in 1887, contains about 98,000 volumes, properly so called, and 150,000 pamphlets. Many of these books are rare; and the whole is the best working Medical Library in the world, especially when taken in connection with the "Index Catalogue of Authors and Subjects," fifteen volumes of which have now appeared. An effort is made to obtain every medical periodical in the world for this library, and these are indexed as fast as received. The results of this indexing appear every month in the "Index Medicus," published by Mr. George S. Davis, Detroit, Michigan.

Books are loaned from this Library to other libraries which have buildings of their own, and will be responsible for them, and also to physicians who deposit with the Librarian a sum sufficient to replace the books if lost or injured. Rare books, or volumes of periodicals which could only be replaced with great difficulty, are not so loaned, however. In all cases of loan, the books must be sent and returned by express (not by mail) at the expense of the borrower.

LIBRARY OF THE MUSEUM OF HYGIENE, U.S.N.

See Museum of Hygiene.

PUBLIC LIBRARY, BOSTON,

contains 608,466 volumes, of which over 14,000 are medical; 459,128 are in the building in Copley Square, and the remainder in the branches, in the other portions of the city. The Library can be consulted by any person

making application. Books can be taken from the Library by any inhabitant (a limited stay in the city constitutes one such) on presentation of his library card. The card is given on application at the Library.

BOSTON ATHENÆUM.

Beacon Street, near Park. Over 200,000 volumes, 4,500 of which are medical. The privileges of this private library can be enjoyed through friends who may be stockholders.

LIBRARY OF THE MASSACHUSETTS MEDICAL COLLEGE.

A large library of standard books of reference and recent authorities is open to members of the medical class on the deposit of five dollars, to be returned when they shall cease to use the Library, and return all books loaned to them. The library room is open daily.

BOSTON MEDICAL LIBRARY ASSOCIATION.

19 *Boylston Place.*

Organized in August, 1875, and incorporated in 1877. The objects of this Association are to maintain a library of medical and scientific books, journals, and pamphlets for ready reference; to render the current medical literature accessible to physicians generally; and to establish a place of resort for professional men.

All members of the Massachusetts Medical Society Massachusetts Dental Society, Massachusetts College of Pharmacy, and such other persons as may be approved by the Committee on Admission, are eligible to admission into the Association.

The Association owns and occupies the building No. 19 Boylston Place (Tele.), which is open to members on any

week-day except legal holidays from half-past nine A.M. to six P.M., and on Tuesday and Friday evenings from seven to ten o'clock. It has a hall capable of holding two hundred persons, library, and committee and other rooms. These rooms are used by all the medical societies in the city. The Library contains over 25,000 volumes and 25,000 pamphlets.

In the rooms of the Association have been deposited the libraries of the Society for Medical Observation, the Society for Medical Improvement, the Gynecological Society of Boston, and the Boston Dispensary.

It receives regularly nearly 500 American and foreign medical and scientific journals. It has complete files of all the important journals which have appeared during the century.

Exchanges of books are made from its large number of duplicates.

The rooms of the Association offer every advantage for reading, reference, rest, and the meeting of members for professional or social intercourse, and are freely offered to visitors not resident in the city. The Registry for Nurses, conducted by a committee of the Medical Library Association, is described elsewhere.

THE TREADWELL LIBRARY.

At the Massachusetts General Hospital, Blossom Street, Boston, 5,000 volumes. This collection was the gift to the Hospital of the late Dr. Treadwell, of Salem. It is for the use of the officers of the Hospital, and may be consulted by others by special favor.

BOSTON CITY HOSPITAL LIBRARY,

containing over 3,000 volumes, especially rich in works on hospital construction and management.

ESSEX SOUTH DISTRICT (MASS.) MEDICAL SOCIETY.

The Library of the Essex South District Medical Society contains 2,500 bound volumes, and 700 magazines and monographs. Many of the books were given by Dr. E. A. Holyoke of Salem, and other members now deceased.

The Library is deposited in Plummer Hall, Salem; members of the Society are entitled to take out books.

CITY LIBRARY, SPRINGFIELD, MASS.

The Medical Department of the Library contains 1,250 volumes, including bound volumes of medical periodicals.

THURBER MEDICAL ASSOCIATION, MILFORD, MASS.

The Association has a library of upwards of 1,000 volumes, and a fund of $600, the income of which is applied for the purchase of medical books.

WORCESTER DISTRICT (MASS.) MEDICAL SOCIETY.

Public Library Building, Worcester, 10,000 volumes, increased each year by the income derived from the Waldo and Wilder funds. The Library is especially rich in recent works. The united funds amount to $9,000.

WORCESTER NORTH DISTRICT (MASS.) MEDICAL SOCIETY.

The Society is in possession of a Library of 400 volumes, from which books may be taken by members.

LIBRARY OF THE MEDICAL SCHOOL OF MAINE,

Brunswick, Me., contains about 4,000 volumes, principally modern works, and is annually increasing. It embraces the works of all authors of standard authority, and an extensive and valuable collection of plates.

LIBRARY OF THE RHODE ISLAND MEDICAL SOCIETY,

54 *North Main Street, Providence, R.I.,*

contains about 12,000 bound volumes, and a large collection of pamphlets. It receives regularly one hundred periodicals, and has complete files of nearly all the medical journals which have been published in English. Open daily from 12 to 6 P. M.

Librarian. — G. D. Hersey, M.D.

Prizes.

The following prizes are offered for competition by physicians and medical students: —

BOYLSTON MEDICAL PRIZE.

The Boylston Medical Committee, appointed by the President and Fellows of Harvard University, consists of the following physicians:

R. T. Edes, M.D.
S. G. Webber, M.D.
H. P. Bowditch, M.D.
F. W. Draper, M.D.
J. C. Warren, M.D.
E. S. Wood, M.D.
W. F. Whitney, M.D., Secretary, Harvard Medical School, Boston, Mass.
F. H. Williams, M.D.

Prizes of two hundred and one hundred dollars are offered each year for dissertations on specified subjects, which can be learned by applying to the Secretary.

In awarding these prizes, preference will be given to dissertations which exhibit original work, but if no dissertation is considered worthy

of a prize, the award may be withheld. They must be written in a distinct and plain hand, and their pages bound in book form. A sealed envelope, containing the name of the author, must accompany each dissertation. They should be sent to the Secretary of the committee before April 1 of the year in which they are offered. *Any clew by which the authorship of a dissertation is made known to the committee will debar such dissertation from competition.*

Unsuccessful dissertations may be reclaimed any time within a year.

BOYLSTON MEDICAL SOCIETY PRIZES.

In accordance with the will of the founder of the Society, Dr. Ward Nicholas Boylston, the sum of twenty-five dollars is appropriated annually, to be given in two prizes, of fifteen and ten dollars respectively, to the author or authors of the most approved dissertation, considered worthy, on medical subjects to be selected by the author. The prize is open only to active members of the Society. The fund is cared for by a board of seven trustees, practising physicians in the Commonwealth, selected by the Society; the prize is awarded by a committee of five physicians, also chosen by the Society. The names of the trustees and of the committee for the present year are given on a previous page.

Dissertations must be placed in the hands of the President of the Society on or before the 1st of January, together with a sealed envelope containing name and address of the author. The decision of the committee is announced at the last meeting of the Society in February.

THE WARREN PRIZE.

The Warren Prize was established by the will of Dr. J. Mason Warren, who gave the sum of $2,000 as a fund for a prize, to be called the Warren Prize, in memory of his father, Dr. John C. Warren, the accumulated interest of which every three years is awarded for the best dissertation considered worthy of a premium, on some subject in Physiology, Surgery, or Pathological Anatomy. The arbitrators are the Medical Board of the Massachusetts General Hospital. In case no dissertation is thought worthy of a premium, the interest is added to the original fund and the amount of the premium increased. A prize of five hundred dollars is offered for 1895 and every third year subsequently. A high value will be placed on original work.

Each essay should be accompanied by a sealed envelope, containing the author's name and address, and be sent to the Resident Physician of the Massachusetts General Hospital, Boston, on or before February 1.

THE DALTON SCHOLARSHIP.

Established at the Massachusetts General Hospital, under the John Call Dalton and Edward Barry Dalton Fund for promoting investigation in the science of medicine.

Candidates must be either House Pupils of the Hospital or graduates of a regular American Medical College.

The nature of the work in medical investigation proposed to be prosecuted by each candidate is designated by the Hospital Staff.

Scholars are appointed by the Board from among the candidates named. They are under the supervision of the Staff, and the Staff shall, whenever it thinks desirable, report to the Board any dissatisfaction it may feel as to the work or methods of scholars, and the Board may act in the premises as in the case of House Pupils.

The results of work of scholars shall appertain to the Hospital; and when made public, the name of the scholar shall accompany the publication; but no publication shall be made unless recommended by the Staff and approved by the Board. Should the work of a scholar extend through a part of a year only, he shall be entitled to a proportionate share of income. When the income is insufficient, appointments for the year may be omitted. Any income not used shall be cumulative and not added to the principal. Scholars shall be eligible for renomination and reappointment.

SCHOOL OF VETERINARY MEDICINE OF HARVARD UNIVERSITY PRIZES.

Medals will be given to those students who, upon graduating, and after special examination, show the greatest proficiency in the subjects of Anatomy, and Horse and Cattle Pathology; and to the student who shall pass the best general examination, including a special one in practical matters. Medals are also given for special excellence in dissection.

UNIVERSITY OF VERMONT PRIZES.

Open to competition by students of the Graduating Class. The Faculty have established two prizes for general proficiency in examination, — a first prize of fifty dollars, and a second prize of twenty-five dollars. These prizes will hereafter be awarded as follows: —

The ten students who pass the best examinations for their degree are allowed to compete in a written examination for the prizes; of this number the five who pass most perfectly are called Honor Men, and each receive a *Special Diploma of Honor*, and of these last, those who are deemed worthy receive respectively the first and second prize.

FISKE MEDICAL PRIZE.

The late Dr. Caleb Fiske, formerly President of the Rhode Island Medical Society, bequeathed in his last will, for the benefit of the Society, the sum of two thousand dollars, directing the proceeds to be applied to the payment of premiums for prize dissertations.

The Trustees of the Fiske Fund propose the subjects each year, which can be learned by correspondence with the Secretary.

For the best essay on either of these subjects worthy of a premium, the Trustees will pay two hundred dollars.

Every competitor for a premium is expected to conform to the following regulations, namely: —

To forward to the Secretary of the Trustees, on or before May 1, free of all expense, a copy of his dissertation, with a motto written thereupon, and also accompanying it a sealed packet, having the same motto inscribed upon the outside, and his name and place of residence within.

Previously to receiving the premium awarded, the author of the successful dissertation must transfer to the Trustees all his right, title, and interest in and to the same, for the use, benefit, and behoof of the Fiske Fund.

Letters accompanying the unsuccessful dissertations will be destroyed by the Trustees unopened, and the dissertations may be procured by their respective authors, if application be made therefor within three months.

Trustees. — Horace G. Miller, M.D., Providence; Albert Potter, M.D., Chepachet; John W. Mitchell, M.D., Providence; George L. Collins, M.D., Providence, Secretary.

THE LYMAN PRIZE.

Established by Mrs. Lyman, in memory of her late husband, Dr. George Hinckley Lyman, who was a member of the medical staff at the Boston City Hospital for many years. This fund provides for an annual prize of $150 for the best essay on any subject relating to medicine or surgery. The prize is open for competition to all graduates of the Boston City Hospital of not more than three years' standing. It is awarded by a committee of five, consisting of the senior members of the visiting staff of the Medical, Surgical, and Gynecological departments of the Hospital, and the President and Secretary of the City Hospital Club.

Essays must be type-written, and sent to the Secretary of the City Hospital Club before January 20, in each year. Each essay must have upon its titlepage an assumed name or a device, and must be accom-

panied by a sealed envelope containing the name of the writer. If no essay worthy of the full prize be received, the judges may withhold the amount in any year or may award one or more smaller prizes.

MEDICAL DEPARTMENT OF YALE UNIVERSITY PRIZES.

The income of the "Keese Prize Fund," amounting to about one hundred and forty-five dollars annually, is awarded by the faculty of Yale College to that member of the Graduating Class who presents the best thesis. The theses must be presented to the Dean on the second Saturday before Commencement. A prize, consisting of a set of obstetrical instruments, will be awarded that member of the graduating class who passes the best examination in obstetrics. The Campbell gold medal is awarded to the member of the graduating class who secures the highest rank in the examination of the course.

ORTON PRIZE.

Offered by J. G. Orton, M.D., ex-President of the New York State Medical Association, for the best short popular essay on some subject connected with practical sanitation.

Essays to be sent to E. D. Ferguson, M.D., Troy, N.Y., not later than August 1, in each year.

S. D. GROSS PRIZE.

Open to American citizens every fifth year for original essays, of not more than one hundred and fifty pages, on subjects in Pathology or surgical practice.

Essays may be sent, before June 1, to J. Ewing Mears, M.D., 1429 Walnut Street, Philadelphia.

BOSTON DENTAL COLLEGE PRIZES.

College prizes are awarded to the students passing the best examination in studies of the Senior, Junior, and Freshman years.

A prize is offered by Messrs. Hood & Reynolds to be awarded by the Faculty to the student who shall have attained the highest average in all the studies of his entire course.

EBERT PRIZE.

The income of five hundred dollars is given annually by the American Pharmaceutical Society as a prize for the best essay, written by a member, containing original investigations of a medical substance determining new properties, or containing other meritorious contributions to knowledge. The fund for this prize was given to the Association in 1873, by A. E. Ebert, of Chicago.

EXPLANATION OF THE ALPHABETICAL AND LOCAL LISTS.

It is intended that these lists shall contain the names of *all* members of the State medical societies in New England, *living within those States*, both active and retired, so far as they can be ascertained.

In the Alphabetical List, in the societies of Massachusetts, New Hampshire, and Rhode Island, the date, following the residence, is that of admission to the Society. The figures following the date denote the office hours. The date of academic and professional degrees, membership in societies, and official positions held, are given in succession. Except the date and source of the academic and the medical degrees, however, no facts are given other than those authorized by the members themselves. This statement will explain the frequent omission of important data.

In the local lists the date of incorporation follows the name of the town and county. The succeeding figures indicate the population, as given in the latest census. The name of the post-office is given in brackets, when not fully indicated by the name of the town.

Under the head of Boston (Suffolk County), Mass., are included all those living in the city, as at present constituted; though residents of portions formerly known as Roxbury, Dorchester, and West Roxbury, are still considered by the Society as belonging to the Norfolk District Society, and those in Charlestown and Brighton to the Middlesex South District Society.

MEDICAL DEPARTMENT, BOSTON, MASS.

EVERY candidate for admission, not holding a degree of arts or science, must pass a written examination on entrance to this School, in English, Latin, Physics, General Chemistry, and any one of the following subjects: French, German, Elements of Algebra, or Plane Geometry, Botany. The admission examination for the coming year will be held in June, at Boston, Quincy, Andover, Groton, Southborough, Worcester, Exeter, N. H., Concord, N. H., New York, Albany, Buffalo, Philadelphia, Washington, Cleveland, Cincinnati, Chicago, St. Louis, Minneapolis, Denver, San Francisco, Portland, Oregon, Bonn, Germany, and Tokyo, Japan; in September, at Boston, only. In and after June, 1896, an examination will be required in the following subjects: — 1. English; 2. Latin; 3. Physics; 4. Chemistry; 5 Either French or German; 6. Algebra, Plane Geometry, or Botany.

Instruction is given by lectures, recitations, clinical teaching and practical exercises, distributed throughout the academic year. In the subjects of Anatomy, Histology, Chemistry and Pathological Anatomy, laboratory work is largely substituted for, or added to, the usual methods of instruction. The year begins September 27, 1894, and ends on the last Wednesday in June, 1895, and is divided into two equal terms.

Students are divided into four classes, according to their time of study and proficiency, and during their last year will receive largely increased opportunities for instruction in the special branches mentioned. Students who began their professional studies elsewhere may be admitted to advanced standing; but all persons who apply for admission to the advanced classes must pass an examination in the branches already pursued by the class to which they seek admission.

Beginning with the academic year, 1892-93, the required course of study in this School was made a graded course covering four years. The degree of Doctor of Medicine *cum laude* will be given to candidates who have pursued a complete four years' course, and obtained an average of 75 per cent upon all the examinations of this course. In addition to the ordinary degree of Doctor of Medicine, as hitherto obtained, a certificate of attendance on the studies of the fourth year will be given to such students desiring it as shall have attended the course, and have passed a satisfactory examination in the studies of the same.

ORDER OF STUDIES.

For the First Year. — Anatomy, Physiology, Histology and Embryology, Hygiene, Bacteriology and Medical Chemistry during the second half-year.

For the Second Year. — Anatomy, Pathology and Pathological Anatomy, Clinical Chemistry, Materia Medica and Therapeutics, Theory and Practice, Clinical Medicine, Surgery and Clinical Surgery.

For the Third Year. — Theory and Practice, Clinical Medicine, Surgery, Clinical Surgery, Obstetrics, Pediatrics, Dermatology, Neurology, Gynæcology, and Mental Diseases.

For the Fourth Year. — Required Studies: Clinical Medicine, Clinical Surgery, Clinical Microscopy, Genito-Urinary Surgery, Ovarian Tumors, Mental Diseases, Ophthalmology, Otology, Laryngology, Orthopædics, Legal Medicine and Syphilis. *Elective Studies:* Ophthalmology, Otology, Orthopædics, Gynæcology, Dermatology, Neurology, Bacteriology, Physiology, Chemistry, Hygiene, Operative Surgery, Operative Obstetrics.

REQUIREMENTS FOR A DEGREE. — Every candidate must be twenty-one years of age, must have studied medicine four full years, have spent at least one continuous year at this school, have passed a written examination upon all the prescribed studies of the course taken.

FEES. — Matriculation, $5; for the first three years, $200; for the fourth year, $100; for one term alone, $120; for Graduation, $30. For Graduates' Course, the fee for one year is $200; for one term, $120; and for single courses, such fees as are specified in the Catalogue. Payment in advance, or, if a bond is filed, at the end of the term. Students in regular standing in any one department of Harvard University are admitted free to the lectures, recitations, and examinations of other departments.

✳ VICTORY ✳

SINCE our exhibit and receiving the HIGHEST AWARD AT THE WORLD'S FAIR AT CHICAGO, great interest in our products has developed throughout the United States; and this awakening is not confined to physicians and scientists only, but the *people* generally.

Our sales show a very marked increase, and we are shipping goods to the North, South, East and West. ***Our Brandies, Whiskeys, etc., purified by the aid of Science, are found to be the safest stimulants for the sick and convalescent, and are prescribed by the leading physicians.***

We accomplish better results in three to six months than can be reached in five to eight years under the old-fogy system of maturing liquors. . . . . .

Our purifying process develops to a high degree the rich, smooth flavor and standard strength of the oldest liquors, which the public seldom get, owing to the adulterating of young liquors to imitate the old, by the trade generally.

Do not injure your health by using *adulterated goods* when you can receive from us those that are absolutely pure and correct. Our goods are found at all leading druggists, in sealed bottles bearing our trade mark, and at our stores in Boston, New York, and other principal cities.

WHEELER'S TISSUE PHOSPHATES.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility. This elegant preparation combines in an agreeable Aromatic Cordial, *acceptable to the most irritable conditions of the stomach:* Bone Calcium Phosphate, $Ca_3\ 2PO_4$; Sodium Phospate, $Na_2\ HPO_4$; Ferrous Phosphate, $Fe_3\ 2PO_4$; Trihydrogen Phosphate, $H_3\ PO_4$; and the active principles of Calisaya and Wild Cherry.

The special indication of this combination of Phosphates in Spinal Affections, Caries Necrosis, Ununited Fractures, Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physicological restorative* in Sexual Debility and all used-up conditions of the Nervous System should receive the careful attention of therapeutists.

NOTABLE PROPERTIES. As reliable in Dyspepsia as Quinine in Ague. Secures the largest per cent. of Benefit in Consumption and all Wasting Diseases, *by determining the perfect digestion and assimilation of food.* When using it, Cod-Liver Oil may be taken without repugnance. It renders success possible in treating chronic diseases of Women and Children, who take it with pleasure for long periods—a factor essential to maintain the good will of the patient. Being a Tissue Constructive, it is the best *general utility compound* for Tonic Restorative purposes we have, no mischievous effects resulting from exhibiting it in any possible morbid condition of the system.

Phosphates being a *Natural Food Product*, no substitute will do their work.

DOSE—For an Adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M.D., Montreal, P.Q.

To prevent substitution, put up in pound bottles only, and sold by all Druggists at One Dollar.

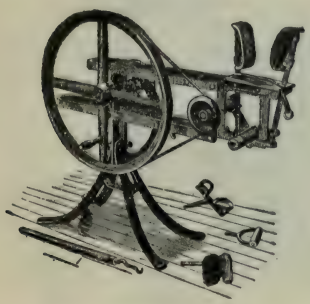
THE IMPROVED MOVEMENT CURE INSTITUTE,

No. 20 WEST 59th STREET, NEW YORK.



The "Manipulator," one of the machines employed in giving Mechanical Massage.

DEAR DOCTOR:

It is a clinical fact that MECHANICAL MASSAGE is a specific for the most severe and obstinate forms of chronic diseases. All Pelvic Diseases of Women, as well as all affections of either the Nervous, Circulatory, Muscular or Digestive System, regardless of the special names by which they are designated, are particularly amenable to this form of treatment.

This Institute makes a specialty of the EXPERIENCED application of Mechanical Massage and *at no other place or Institution is it administered with the same knowledge, skill and precision as here, under the personal observation of Dr. Geo. H. Taylor, its inventor*, a fact of the greatest importance to all earnest seekers after health.

Personal inspection solicited. Send stamp for literature which will explain *why* and *how* the treatment acts remedially in any special disease about which information is desired. All of Dr. Taylor's Appliances for giving Mechanical Massage for sale. Catalogue sent upon application. Address, for any purpose,

The I. M. C. Institute, 20 West 59th St., New York.

This is to certify that I have examined Mr. L. REICH'S TOKAYER AUSBRUCH, TOKAYER MASLAS, and BUDAI IMP. I take great pleasure in commending these Wines to the Medical Profession, because of their purity.

R. OGDEN DOREMUS, M.D., LL.D.

It it said that the man who makes a blade of grass grow where none grew before is a benefactor of his race, and so in a similar manner may we regard a man who furnishes a pure wine for sick people. To sell adulterated wine should be punished as a crime. Your Hungarian Wines are eminently wholesome; they are always pure and reliable, and therefore worthy of confidence. They are pleasant to the taste, agree well with the stomach, and are free from injurious qualities, — in short, everything that could be desired. We cordially recommend Mr. Reich and his Wines to all professional brethren.
